S65

E select this as one of the *reprints* of our OHIO VALLEY HISTORICAL SERIES, believing that in it the Indian "Customs, Manners, Traditions, Theological Sentiments, Mode of Warfare, Military Tactics, Discipline, and Encampment, Treatment of Prisoners, etc., are better explained and more minutely related than has been heretofore done," as the author expresses himself in his title page. His vivid pictures of the vagrant, precarious lives of the Indians, little more than a century ago, in the then unbroken wilderness which has given place to the prosperous State of Ohio, written without any pretense to style or learning, bear every impress of truthfulness; and as a faithful record of an eye-witness of their condition, habits, etc., it deserves to be perpetuated. It has been several times reprinted, with more or less accuracy, but all the editions may now be classed among the scarce books.

James Smith was born in 1737, in Franklin county, Pennsyl-

## M6'72295

vania, at that time the backwoods frontier, the extreme limit of civilization. As might be expected, he received but a limited education in book-learning, but, as befitted a backwoods boy, he was well versed in wood-craft, active in the hunt, and inured to all the hardships and trials of a frontier life. At the age of eighteen, in 1755, he was taken captive by the Indians, was adopted into one of their families, and accompanied them in all their wanderings, till his escape in 1759. He returned to Conoco-cheague early in 1760, and was received with great joy by his family and friends.

He settled himself at his old home in the ordinary routine of pioneer farming, and in May, 1763, married Miss Anne Wilson, by whom he had seven children—four sons, Jonathan, William, James, and Robert; and three daughters, Jane, Elizabeth, and Rebecca. His subsequent adventures, as a leader of the Blackboys, in 1763 and 1769; his service as a lieutenant in Bouquet's expedition against the Ohio Indians in 1764; his exploring excursion into southern Kentucky in 1766, and his services during the Revolutionary war, in which he earned and received the rank of colonel, are sufficiently detailed in his own narrative.

After the temporary peace made with the Indians in 1778, he removed to Westmoreland county, Pennsylvania, and settled on a farm on Jacob's creek. Here his wife died. [Of her we know little, except that she was a good woman, and a devoted wife and mother. In 1785, he spent most of the summer in Kentucky, looking after some land claims; there he married his

vi

second wife, Mrs. Margaret Irvin,\* *nee* Rodgers, widow of Mr. Abraham Irvin, a woman of cultivated mind, with whom he lived happily until her decease in 1800. They had no children. She had five by her former marriage.

Of Mr. Smith's affection for his first wife, the following incident bears witness. It was communicated to us by Rev. J. M. Smith, son of Mr. Smith's youngest son, Robert.

"My father's earliest recollections related to the habits of his father, which he told about as follows: His mother was buried on the farm, on a hill at some distance from the house, where some large oak trees had been left standing to mark and shade the family burying ground. Under the shade of these trees my grandfather had constructed a kind of booth, somewhat after the form of an Indian wigwam, but small in size.

\* The following account is given of Mrs. Irvin in the edition of this work, published by Grigg & Elliot, in 1834:

"She was born in the year 1744, in Hanover county, Virginia. She was of a respectable family; her father and the Rev. Dr. Rodgers, of New York, were brothers' children. Her mother was sister to the Rev. James Caldwell, who was killed by the British and tories at Elizabeth Point, New Jersey. Her father removed, when she was a child , to what was then called Lunenburg, now Charlotte county, Virginia. She never went to school but three months, and that at the age of five years. At the expiration of that term the school ceased, and she had no opportunity to attend one afterward. Her mother, however, being an intelligent woman, and an excellent scholar, gave her lessons at home. On the 5th of November, 1764, she was married to Mr. Irvin, a respectable man, though in moderate circumstances. In the year 1777, when every true friend of his country felt it his duty to render some personal service, he and a neighbor, by the name of William Handy, agreed that they would enlist for the term of three years, and each to serve eighteen months; Irvin to serve the first half, and Handy the second. Mr. Irvin entered upon duty, in company with many others from that section of the country. When they had marched to Dumfries, Va., before they joined the main army, they were ordered to halt and inoculate for the small-pox. Irvin neglected to inoculate, under the impression he had had the disease during infancy. The consequence was, he took the small-pox in the natural way, and died, leaving Mrs-Irvin, and five small children, four sons and a daughter.

In this he had made a couch, upon which he would lie upon his back and read. To this retreat he was accustomed to take his little son, and there to read to him from the Holy Scriptures, and point out to him the grave of his mother. Their last visit to this hallowed spot made a very deep impression upon the mind of my father; he never referred to it without tears, even when he was an old man. They were about to remove to the State of Kentucky, and all other matters having been arranged, he took his little boy and repaired to the grave of his wife, which he was soon to leave forever, and there the two kneeled, side by side, and the widowed husband offered up his last prayer on behalf of his orphan child over the grave of the departed wife and mother. This done, leading his little son by the hand, he followed his family, who had already started from their old home to seek a new one in the wilds of Kentucky."

This was in 1788. He took with him, his wife and her children, and of his own children, James, William, Robert, and Rebecca, and settled on Cane Ridge, in Bourbon county, Kentucky, about seven miles from Paris.

Col. Smith was a man of very quiet and taciturn character, a reader and a thinker, and much given to religious reading and meditation. In him, however, the courage of opinion was fully developed, and when roused, he had more than ordinary talent

viii

In the fall of 1782, Mrs. Irvin removed, in company with a number of enterprising Virginians, to the wilds of Kentucky; and three years afterward intermarried with Col. Smith, by whom she had no issue. She died about the year 1800, in Bourbon county, Kentuck*j*, in the 56th year of her age. She was a member of the Presbyterian church, and sustained through life an unblemished reputation. In early life she wrote but little, most of her productions being the fruits of her maturer years, and while she was the wife of Col. Smith. But little of her composition has ever been put to press; but her genius and taste were always acknowledged by those who had access to the productions of her pen. She had a happy talent for pastoral poetry, and many fugitive pieces ascribed to her will long be cherished and admired by the children of song.

in debate, so that among his new neighbors he soon became a man of mark. He was elected the same year a member of the convention which sat at Danville to confer about a separation from the State of Virginia, and afterward represented Bourbon county in the General Assembly of the State.

In religious matters Col. Smith was an enthusiast, and for some time took an active part in the Stoneite movement, which so excited the early church in Kentucky, for an account of which we must refer our readers to Davidson's *History of the Presbyterian Church in Kentucky*. He finally, however, returned to the Presbyterian church, and receiving licensure, or perhaps ordination, he spent much of his time in his later years as a missionary among the Indians, for which work his familiarity with Indian character eminently fitted him.

In 1802 he lived with his son James, to whom he had conveyed the copyright and the remaining copies of his work, and also twenty acres of land, for which the son had agreed "to decently support his father during his lifetime."

On his return from one of his missionary excursions into Tennessee, he found that his son James had during his absence joined the Shakers, and had gone with his family to a settlement which that sect had just formed on Turtle Creek, Ohio (near Lebanon). He followed, "to see what sort of people they were," lived with them only a short time, but long enough to be disgusted with the whole fraternity. His son James, who before joining the Shakers "was naturally friendly, a dutiful son, a kind husband and a tender father," seems to have changed his whole nature, and

"appeared to be divested of natural affection toward his wife Polly and other connections." She, on going to visit some relatives with her father-in-law, was advertised by her husband as having left his "*house and board* without any just cause';" and on her return, at the instigation of the elders, he refused to receive her, or allow her to see her children, "without she would receive their testimony." Thus driven from the settlement, and from her husband and children, she returned to her friends in Kentucky. Col. Smith was greatly exasperated at the conduct of his son, and opened his batteries on the leaders of the Shakers, exposing them socially, theologically, and politically, in a pamphlet entitled

"REMARKABLE OCCURRENCES lately discovered among the People called SHAKERS: of a Treasonable and [barbarous nature; or, SHAKERISM DEVELOPED. By James Smith. Paris (Ky.) Printed by Joel R. Lyle." (1810.) pp. 24.

This brought out a rejoinder by Richard McNemar, one of their leaders, and Col. Smith again appeared in print, in a pamphlet of 44 pages, entitled

"SHAKERISM DETECTED; their Erroneous and Treasonable Proceedings, and FALSE PUBLICATIONS contained in Different Newspapers, *Exposed to Public View*, by the depositions of ten different persons living in various parts of the State of Kentucky and Ohio, accompanied with remarks. By Col. James Smith, of Kentucky. Paris, Kentucky. Printed by Joel R. Lyle. 1810."

These, however, had no result so far as the son was concerned: he remained with the Shakers; and Col. Smith spent the remainder of his days, thus embittered by the unnatural con-

x

duct of his son, chiefly with his step-children, the Irvins, in Washington county, Kentucky, where he died in 1812.

The Indians had again become very troublesome in 1811, and a general Indian war was expected. Col. Smith, now too old for actual service,\* but still having considerable of the old leaven of patriotism in him, wrote out and published a treatise on Indian warfare, of which the following is the title page:

"A Treatise on the Mode and Manner of Indian War, their Tactics, Discipline and Encampment, the various Methods they Practise, in order to obtain the Advantage, by Ambush, Surprise, Surrounding, &c. Ways and Means proposed to Prevent the Indians from obtaining the Advantage. A Chart, or Plan of Marching, and Encamping, laid down, whereby we may undoubtedly Surround them, if we have Men Sufficient. Also—A Brief Account of Twenty-three Campaigns, carried on against the Indians with the Events since the year 1755; Gov. Harrison's included. By Col. James Smith. Likewise—Some Abstracts selected from his Journal, while in Captivity with the Indians, relative to the Wars: which was published many years ago, but few of them now to be found. Paris Kentucky. Printed by Joel R. Lyle. 1812." pp 1, 59.

There is not much new matter in this volume. It is little more than those portions of his "captivity" relating to Indian warfare, rearranged and connected. No one could read it without being convinced of the wisdom of the tactics he suggests and even of their applicability to Indian warfare in these latter days.

xi

<sup>\*</sup>He made the attempt, however. In *Niles' Register* for September 26, 1812, he is said to have "gone to join the army, when he heard of the surrender of Hull." His son Robert raised a company of volunteers in Washington county, Ky. He was a tanner, and in order to *uniform* his company he tanned all their pantaloons in his vats.

We must express our obligations to Miss Sarah M'Quaid, of Elizabeth, Pennsylvania, who was brought up in Jonathan Smith's family, and Rev. J. M. Smith, of McKeesport, Pennsylvania, for much of the material of this sketch; and also to Rev. Joel K. Lyle, of Lexington, for the use of the two Shaker pamphlets; and Mr. S. B. Elliott, of Cincinnati, for the pamphlet on Indian warfare.

Since the narrative was printed we have been favored by Mr. Wm. M. Darlington of Pittsburgh with the valuable Notes printed in the Appendix on the localities, etc., mentioned by Col. Smith. They will be found to be of considerable interest, and add very much to the value of this republication. We regret that they were received too late to refer to them in the text, but the pages are given with the Notes referring back to the Narrative, and the Index will be a ready reference to both the text and notes.

xii

The next morning they divided the laft of their provision which they had brought from Fort DuQuesne, and gave me an equal share, which was about two or three ounces of mouldy bifcuit-this and a young Ground-Hog, about as large as a Rabbit, roafted, and alfo equally divided, was all the provision we had until we came to the Loyal-Hannan, which was about fifty miles; and a great part of the way we came through exceeding rocky Laurel-thickets, without any path. When we came to the Weft fide of Laurel Hill, they gave the fcalp halloo, as ufual, which is a long yell or halloo, for every fcalp or prifoner they have in poffeffion; the laft of thefe fcalp halloos was followed with quick and fudden, fhrill fhouts of joy and triumph. On their performing this, we were anfwered by the firing of a number of guns on the Loyal-Hannan, one after another, quicker than one could count, by another party of Indians, who were encamped near where Ligoneer now stands. As we advanced near this party, they increafed with repeated fhouts of joy and triumph; but I did not thare with them in their exceffive mirth. When we came to this camp, we found they had plenty of Turkeys and other meat, there; and though I never before eat venifon without bread or falt, yet as I was hungry, it relifhed very well. There we lay that night, and the next morning the whole of us marched on our way for Fort DuQuesne. The night after we joined another camp of Indians, with nearly the fame cere-

mony, attended with great noife, and apparent joy, among all, except one. The next morning we continued our march, and in the afternoon we came in full view of the fort, which flood on the point, near where Fort Pitt now flands. We then made a halt on the bank of the Alegheny, and repeated the fcalp halloo, which was anfwered by the firing of all the firelocks in the hands of both Indians and French who were in and about the fort, in the aforefaid manner, and alfo the great guns, which were followed by the continued fhouts and yells of the different favage tribes who were then collected there.

As I was at this time unacquainted with this mode of firing and yelling of the favages, I concluded that there were thousands of Indians there, ready to receive General Braddock; but what added to my furprize, I faw numbers running towards me, ftripped naked, excepting breech-clouts, and painted in the most hideous manner, of various colors, though the principal color was vermillion, or a bright red; yet there was annexed to this, black, brown, blue, &c. As they approached, they formed themfelves into two long ranks, about two or three rods apart. I was told by an Indian that could fpeak English, that I must run betwixt these ranks, and that they would flog me all the way, as I ran, and if I ran quick, it would be fo much the better, as they would quit when I got to the end of the ranks. There appeared to be a general rejoicing around me,

9

yet I could find nothing like joy in my breaft; but I flarted to the race with all the refolution and vigor I was capable of exerting, and found that it was as I had had been told, for I was flogged the whole way. When I had got near the end of the lines, I was flruck with fomething that appeared to me to be a flick, or the handle of a tommahawk, which caufed me to fall to the ground. On my recovering my fenfes, I endeavored to renew my race; but as I arofe, fome one caft fand in my eyes, which blinded me fo, that I could not fee where to run. They continued beating me moft intolerably, until I was at length infenfible; but before I loft my fenfes, I remember my wifhing them to flrike the fatal blow, for I thought they intended killing me, but apprehended they were too long about it.

The first thing I remember was my being in the fort, amidst the French and Indians, and a French doctor standing by me, who had opened a vein in my left arm: after which the interpreter asked me how I did, I told him I felt much pain; the doctor then washed my wounds, and the bruised places of my body, with French brandy. As I felt faint, and the brandy smelt well, I asked for some inwardly, but the doctor told me, by the interpreter, that it did not fuit my case.

When they found I could fpeak, a number of Indians came around me, and examined me with threats of cruel death, if I did not tell the truth. The first question they asked me, was, how many men were there in the

party that were coming from Pennfylvania, to join Braddock? I told them the truth, that there were three hundred. The next queftion was, were they well armed? I told them they were all well armed, (meaning the arm of flefh) for they had only about thirty guns among the whole of them; which, if the Indians had known, they would certainly have gone and cut them all off; therefore I could not in confcience let them know the defencelefs fituation of thefe road-cutters. I was then fent to the hofpital, and carefully attended by the doctors, and recovered quicker than what I expected.

Some time after I was there, I was vifited by the Delaware Indian already mentioned, who was at the taking of me, and could fpeak fome English. Though he fpoke but bad English, yet I found him to be a man of confiderable understanding. I asked him if I had done any thing that had offended the Indians, which caufed them to treat me fo unmercifully? He faid no, it was only an old cuftom the Indians had, and it was like how do you do; after that he faid I would be well ufed. I asked him if I should be admitted to remain with the French? He faid no-and told me that as foon as I recovered, I must not only go with the Indians, but must be made an Indian myself. I asked him what news from Braddock's army? He faid the Indians fpied them every day, and he shewed me by making marks on the ground with a flick, that Brad-

IO

dock's army was advancing in very clofe order, and that the Indians would furround them, take trees, and (as he expressed it) *fhoot um down all one pigeon*.

Shortly after this, on the 9th day of July 1755, in the morning I heard a great flir in the fort. As I could then walk with a ftaff in my hand, I went out of the door which was juft by the wall of the fort, and ftood upon the wall and viewed the Indians in a huddle before the gate, where were barrels of powder, bullets, flints &c., and every one taking what fuited; I faw the Indians alfo march off in rank intire—likewife the French Canadians, and fome regulars, after viewing the Indians and French in different positions, I computed them to be about four hundred, and wondered that they attempted to go out against Braddock with fo fmall a party. I was then in high hopes that I would foon fee them flying before the British troops, and that General Braddock would take the fort and refcue me.

I remained anxious to know the event of this day; and in the afternoon I again obferved a great noife and commotion in the fort, and though at that time I could not understand French, yet I found it was the voice of Joy and triumph, and feared that they had received what I called bad news.

I had observed fome of the old country foldiers fpeak Dutch, as I spoke Dutch I went to one of them and asked him what was the news? he told me that a runner had just arrived, who said that Braddock would

certainly be defeated; that the Indians and French had furrounded him, and were concealed behind trees and in gullies, and kept a conftant fire upon the English, and that they faw the English falling in heaps, and if they did not take the river which was the only gap, and make their escape, there would not be one man left alive before fun down. Some time after this I heard a number of fcalp halloo's and faw a company of Indians and French coming in. I obferved they had a great many bloody fcalps, grenadiers' caps, British canteens, bayonets &c. with them. They brought the news that Braddock was defeated. After that another company came in which appeared to be about one hundred, and chiefly Indians, and it feemed to me that almost every one of this company was carrying fcalps; after this came another company with a number of waggon-horfes, and alfo a great many fcalps. Those that were coming in, and those that had arrived, kept a constant firing of fmall arms, and alfo the great guns in the fort, which were accompanied with the most hedeous shouts and yells from all quarters; fo that it appeared to me as if the infernal regions had broke loofe.

About fun down I beheld a fmall party coming in with about a dozen prifoners, ftripped naked, with their hands tied behind their backs, and their faces, and part of their bodies blacked—thefe prifoners they burned to death on the bank of Alegheny River oppofite to the fort. I flood on the fort wall until I beheld them begin

to burn one of thefe men, they had him tied to a ftake and kept touching him with fire-brands, red-hot irons &c. and he fcreeming in a most doleful manner,—the Indians in the mean time yelling like infernal spirits. As this fcene appeared too shocking for me to behold, I retired to my lodging both fore and forry.

When I came into my lodgings I faw Ruffel's Seven Sermons, which they had brought from the field of battle, which a Frenchman made a prefent of to me. From the beft information I could receive there were only feven Indians and four French killed in this battle, and five hundred Britifh lay dead in the field; befides what were killed in the river on their retreat.

The morning after the battle I faw Braddock's artilery brought into the fort, the fame day I alfo faw feveral Indians in Britifh-officers' drefs with fafh, half-moon, laced hats &c. which the Britifh then wore.

A few days after this the Indians demanded me and I was obliged to go with them. I was not yet well able to march, but they took me in a canoe, up the Alegheny River to an Indian town that was on the north fide of the river, about forty miles above Fort DuQuefne. Here I remained about three weeks, and was then taken to an Indian town on the weft branch of Muſkingum, about twenty miles above the forks, which was called Tullihas, inhabited by Delawares, Caughnewagas and Mohicans.—On our rout betwixt the aforefaid towns, the country was chiefly black-oak and white-oak land,

which appeared generally to be good wheat land, chiefly fecond and third rate, intermixed with fome rich bottoms.

The day after my arrival at the aforefaid town, a number of Indians collected about me, and one of them began to pull the hair out of my head. He had fome ashes on a piece of bark, in which he frequently diped his fingers in order to take the firmer hold, and fo he went on, as if he had been plucking a turkey, until he had all the hair clean out of my head, except a fmall fpot about three or four inches fquare on my crown; this they cut off with a pair of fciffors, excepting three locks, which they dreffed up in their own mode. Two of these they wraped round with a narrow beaded garter made by themfelves for that purpofe, and the other they platted at full length, and then fluck it full of filver broches. After this they bored my nofe and ears, and fixed me off with ear rings and nofe jewels, then they ordered me to ftrip off my clothes and put on a breechclout, which I did; then they painted my head, face and body in various colors. They put a large belt of wampom on my neck, and filver bands on my hands and right arm; and fo an old chief led me out in the ftreet and gave the alarm halloo, coo-wigh, feveral times repeated quick, and on this all that were in the town came running and ftood round the old chief, who held me by the hand in the midst. As I at that time knew nothing of their mode of adoption, and had feen them put to death all they had taken, and as I never could

**I**4

find that they faved a man alive at Braddock's defeat, I made no doubt but they were about putting me to death in fome cruel manner. The old chief holding me by the hand made a long fpeech very loud, and when he had done he handed me to three young fquaws, who led me by the hand down the bank into the river until the water was up to our middle. The fquaws then made figns to me to plunge myfelf into the water, but I did not understand them; I thought that the refult of the council was that I should be drowned, and that thefe young ladies were to be the executioners. They all three laid violent hold of me, and I for fome time opposed them with all my might, which occafioned loud laughter by the multitude that were on the bank of the river. At length one of the squaws made out to fpeak a little English (for I believe they began to be afraid of me) and faid, no hurt you; on this I gave myfelf up to their ladyfhips, who were as good as their word; for though they plunged me under water, and washed and rubbed me feverely, yet I could not fay they hurt me much.

Thefe young women then led me up to the council houfe, where fome of the tribe were ready with new cloths for me. They gave me a new ruffled fhirt, which I put on, alfo a pair of leggins done off with ribbons and beads, likewife a pair of mockafons, and garters dreffed with beads, Porcupine-quills, and red hair—alfo a tinfel laced cappo. They again painted my head and face

with various colors, and tied a bunch of red feathers to one of thefe locks they had left on the crown of my head, which flood up five or fix inches. They feated me on a bear skin, and gave me a pipe, tomahawk, and polecat skin pouch, which had been skined pocket fashion, and contained tobacco, killegenico, or dry fumach leaves, which they mix with their tobacco,-alfo fpunk, flint and steel. When I was thus feated, the Indians came in dreffed and painted in their grandeft manner. As they came in they took their feats and for a confiderable time there was a profound filence, every one was fmoking,-but not a word was fpoken among them.—At length one of the chiefs made a fpeech which was delivered to me by an interpreter,-and was as followeth :--- "My fon, you are now flefh of our flefh, and bone of our bone. By the ceremony which was performed this day, every drop of white blood was washed out of your veins; you are taken into the Caughnewago nation, and initiated into a warlike tribe; you are adopted into a great family, and now received with great feriousnefs and solemnity in the room and place of a great man; after what has paffed this day, you are now one of us by an old ftrong law and cuftom-My fon, you have now nothing to fear, we are now under the fame obligations to love, fupport and defend you, that we are to love and defend one another, therefore you are to confider yourfelf as one of our people."-At this time I did not believe this fine fpeech, efpecially that of

the white blood being washed out of me; but fince that time I have found that there was much fincerity in faid speech,—for from that day I never knew them to make any distinction between me and themselves in any respect whatever until I left them.—If they had plenty of cloathing I had plenty, if we were scarce we all shared one fate.

After this ceremony was over, I was introduced to my new kin, and told that I was to attend a feaft that evening, which I did. And as the cuftom was, they gave me alfo a bowl and wooden fpoon, which I carried with me to the place, where there was a number of large brafs kettles full of boiled venifon and green corn; every one advanced with his bowl and fpoon and had his fhare given him.—After this, one of the chiefs made a fhort fpeech, and then we began to eat.

The name of one of the chiefs in this town was Tecanyaterighto, alias Pluggy, and the other Afallecoa alias Mohawk Solomon.—As Pluggy and his party were to flart the next day to war, to the frontiers of Virginia, the next thing to be performed was the war dance, and their war fongs. At their war dance they had both vocal and inftrumental mufic. They had a fhort holow gum clofe in one end, with water in it, and parchment ftretched over the open end thereof, which they beat with one flick, and made a found nearly like a muffled drum; all thofe who were going on this expedition collected together and formed. An old Indian then began

to fing and timed the mufic by beating on this drum, as the ancients formerly timed their mufic by beating the tabor. On this the warriors began to advance, or move forward in concert, like well difciplined troops would march to the fife and drum. Each warrior had a tomahawk, fpear or war-mallet in his hand, and they all moved regularly towards the eaft, or the way they intended to go to war. At length they all ftretched their tomahawks towards the Potomack, and giving a hideous fhout or yell, they wheeled quick about, and danced in the fame manner back. The next was the war fong. In performing this, only one fung at a time, in a moving pofture, with a tomahawk in his hand, while all the other warriors were engaged in calling aloud he-ub, he-ub, which they conftantly repeated, while the war fong was going on. When the warior that was finging had ended his fong, he ftruck a war poft with his tomahawk, and with a loud voice told what warlike exploits he had done, and what he now intended to do, which was answered by the other wariors, with loud fhouts of applaufe. Some who had not before intended to go to war, at this time were fo animated by this performance that they took up the tomahawk and fung the war fong, which was answered with fhouts of joy, as they were then initiated into the prefent marching company. The next morning this company all collected at one place, with their heads and faces painted with various colors, and packs upon their

backs; they marched off all filent, except the commander, who, in the front fang the travelling fong, which began in this manner: *boo caughtainte heegana*. Juft as the rear paffed the end of the town, they began to fire in their flow manner, from the front to the rear, which was accompanied with fhouts and yells from all quarters.

This evening I was invited to another fort of dance, which was a kind of promiscuous dance. The young men flood in one rank, and the young women in another, about one rod apart, facing each other. The one that raifed the tune, or ftarted the fong, held a fmall gourd or dry shell of a squash, in his hand, which contained beads or fmall ftones, which rattled. When he began to fing, he timed the tune with his rattle; both men and women danced and fung together, advancing towards each other, flooping until their heads would be touching together, and then ceafed from dancing, with loud shouts, and retreated and formed again, and fo repeated the fame thing over and over, for three or four hours, without intermission. This exercise appeared to me at first irrational and infipid; but I found that in finging their tunes, they used ya ne no hoo wa ne Gc., like our fa fol la, and though they have no fuch thing as jingling verfe, yet they can intermix fentences with their notes, and fay what they pleafe to each other, and carry on the tune in concert. I found that this was a kind of wooing or courting dance, and as they

advanced flooping with their heads together, they could fay what they pleafed in each other's ear, without difconcerting their rough mufic, and the others, or those near, not hear what they fay.

Shortly after this I went out to hunt, in company with Mohawk Solomon, fome of the Caughnewagas and a Delaware Indian that was married to a Caughnewaga fquaw. We travelled about fouth, from this town, and the first night we killed nothing, but we had with us green corn, which we roafted and ate that night. The next day we encamped about twelve o'clock, and the hunters turned out to hunt, and I went down the run that we encamped on, in company with fome fquaws and boys, to hunt plumbs, which we found in great plenty. On my return to camp I observed a large piece of fat meat: the Delaware Indian that could talk fome English, observed me looking earneftly at this meat, and afked me what meat you think that is? I faid I fupposed it was bear meat; he laughed and faid, ho, all one fool you, beal now elly pool, and pointing to the other fide of the camp, he faid look at that skin, you think that beal skin? I went and lifted the skin, which appeared like an ox hide: he then faid, what fkin you think that? I replied that I thought it was a buffaloe hide; he laughed and faid you fool again, you know nothing, you think buffaloe that colo? I acknowledged I did not know much about thefe things, and told him I never faw a buffaloe, and that I had not heard what color they were. He replied by and by you

*shall fee gleat many buffaloe; He now go to gleat lick. That fkin no buffaloe fkin, that fkin buck-elk fkin.* They went out with horfes, and brought in the remainder of this buck-elk which was the fatteft creature I ever faw of the tallow kind.

We remained at this camp about eight or ten days, and killed a number of deer. Though we had neither bread or falt at this time, yet we had both roaft and boiled meat in great plenty, and they were frequently inviting me to eat, when I had no appetite.

We then moved to the buffaloe lick, where we killed feveral buffaloe, and in their fmall brafs kettles they made about half a bufhel of falt. I fuppofe this lick was about thirty or forty miles from the aforefaid town, and fomewhere between the Mufkingum, Ohio and Sciota. About the lick was clear, open woods, and thin white-oak land, and at that time there were large roads leading to the lick, like waggon roads. We moved from this lick about fix or feven miles, and encamped on a creek.

Though the Indians had given me a gun, I had not yet been admitted to go out from the camp to hunt. At this place Mohawk Solomon afked me to go out with him to hunt, which I readily agreed to. After fome time we came upon fome fresh buffaloe tracks. I had observed before this that the Indians were upon their guard, and afraid of an enemy; for, until now they and the fouthern nations had been at war. As we were fol-

lowing the buffaloe tracks, Solomon feemed to be upon his guard, went very flow, and would frequently fland and liften, and appeared to be in fufpenfe. We came to where the tracks were very plain in the fand, and I faid it is furely buffaloe tracks; he faid hu/h, you know nothing, may be buffaloe tracks, may be Catawba. He went very cautious until we found fome fresh buffaloe dung: he then fmiled and faid Catawba can not make fo. He then ftopped and told me an odd ftory about the Catawbas. He faid that formerly the Catawbas came near one of their hunting camps, and at fome diftance from the camp lay in ambufh, and in order to decoy them out, fent two or three Catawbas in the night, paft their camp, with buffaloe hoofs fixed on their feet, fo as to make artificial tracks. In the morning those in the camp followed after thefe tracks, thinking they were Buffaloe, until they were fired on by the Catawbas, and feveral of them killed; the others fled, collected a party and purfued the Catawbas; but they, in their fubtilty brought with them rattle-fnake poifon, which they had collected from the bladder that lieth at the root of the fnakes' teeth; this they had corked up in a fhort piece of cane-ftalk; they had alfo brought with them fmall cane or reed, about the fize of a rye ftraw, which they made fharp at the end like a pen, and dipped them in this poifon, and fluck them in the ground among the grafs, along their own tracks, in fuch a polition that they might flick into the legs of the purfuers, which answered

the defign; and as the Catawbas had runners behind to watch the motions of the purfuers, when they found that a number of them were lame, being artificially fnake bit, and that they were all turning back, the Catawbas turned upon the purfuers, and defeated them, and killed and fcalped all those that were lame.—When Solomon had finished this story, and found that I understood him, concluded by faying, you don't know, Catawba velly bad Indian, Catawba all one Devil Catawba.

Some time after this, I was told to take the dogs with me and go down the creek, perhaps I might kill a turkey; it being in the afternoon, I was alfo told not to go far from the creek, and to come up the creek again to the camp, and to take care not to get loft. When I had gone fome diftance down the creek I came upon fresh buffaloe tracks, and as I had a number of dogs with me to ftop the buffaloe, I concluded I would follow after and kill one; and as the grafs and weeds were rank, I could readily follow the track. A little before fundown, I defpaired of coming up with them : I was then thinking how I might get to camp before night; I concluded as the buffaloe had made feveral turns, if I took the track back to the creek, it would be dark before I could get to camp; therefore I thought I would take a near way through the hills, and ftrike the creek a little below the camp; but as it was cloudy weather, and I a very young woodfman, I could find neither creek or camp. When night came on I fired

my gun feveral times, and hallooed, but could have no anfwer. The next morning early, the Indians were out after me, and as I had with me ten or a dozen dogs, and the grafs and weeds rank, they could readily follow my track. When they came up with me, they appeared to be in a very good humor. I afked Solomon if he thought I was running away, he faid *no no*, *you go too much clooked*. On my return to camp they took my gun from me, and for this rafh ftep I was reduced to a bow and arrows, for near two years. We were out on this tour about fix weeks.

This country is generally hilly, though intermixed with confiderable quantities of rich upland, and fome good bottoms.

When we returned to the town, Pluggy and his party had arrived, and brought with them a confiderable number of fcalps and prifoners from the South Branch of Potomack: they alfo brought with them an Englifh Bible, which they gave to a Dutch woman who was a prifoner; but as fhe could not read Englifh, fhe made a prefent of it to me, which was very acceptable.

I remaind in this town until fome time in October, when my adopted brother called Tontileaugo, who had married a Wiandot fquaw, took me with him to Lake Erie. We proceeded up the weft branch of Muskingum, and for fome distance up the river the land was hilly but intermixed with large bodies of tolerable rich upland, and excellent bottoms. We proceeded on, to

25

the head waters of the weft branch of Muſkingum. On the head waters of this branch, and from thence to the waters of Canefadooharie, there is a large body of rich, well lying land—the timber is aſh, walnut, ſugar-tree, buckeye, honey-locuſt and cherry, intermixed with ſome oak, hickory, &c.—This tour was at the time that the black-haws were ripe, and we were ſeldom out of ſight of them : they were common here both in the bottoms and upland.

On this route we had no horfes with us, and when we flarted from the town, all the pack I carried was a pouch, containing my books, a little dried venifon, and my blanket. I had then no gun, but Tontileaugo who was a firft rate hunter, carried a rifle gun, and every day killed deer, racoons or bears. We left the meat, excepting a little for prefent ufe, and carried the fkins with us until we encamped, and then ftretched them with elm bark, in a frame made with poles fluck in the ground and tied together with lynn or elm bark; and when the fkins were dried by the fire, we packed them up, and carried them with us the next day.

As Tontileaugo could not fpeak English, I had to make use of all the Caughnewaga I had learned even to talk very imperfectly with him: but I found I learned to talk Indian faster this way, than when I had those with me who could speak English.

As we proceeded down the Canefadooharie waters, our packs encreafed by the fkins that were daily killed,

and became fo very heavy that we could not march more than eight or ten miles per day. We came to Lake Erie about fix miles weft of the mouth of Canefadooharie. As the wind was very high the evening we came to the Lake, I was furprized to hear the roaring of the water, and fee the high waves that dashed against the fhore, like the Ocean. We encamped on a run near the lake; and as the wind fell that night, the next morning the lake was only in a moderate motion, and we marched on the fand along the fide of the water, frequently refting ourfelves, as we were heavy laden. I faw on the ftrand a number of large fish, that had been left in flat or hollow places; as the wind fell and the waves abated, they were left without water, or only a fmall quantity; and numbers of Bald and Grey Eagles, &c. were along the fhore devouring them.

Some time in the afternoon we came to a large camp of Wiandots, at the mouth of Canefadooharie, where Tontileaugo's wife was. Here we were kindly received: they gave us a kind of rough, brown potatoes, which grew fpontaneoufly and is called by the Caughnewagas *ohnenata*. Thefe potatoes peeled and dipped in racoon's fat, tafte nearly like our fweet-potatoes. They alfo gave us what they call *caneheanta*, which is a kind of hominy, made of green corn, dried, and beans mixed together.

From the head waters of Canefadooharie to this place, the land is generally good; chiefly first or fecond rate,

and, comparatively, little or no third rate. The only refuse is fome fwamps, that appear to be too wet for ufe, yet I apprehend that a number of them, if drained, would make excellent meadows. The timber is blackoak, walnut, hickory, cherry, black-ash, white-ash, waterafh, buckeye, black-locuft, honey-locuft, fugar-tree, and elm: there is alfo fome land, though, comparatively, but finall, where the timber is chiefly white-oak or beachthis may be called third rate. In the bottoms, and alfo many places in the upland, there is a large quantity of wild apple, plumb, and red and black-haw trees. It appeared to be well watered, and a plenty of meadow ground, intermixed with upland, but no large prairies or glades, that I faw, or heard of. In this route, deer, bear, turkeys, and racoons, appeared plenty, but no buffaloe, and very little fign of elks.

We continued our camp at the mouth of Canefadooharie for fome time, where we killed fome deer, and a great many racoons; the racoons here were remarkably large and fat.—At length we all embarked in a large birch bark canoe. This veffel was about four feet wide, and three feet deep, and about five and thirty feet long: and tho it could carry a heavy burden, it was fo artfully and curioufly conftructed that four men could cary it feveral miles, or from one landing place to another, or from the waters of the Lake to the waters of the Ohio.—We proceeded up Canefadooharie a few miles and went on fhore to hunt; but to my great

furprife they carried the veffel that we all came in up the bank, and inverted it or turned the bottom up, and converted it to a dwelling houfe, and kindled a fire before us to warm ourfelves by and cook. With our baggage and ourfelves in this houfe we were very much crouded, yet our little houfe turned off the rain very well.

We kept moving and hunting up this river until we came to the falls; here we remained fome weeks, and killed a number of deer, feveral bears, and a great many racoons. From the mouth of this river to the falls is about five and twenty miles. On our paffage up I was not much out from the river, but what I faw was good land, and not hilly.

About the falls is thin chefnut land, which is almost the only chefnut timber I ever faw in this country.

While we remained here, I left my pouch with my books in camp, wrapt up in my blanket, and went out to hunt chefnuts. On my return to camp my books were miffing. I enquired after them, and afked the Indians if they knew where they were; they told me that they fuppofed the puppies had carried them off. I did not believe them; but thought they were difpleafed at my poring over my books, and concluded that they had deftroyed them, or put them out of my way.

After this I was again out after nuts, and on my return beheld a new erection, which were two white oak faplings, that were forked about twelve feet high, and

ftood about fifteen feet apart. They had cut thefe faplings at the forks and laid a ftrong pole acrofs which appeared in the form of a gallows, and the pofts they had fhaved very fmooth and painted in places with vermilion. I could not conceive the ufe of this piece of work, and at length concluded it was a gallows, I thought that I had difpleafed them by reading my books, and that they were about puting me to death.— The next morning I obferved them bringing their fkins all to this place and hanging them over this pole, fo as to preferve them from being injured by the weather, this removed my fears. They alfo buried their large canoe in the ground, which is the way they took to preferve this fort of a canoe in the winter feafon.

As we had at this time no horfes, every one got a pack on his back, and we fleered an eaft courfe about twelve miles, and encamped. The next morning we proceeded on the fame courfe about ten miles to a large creek that empties into Lake Erie betwixt Canefadooharie, and Cayahaga. Here they made their winter cabbin, in the following form. They cut logs about fifteen feet long, and laid thefe logs upon each other, and drove pofts in the ground at each end to keep them together; the pofts they tied together at the top with bark, and by this means raifed a wall fifteen feet long, and about four feet high, and in the fame manner they raifed another wall oppofite to this, at about twelve feet diftance; then they drove forks in the ground in the

centre of each end, and laid a ftrong pole from end to end on thefe forks; and from thefe walls to the poles, they fet up poles inftead of rafters, and on thefe they tied fmall poles in place of laths; and a cover was made of lynn bark which will run even in the winter feafon.

As every tree will not run, they examine the tree firft, by trying it near the ground, and when they find it will do, they fall the tree and raife the bark with the tomahawk, near the top of the tree about five or fix inches broad, then put the tomahawk handle under this bark, and pull it along down to the butt of the tree; fo that fome times one piece of bark will be thirty feet long; this bark they cut at fuitable lengths in order to cover the hut.

At the end of these walls they fet up split timber, fo that they had timber all round, excepting a door at each end. At the top, in place of a chimney, they left an open place, and for bedding they laid down the aforefaid kind of bark, on which they spread bear skins. From end to end of this hut along the middle there were fires, which the squaws made of dry split wood, and the holes or open places that appeared, the squaws stopped with moss, which they collected from old logs; and at the door they hung a bear skin; and notwithstanding the winters are hard here, our lodging was much better than what I expected.

It was fome time in December when we finished this winter cabin; but when we had got into this compara-

tively fine lodging, another difficulty arofe, we had nothing to eat. While I was travelling with Tontileaugo, as was before mentioned, and had plenty of fat venifon, bears meat and racoons, I then thought it was hard living without bread or Salt; but now I began to conclude that if I had anything that would banifh pinching hunger, and keep foul and body together I would be content.

While the hunters were all out, exerting themfelves to the utmoft of their ability, the fquaws and boys (in which clafs I was) were fcattered out in the bottoms, hunting red-haws, black-haws and hickory-nuts. As it was too late in the year, we did not fucceed in gathering haws, but we had tolerable fuccefs in fcratching up hickory-nuts from under a light fnow, which we carried with us left the hunters fhould not fucceed. After our return the hunters came in, who had killed only two fmall turkeys, which were but little among eight hunters and thirteen fquaws, boys and children;—but they were divided with the greateft equity and juffice—every one got their equal fhare.

The next day the hunters turned out again, and killed one deer and three bears.

One of the bears was very large and remarkably fat. The hunters carried in meat fufficient to give us all a hearty fupper and breakfaft.

The fquaws and all that could carry turned out to bring in meat, every one had their fhare affigned them, and my load was among the leaft; yet, not being accus-

tomed to carrying in this way, I got exceeding weary, and told them that my load was too heavy, I muft leave part of it and come for it again. They made a halt and only laughed at me, and took part of my load and added it to a young fquaw's, who had as much before as I carried.

This kind of reproof had a great tendency to excite me to exert myfelf in carrying without complaining, than if they had whipped me for lazinefs. After this the hunters held a council and concluded that they muft have horfes to carry their loads; and that they would go to war even in this inclement feafon, in order to bring in horfes.

Tontileaugo wifhed to be one of those who should go to war; but the votes went against him, as he was one of our best hunters; it was thought necessary to to leave him at this winter camp to provide for the squaws and children; it was agreed upon that Tontileaugo and three others should stay and hunt, and the other four go to war.

They then began to go through their common ceremony. They fung their war fongs danced their war dances &c. And when they were equipped they went off finging their marching fongs and firing their guns. Our camp appeared to be rejoicing; but I was grieved to think that fome innocent perfons would be murdered not thinking of danger.

After the departure of these warriors we had hard times, and tho we were not altogether out of provisions we were brought to short allowance. At length Tonti-

33

leaugo had confiderable fuccefs; and we had meat brought into camp sufficient to last ten days. Tontileaugo then took me with him in order to encamp fome diftance from this winter cabbin, to try his luck there. We carried no provision with us, he faid we would leave what was there for the fquaws and children, and that we could shift for ourselves. We steered about a fouth courfe up the waters of this creek, and encamped about ten or twelve miles from the winter cabbin. As it was still cold weather and a crust upon the snow, which made a noife as we walked and alarmed the deer, we could kill nothing, and confequently went to fleep without fupper. The only chance we had under thefe circumftances, was to hunt bear holes; as the bears about Christmas search out a winter lodging place, where they lie about three or four months without eating or drinking. This may appear to fome incredible; but it is now well known to be the cafe, by those who live in the remote western parts of North America.

The next morning early we proceeded on, and when we found a tree fcratched by the bears climbing up, and the hole in the tree fufficiently large for the reception of the bear; we then fell a fapling or fmall tree againft or near the hole; and it was my bufinefs to climb up and drive out the bear, while Tontileaugo flood ready with his gun and bow. We went on in this manner until evening, without fuccefs; at length we found a large elm fcratched, and a hole in it about forty feet up; but no tree nigh fuitable to lodge againft the hole. Tonti-

leaugo got a long pole and fome dry rotten wood which he tied in bunches, with bark, and as there was a tree that grew near the elm, and extended up near the hole; but leaned the wrong way; fo that we could not lodge it to advantage; but to remedy this inconvenience, he climed up this tree and carried with him his rotten wood, fire and pole. The rotten wood he tied to his belt, and to one end of the pole he tied a hook, and a piece of rotten wood which he fet fire to, as it would retain fire almost like spunk; and reached this hook from limb to limb as he went up; when he got up, with this pole he put dry wood on fire into the hole, after he put in the fire he heard the bear fnuff and he came fpeedily down, took his gun in his hand and waited until the bear would come out; but it was fome time before it appeared, and when it did appear he attempted taking fight with his rifle, but it being then too dark to fee the fights, he fet it down by a tree, and inftantly bent his bow, took hold of an arrow, and shot the bear a little behind the shoulder; I was preparing also to fhoot an arrow, but he called to me to ftop, there was no occafion; and with that the bear fell to the ground.

Being very hungry we kindled a fire, opened the bear, took out the liver, and wrapped fome of the caul fat round and put it on a wooden fpit which we fluck in the ground by the fire to roaft, we then fkinned the bear, got on our kettle, and had both roaft and boiled, and alfo fauce to our meat, which appeared to me to be

35

delicate fare. After I was fully fatisfied I went to fleep, Tontileaugo awoke me, faying, come eat hearty, we have got meat plenty now.

The next morning we cut down a lynn tree, peeled bark and made a fnug little fhelter, facing the fouth eaft, with a large log betwixt us and the north weft; we made a good fire before us, and fcaffolded up our meat at one fide.—When we had finifhed our camp we went out to hunt, fearched two trees for bears, but to no purpofe. As the fnow thawed a little in the afternoon Tontileaugo killed a deer, which we carried with us to camp.

The next day we turned out to hunt, and near the camp we found a tree well scratched; but the hole was above forty feet high, and no tree that we could lodge against the hole; but finding that it was very hollow, we concluded that we would cut down the tree with our tomahawks, which kept us working a confiderable part of the day. When the tree fell we ran up, Tontileaugo with his gun and bow, and I with my bow ready bent. Tontileaugo fhot the bear through with his rifle, a little behind the fhoulders, I alfo fhot, but too far back; and not being then much accustomed to the business, my arrow penetrated only a few inches thro the skin. Having killed an old fhe bear and three cubs, we hawled her on the fnow to the camp, and only had time afterwards, to get wood, make a fire, cook &c. before dark.

Early the next morning we went to bufinefs, fearched feveral trees, but found no bears. On our way home we took three racoons out of a hollow elm, not far from the ground.

We remained here about two weeks, and in this time killed four bears, three deer, feveral turkeys, and a number of racoons. We packed up as much meat as we could carry, and returned to our winter cabin. On our arrival, there was great joy, as they were all in a flarving condition,—the three hunters that we had left having killed but very little.—All that could carry a pack repaired to our camp to bring in meat.

Some time in February the four warriors returned, who had taken two fcalps, and fix horfes from the frontiers, of Pennfylvania. The hunters could then fcatter out a confiderable diffance from the winter cabin, and encamp, kill meat and pack it in upon horfes; fo that we commonly after this had plenty of provision.

In this month we began to make fugar. As fome of the elm bark will ftrip at this feafon, the fquaws after finding a tree that would do, cut it down, and with a crooked flick broad and fharp at the end, took the bark off the tree, and of this bark, made veffels in a curious manner, that would hold about two gallons each: they made above one hundred of thefe kind of veffels. In the fugar-tree they cut a notch, flooping down, and at the end of the notch, fluck in a tomahawk; in the place where they fluck the tomahawk, they drove a long chip,

in order to carry the water out from the tree, and under this they fet their veffel, to receive it. As fugar trees were plenty and large here, they feldom or never notched a tree that was not two or three feet over. They alfo made bark veffels for carrying the water, that would hold about four gallons each. They had two brafs kettles, that held about fifteen gallons each, and other fmaller kettles in which they boiled the water. But as they could not at all times boil away the water as faft as it was collected, they made veffels of bark, that would hold about one hundred gallons each, for retaining the water; and tho' the fugar trees did not run every day, they had always a fufficient quantity of water to keep them boiling during the whole fugar feafon.

The way that we commonly used our fugar while encamped, was by putting it in bears fat until the fat was almost as fweet as the fugar itself, and in this we dipped our roafted venifon. About this time fome of the Indian lads and myself, were employed in making and attending traps for catching racoons, foxes, wild cats, &c.

As the racoon is a kind of water animal, that frequents the runs, or fmall water-courfes, almost the whole night, we made our traps on the runs, by laying one fmall fapling on another, and driving in posts to keep them from rolling. The upper fapling we raifed about eighteen inches, and fet fo, that on the racoons touching a ftring, or fmall piece of bark, the fapling would fall and kill it; and left the racoon should pass

by, we laid brush on both fides of the run, only leaving the channel open.

The fox traps we made nearly in the fame manner, at the end of a hollow log, or oppofite to a hole at the root of a hollow tree, and put venifon on a flick for bait: we had it fo fet that when the fox took hold of the meat, the trap fell. While the fquaws were employed in making fugar, the boys and men were engaged in hunting and trapping.

About the latter end of March we began to prepare for moving into town, in order to plant corn: the fquaws were then frying the laft of their bears fat, and making veffels to hold it: the veffels were made of deer fkins, which were fkinned by pulling the fkin off the neck, without ripping. After they had taken off the hair, they gathered it in fmall plaits round the neck and with a ftring drew it together like a purfe: in the centre a pin was put, below which they tied a ftring, and while it was wet they blew it up like a bladder, and let it remain in this manner, until it was dry, when it appeared nearly in the fhape of a fugar loaf, but more rounding at the lower end. One of thefe veffels would hold about four or five gallons; in thefe veffels it was they carried their bears oil.

When all things were ready we moved back to the falls of Canefadooharie. In this route the land is chiefly firft and fecond rate, but too much meadow ground, in proportion to the up land. The timber is

39

white-afh, elm, black-oak, cherry, buckeye, fugar-tree, lynn, mulberry, beech, white-oak, hickory, wild appletree, red-haw, black-haw, and fpicewood bufhes. There is in fome places, fpots of beech timber, which fpots may be called third rate land. Buckeye, fugar-tree, and fpicewood, are common in the woods here. There is in fome places, large fwamps too wet for any ufe.

On our arrival at the falls, (as we had brought with us on horfe back, about two hundred weight of fugar, a large quantity of bears oil, skins, &c.) the canoe we had buried was not fufficient to carry all; therefore we were obliged to make another one of elm bark. While we lay here a young Wiandot found my books: on this they collected together; I was a little way from the camp, and faw the collection, but did not know what it meant. They called me by my Indian name, which was Scoouwa, repeatedly. I ran to fee what was the matter, they shewed me my books, and faid they were glad they had been found, for they knew I was grieved at the lofs of them, and that they now rejoiced with me becaufe they were found. As I could then fpeak fome Indian, efpecially Caughnewaga (for both that and the Wiandot tongue were fpoken in this camp) I told them that I thanked them for the kindnefs they had always shewn to me, and also for finding my books. They afked if the books were damaged? I told them not much. They then shewed how they lay,

which was in the beft manner to turn off the water. In a deer-fkin pouch they lay all winter. The print was not much injured, though the binding was.—This was the firft time that I felt my heart warm towards the Indians. Though they had been exceeding kind to me, I ftill before detefted them, on account of the barbarity I beheld after Braddock's defeat. Neither had I ever before pretended kindnefs, or expressed myelf in a friendly manner; but I began now to excuse the Indians on account of their want of information.

When we were ready to embark, Tontileaugo would not go to town, but go up the river and take a hunt. He asked me if I choosed to go with him? I told him I did. We then got fome fugar, bears oil bottled up in a bear's gut, and fome dry venifon, which we packed up, and went up Canefadooharie, about thirty miles, and encamped. At this time I did not know either the day of the week or the month; but I fupposed it to be about the first of April. We had confiderable fuccefs in our businefs. We also found fome stray horfes, or a horfe, mare, and a young colt; and though they had run in the woods all winter, they were in exceeding good order. There is plenty of grafs here all winter, under the fnow, and horfes accuftomed to the woods can work it out .- Thefe horfes had run in the woods until they were very wild.

Tontileaugo one night concluded that we must run them down. I told him I thought we could not ac-

complifh it. He faid he had run down bears, buffaloes and elks: and in the great plains, with only a fmall fnow on the ground, he had run down a deer; and he thought that in one whole day, he could tire, or run down any four footed animal except a wolf. I told him that though a deer was the fwifteft animal to run a fhort diftance, yet it would tire fooner than a horfe. He faid he would at all events try the experiment. He had heard the Wiandots fay, that I could run well, and now he would fee whether I could or not. I told him that I never had run all day, and of courfe was not accuftomed to that way of running. I never had run with the Wiandots more than feven or eight miles at one time. He faid that was nothing, we muft either catch thefe horfes or run all day.

In the morning early we left camp, and about funrife we flarted after them, ftripped naked excepting breechclouts and mockafons. About ten o'clock I loft fight of both Tontileaugo and the horfes, and did not fee them again until about three o'clock in the afternoon. As the horfes run all day, in about three or four miles fquare, at length they paffed where I was, and I fell in clofe after them. As I then had a long reft, I endeavored to keep ahead of Tontileaugo, and after fome time I could hear him after me calling *chakoh*, *chakoanaugh*, which fignifies, pull away or do your beft. We purfued on, and after fome time Tontileaugo paffed me, and about an hour before fundown, we defpaired of

4I

catching thefe horfes and returned to camp where we had left our clothes.

I reminded Tontileaugo of what I had told him; he replied he did not know what horfes could do. They are wonderful ftrong to run; but withal we made them very tired. Tontileaugo then concluded, he would do as the Indians did with wild horfes, when out at war: which is to fhoot them through the neck under the mane, and above the bone, which will caufe them to fall and lie until they can halter them, and then they recover again. This he attempted to do; but as the mare was very wild, he could not get fufficiently nigh to fhoot her in the proper place; however he fhot, the ball paffed too low, and killed her. As the horfe and colt ftayed at this place, we caught the horfe, and took him and the colt with us to camp.

We ftayed at this camp about two weeks, and killed a number of bears, racoons, and fome beavers. We made a canoe of elm bark, and Tontileaugo embarked in it. He arrived at the falls that night; whilft I, mounted on horfe back, with a bear fkin faddle, and bark ftirrups, proceeded by land to the falls: I came there the next morning, and we carried our canoe and loading paft the falls.

The river is very rapid for fome diffance above the falls, which are about twelve or fifteen feet nearly perpendicular. This river, called Canefadooharie, interlocks with the Weft branch of Muſkingum, runs nearly

43

a north courfe, and empties into the fouth fide of Lake Erie, about eighty miles east from Sandusky, or betwixt Sandusky and Cayahaga.

On this laft route the land is nearly the fame, as that laft defcribed, only there is not fo much fwampy or wet ground.

We again proceeded towards the lake, I on horfe back, and Tontileaugo by water. Here the land is generally good, but I found fome difficulty in getting round fwamps and ponds. When we came to the lake I proceeded along the ftrand, and Tontileaugo near the fhore, fometimes paddling and fometimes polling his canoe along.

After fome time the wind arofe, and he went into the mouth of a fmall creek and encamped. Here we ftaid feveral days on account of high wind, which raifed the lake in great billows. While we were here Tontileaugo went out to hunt, and when he was gone a Wiandot came to our camp; I gave him a fhoulder of venifon which I had by the fire well roafted, and he received it gladly, told me he was hungry, and thanked me for my kindnefs. When Tontileaugo came home, I told him that a Wiandot had been at camp, and that I gave him a fhoulder of roafted venifon: he faid that was very well, and I fuppofe you gave him alfo fugar and bears oil, to eat with his venifon. I told him I did not; as the fugar and bears oil was down in the canoe I did not 44

Dutchman.\* Do you not know that when ftrangers come to our camp, we ought always to give them the beft that we have? I acknowledged that I was wrong. He faid that he could excufe this, as I was but young; but I muft learn to behave like a warrior, and do great things, and never be found in any fuch little actions.

The lake being again calm,<sup>†</sup> we proceeded, and arrived fafe at Sunyendeand, which was a Wiandot town, that lay upon a fmall creek which empties into the Little Lake below the mouth of Sanduíky.

The town was about eighty rood above the mouth of the creek, on the fouth fide of a large plain, on which timber grew, and nothing more but grafs or nettles. In fome places there were large flats, where nothing but grafs grew, about three feet high when grown, and in other places nothing but nettles, very rank, where the foil is extremely rich and loofe—here they planted corn. In this town there were alfo French traders, who purchafed our fkins and fur, and we all got new clothes, paint, tobacco, &c.

After I had got my new clothes, and my head done off like a red-headed wood-pecker, I, in company with a number of young Indians, went down to the corn field,

<sup>\*</sup> The Dutch he called Skoharehaugo, which took its derivation from a Dutch fettlement called Skoharey.

<sup>†</sup> The lake when calm, appears to be of a sky blue colour; though when listed in a veffel, it is like other clear water.

to fee the fquaws at work. When we came there, they afked me to take a hoe, which I did, and hoed for fome time. The fquaws applauded me as a good hand at the bufinefs; but when I returned to the town, the old men hearing of what I had done, chid me, and faid that I was adopted in the place of a great man, and muft not hoe corn like a fquaw. They never had occafion to reprove me for any thing like this again; as I never was extremely fond of work, I readily complied with their orders.

As the Indians on their return from the winter hunt, bring in with them large quantities of bears oil, fugar, dried venifon, &c., at this time they have plenty, and do not fpare eating or giving—thus they make way with their provifion as quick as poffible. They have no fuch thing as regular meals, breakfaft, dinner or fupper; but if any one, even the town folks, would go to the fame houfe, feveral times in one day, he would be invited to eat of the beft—and with them it is bad manners to refufe to eat when it is offered. If they will not eat it is interpreted as a fymptom of difpleafure, or that the perfons refufing to eat were angry with thofe who invited them.

At this time homony, plentifully mixed with bears oil and fugar; or dried venifon, bears oil and fugar, is what they offer to every one who comes in any time of the day; and fo they go on until their fugar, bear's oil and venifon is all gone, and then they have to eat

homony by itfelf, without bread, falt, or any thing elfe; yet, still they invite every one that comes in, to eat whilft they have any thing to give. It is thought a fhame, not to invite people to eat, while they have any thing; but, if they can in truth, only fay we have got nothing to eat, this is accepted as an honorable apology. All the hunters and warriors continued in town about fix weeks after we came in: they fpent this time in painting, going from houfe to houfe, eating, fmoking, and playing at a game refembling dice, or huftle-cap. They put a number of plumb-ftones in a fmall bowl; one fide of each ftone is black, and the other white; they then shake or hustle the bowl, calling, hits, hits, hits, honesey, honesey, rago, rago; which fignifies calling for white or black, or what they wish to turn up; they then turn the bowl, and count the whites and blacks. Some were beating their kind of drum, and finging; others were employed in playing on a fort of flute, made of hollow cane; and others playing on the jewf-harp. Some part of this time was also taken up in attending the council house, where the chiefs, and as many others as chofe, attended; and at night they were frequently employed in finging and dancing. Towards the laft of this time, which was in June, 1756, they were all engaged in preparing to go to war against the frontiers of Virginia: when they were equipped, they went through their ceremonies, fung their war fongs, &c. They all marched off, from fifteen to fixty years of age; and

fome boys only twelve years old, were equipped with their bows and arrows, and went to war; fo that none were left in town but fquaws and children, except myfelf, one very old man, and another about fifty years of age, who was lame.

The Indians were then in great hopes that they would drive all the Virginians over the lake, which is all the name they know for the fea. They had fome caufe for this hope, becaufe at this time, the Americans were altogether unacquainted with war of any kind, and confequently very unfit to ftand their hand with fuch fubtil enemies as the Indians were. The two old Indians afked me if I did not think that the Indians and French would fubdue all America, except New England, which they faid they had tried in old times. I told them I thought not: they faid they had already drove them all out of the mountains, and had chiefly laid wafte the great valley betwixt the North and South mountain, from Potomack to James River, which is a confiderable part of the best land in Virginia, Maryland, and Pennfylvania, and that the white people appeared to them like fools; they could neither guard against furprise, run, or fight. These they faid were their reasons for faying that they would fubdue the whites. They afked me to offer my reafons for my opinion, and told me to fpeak my mind freely. I told them that the white people to the Eaft were very numerous, like the trees, and though they appeared to them to be fools, as they were not

acquainted with their way of war, yet they were not fools; therefore after fome time they will learn your mode of war, and turn upon you, or at leaft defend themfelves. I found that the old men themfelves did not believe they could conquer America, yet they were willing to propagate the idea, in order to encourage the young men to go to war.

When the warriors left this town we had neither meat, fugar, or bears oil, left. All that we had then to live on was corn pounded into coarfe meal or fmall homony-this they boiled in water, which appeared like well-thickened foup, without falt or any thing elfe. For fome time, we had plenty of this kind of homony; at length we were brought to very fhort allowance, and as the warriors did not return as foon as they expected, we were in a ftarving condition, and but one gun in the town, and very little amunition. The old lame Wiandot concluded that he would go a hunting in a canoe, and take me with him, and try to kill deer in the water, as it was then watering time. We went up Sandusky a few miles, then turned up a creek and encamped. We had lights prepared, as we were to hunt in the night, and alfo a piece of bark and fome bufhes fet up in the canoe, in order to conceal ourfelves from the deer. A little boy that was with us, held the light, I worked the canoe, and the old man, who had his gun loaded with large fhot, when we came near the deer, fired, and in this manner killed three deer, in part of

49

one night. We went to our fire, ate heartily, and in the morning returned to town, in order to relieve the hungry and diffreffed.

When we came to town, the children were crying bitterly on account of pinching hunger. We delivered what we had taken, and though it was but little among fo many, it was divided according to the ftricteft rules of justice. We immediately fet out for another hunt, but before we returned a part of the warriors had come in, and brought with them on horfe-back, a quantity of meat. These warriors had divided into different parties, and all ftruck at different places in Augusta county. They brought in with them a confiderable number of fcalps, prifoners, horfes, and other plunder. One of the parties brought in with them, one Arthur Campbell, that is now Col. Campbell, who lives on Holfton River, near the Royal-Oak. As the Wiandots at Sunyendeand, and those at Detroit were connected, Mr. Campbell was taken to Detroit; but he remained fome time with me in this town : his company was very agreeable, and I was forry when he left me. During his ftay at Sunyendeand he borrowed my Bible, and made fome pertinent remarks on what he had read. One passage was where it is faid, "It is good for a man that he bear the yoke in his youth." He faid we ought to be refigned to the will of Providence, as we were now bearing the yoke, in our youth. Mr. Campbell appeared to be then about fixteen or feventeen years of age.

There was a number of prifoners brought in by thefe parties, and when they were to run the gauntlet, I went and told them how they were to act. One John Savage was brought in, a middle-aged man, or about forty years old. He was to run the gauntlet. I told him what he had to do; and after this I fell into one of the ranks with the Indians, fhouting and yelling like them; and as they were not very fevere on him, as he paffed me, I hit him with a piece of pumpkin—which pleafed the Indians much, but hurt my feelings.

About the time that thefe warriors came in, the green corn was beginning to be of ufe; fo that we had either green corn or venifon, and fometimes both—which was comparatively high living. When we could have plenty of green corn, or roafting-ears, the hunters became lazy, and fpent their time as already mentioned, in finging and dancing &c. They appeared to be fulfilling the fcriptures beyond thofe who profefs to believe them, in that of taking no thought of to-morrow: and alfo in living in love, peace and friendfhip together, without difputes. In this refpect they fhame thofe who profefs Chriftianity.

In this manner we lived, until October, then the geefe, fwans, ducks, cranes, &c. came from the north, and alighted on this little Lake, without number or innumerable. Sunyendeand is a remarkable place for fifh, in the fpring, and fowl both in the fall and fpring.

As our hunters were now tired with indolence, and

fond of their own kind of exercife, they all turned out to fowling, and in this could fcarce mifs of fuccefs; fo that we had now plenty of homony and the beft of fowls; and fometimes as a rarity we had a little bread, which was made of Indian corn meal, pounded in a homony-block, mixed with boiled beans, and baked in cakes under the afhes.

This, with us was called good living, though not equal to our fat, roafted and boiled venifon, when we went to the woods in the fall; or bears meat and beaver in the winter; or fugar, bears oil, and dry venifon in the fpring.

Some time in October, another adopted brother, older than Tontileaugo, came to pay us a vifit at Sunyendeand, and he asked me to take a hunt with him on Cayahaga. As they always used me as a free man, and gave me the liberty of choosing, I told him that I was attached to Tontileaugo-had never feen him before, and therefore, asked sometime to confider of this. He told me that the party he was going with would not be along, or at the mouth of this little lake, in lefs than fix days, and I could in this time be acquainted with him, and judge for myself. I confulted with Tontileaugo on this occafion, and he told me that our old brother Tecaughretanego, (which was his name) was a chief, and a better man than he was; and if I went with him I might expect to be well used, but he faid I might do as I pleafed; and if I staid he would use me as he had done. I told

him that he had acted in every refpect as a brother to me; yet I was much pleafed with my old brother's conduct and converfation; and as he was going to a part of the country I had never been in, I wifhed to go with him—he faid that he was perfectly willing.

I then went with Tecaughretanego to the mouth of the little lake, where he met with the company he intended going with, which was composed of Caughnewagas, and Ottawas. Here I was introduced to a Caughnewaga fifter, and others I had never before feen. My fifter's name was Mary, which they pronounced Maully. I asked Tecaughretanego how it came that she had an English name; he faid that he did not know that it was an English name; but it was the name the prieft gave her when fhe was baptized, which he faid was the name of the mother of Jefus. He faid there were a great many of the Caughnewagas and Wiandots, that were a kind of half Roman Catholics: but as for himfelf, he faid, that the priest and him could not agree; as they held notions that contradicted both fenfe and reason, and had the affurance to tell him, that the book of God, taught them these foolish absurdities: but he could not believe the great and good fpirit ever taught them any fuch nonfenfe: and therefore he concluded that the Indians' old religion was better than this new way of worshiping God.

The Ottawas have a very ufeful kind of tents which they carry with them, made of flags, plaited and flitched

together in a very artful manner, fo as to turn rain, or wind well—each mat is made fifteen feet long and about five feet broad. In order to erect this kind of tent, they cut a number of long, ftraight poles, which they drive in the ground, in form of a circle, leaning inwards; then they fpread the matts on thefe poles—beginning at the bottom and extending up, leaving only a hole in the top uncovered—and this hole anfwers the place of a chimney. They make a fire of dry, fplit wood, in the middle, and fpread down bark mats and fkins for bedding, on which they fleep in a crooked pofture, all round the fire, as the length of their beds will not admit of ftretching themfelves. In place of a door they lift up one end of a mat and creep in, and let the mat fall down behind them.

These tents are warm and dry, and tolerable clear of fmoke. Their lumber they keep under birch-bark canoes, which they carry out and turn up for a shelter, where they keep every thing from the rain. Nothing is in the tents but themselves and their bedding.

This company had four birch canoes and four tents. We were kindly received, and they gave us plenty of homony, and wild fowl, boiled and roafted. As the geefe, ducks, fwans, &c. here are well grain-fed, they were remarkably fat efpecially the green necked ducks.

The wild fowl here feed upon a kind of wild rice, that grows fpontaneoufly in the fhallow water, or wet places along the fides or in the corners of the lakes.

As the wind was high and we could not proceed on our voyage, we remained here feveral days, and killed abundance of wild fowl, and a number of racoons.

When a company of Indians are moving together on the lake, as it is at this time of the year often dangerous failing, the old men hold a council; and when they agree to embark, every one is engaged immediately in making ready, without offering one word againft the meafure, though the lake may be boifterous and horrid. One morning tho' the wind appeared to me to be as high as in days paft, and the billows raging, yet the call was given *yohoh-yohoh*, which was quickly anfwered by all—*ooh-ooh* which fignifies agreed. We were all inftantly engaged in preparing to ftart, and had confiderable difficulties in embarking.

As foon as we got into our canoes we fell to paddling with all our might, making out from the fhore. Though thefe fort of canoes ride waves beyond what could be expected, yet the water feveral times dafhed into them. When we got out about half a mile from fhore, we hoifted fail, and as it was nearly a weft wind, we then feemed to ride the waves with eafe, and went on at a rapid rate. We then all laid down our paddles, excepting one that fleered, and there was no water dafhed into our canoes, until we came near the fhore again. We failed about fixty miles that day, and encamped fome time before night.

The next day we again embarked and went on very

well for fome time; but the lake being boifterous, and the wind not fair, we were obliged to make to fhore, which we accomplifhed with hard work and fome difficulty in landing.—The next morning a council was held by the old men.

As we had this day to pass by a long precipice of rocks, on the fhore about nine miles, which rendered it impoffible for us to land, though the wind was high and the lake rough; yet, as it was fair, we were all ordered to embark. We wrought ourfelves out from the fhore and hoifted fail (what we used in place of fail cloth, were our tent mats, which answered the place very well) and went on for fome time with a fair wind, until we were opposite to the precipice, and then it turned towards the fhore, and we began to fear we fhould be caft upon the rocks. Two of the canoes were confiderably farther out from the rocks, than the canoe I was in. Those who were farthest out in the lake did not let down their fails until they had paffed the precipice; but as we were nearer the rock, we were obliged to lower our fails, and paddle with all our might. With much difficulty we cleared ourfelves of the rock and landed. As the other canoes had landed before us, there were immediately runners fent off to fee if we were all fafely landed.

This night the wind fell, and the next morning the lake was tolerably calm, and we embarked without difficulty, and paddled along near the fhore, until we came to the mouth of Cayahaga, which empties into Lake Erie on the fouth fide, betwixt Canefadooharie and Prefq' Ifle.

We turned up Cayahaga and encamped—where we ftaid and hunted for feveral days; and fo we kept moving and hunting until we came to the forks of Cayahaga.

This is a very gentle river, and but few riffles, or fwift running places, from the mouth to the forks. Deer here were tolerably plenty, large, and fat; but bear and other game fcarce. The upland is hilly and principally fecond and third rate land. The timber chiefly black-oak, white-oak, hickory, dogwood, &c. The bottoms are rich and large, and the timber is walnut, locuft, mulberry, fugar-tree, red-haw, black-haw, wild-appletrees, &c. The Weft Branch of this river interlocks with the Eaft Branch of Muſkingum; and the Eaft Branch with the Big Beaver creek, that empties into the Ohio about thirty miles below Pittſburgh.

From the forks of Cayahaga to the East Branch of Muskingum, there is a carrying place, where the Indians carry their canoes &c. from the waters of Lake Erie, into the waters of the Ohio.

From the forks I went over with fome hunters, to the Eaft Branch of Muſkingum, where they killed feveral deer, a number of beavers, and returned heavy laden, with ſkins and meat, which we carried on our backs, as we had no horfes.

The land here is chiefly fecond and third rate, and

57

the timber chiefly oak and hickory. A little above the forks, on the Eaft Branch of Cayahaga, are confiderable rapids, very rocky, for fome diftance; but no perpendicular falls.

About the first of December, 1756, we were preparing for leaving the river: we buried our canoes, and as usual hung up our skins, and every one had a pack to carry: the squaws also packed up their tents, which they carried in large rolls, that extended up above their heads; and though a great bulk, yet not heavy. We steered about a south east course and could not march over ten miles per day. At night we lodged in our stag tents, which when erected, were nearly in the stage of a sugar loaf, and about fifteen feet diameter at the ground.

In this manner we proceeded about forty miles, and wintered in thefe tents, on the waters of Beaver creek, near a little lake or large pond, which is about two miles long, and one broad, and a remarkable place for beaver.

It is a received opinion among the Indians, that the geefe turn to beavers and the fnakes to racoons; and though Tecaughretanego, who was a wife man, was not fully perfuaded that this was true; yet he feemed in fome meafure to be carried away with this whimfical notion. He faid that this pond had been always a plentiful place of beaver. Though he faid he knew them to be frequently all killed, (as he thought;) yet the next winter they would be as plenty as ever. And as the

beaver was an animal that did not travel by land, and there being no water communication, to, or from this pond—how could fuch a number of beavers get there year after year? But as this pond was alfo a confiderable place for geefe, when they came in the fall from the north, and alighted in this pond, they turned beavers, all but the feet, which remained nearly the fame.

I faid, that though there was no water communication, in, or out of this pond; yet it appeared that it was fed by fprings, as it was always clear and never ftagnated; and as a very large fpring rofe about a mile below this pond, it was likely that this fpring came from this pond. In the fall, when this fpring is comparatively low, there would be air under ground fufficient for the beavers to breathe in, with their heads above water, for they can not live long under water, and fo they might have a fubterraneous paffage by water into this pond.—Tecaughretanego, granted that it might be fo.

About the fides of this pond there grew great abundance of cranberries, which the Indians gathered up on the ice, when the pond was frozen over. Thefe berries were about as large as rifle bullets—of a bright red colour—an agreeable four, though rather too four of themfelves; but when mixed with fugar, had a very agreeable tafte.

In converfation with Tecaughretanego, I happened to be talking of the beavers' catching fifh. He afked me why I thought that the beaver caught fifh? I told him

that I had read of the beaver making dams for the conveniency of fifhing. He laughed, and made game of me and my book. He faid the man that wrote that book knew nothing about the beaver. The beaver never did eat flefh of any kind; but lived on the bark of trees, roots, and other vegetables.

In order to know certainly how this was, when we killed a beaver I carefully examined the inteffines, but found no appearance of fifh; I afterwards made an experiment on a pet beaver which we had, and found that it would neither eat fifh or flefh; therefore I acknowledged that the book I had read was wrong.

I asked him if the beaver was an amphibious animal, or if it could live under water? He faid that the beaver was a kind of fubterraneous water animal, that lives in or near the water; but they were no more amphibious than the ducks and geefe were-which was conftantly proven to be the cafe, as all the beavers that are caught in steel traps are drowned, provided the trap be heavy enough to keep them under water. As the beaver does not eat fish, I enquired of Tecaughretanego why the beaver made fuch large dams? He faid they were of use to them in various respects-both for their fafety and food. For their fafety, as by raifing the water over the mouths of their holes, or fubterraneous lodging places, they could not be eafily found: and as the beaver feeds chiefly on the bark of trees, by raifing the water over the banks, they can cut down fapplings for

bark to feed upon without going out much upon the land: and when they are obliged to go out on land for this food they frequently are caught by the wolves. As the beaver can run upon land, but little fafter than a water tortoife, and is no fighting animal, if they are any diftance from the water they become an eafy prey to their enemies.

I asked Tecaughretanego, what was the use of the beaver's ftones, or glands, to them ;--as the fhe beaver has two pair, which is commonly called the oil ftones, and the bark ftones? He faid that as the beavers are the dumbeft of all animals, and fcarcely ever make any noife; and as they were working creatures, they made use of this smell in order to work in concert. If an old beaver was to come on the bank and rub his breech upon the ground, and raife a perfume, the others will collect from different places and go to work: this is alfo of use to them in travelling, that they may thereby fearch out and find their company. Cunning hunters finding this out, have made use of it against the beaver, in order to catch them. What is the bate which you fee them make use of, but a compound of the oil and bark ftones? By this perfume, which is only a falfe fignal, they decoy them to the trap.

Near this pond, beaver was the principal game. Before the waters froze up, we caught a great many with wooden and fleel traps: but after that, we hunted the beaver on the ice. Some places here the beavers build

large houfes to live in; and in other places they have fubterraneous lodgings in the banks. Where they lodge in the ground we have no chance of hunting them on the ice; but where they have houses we go with malls and handfpikes, and break all the hollow ice, to prevent them from getting their heads above the water under it. Then we break a hole in the houfe and they make their efcape into the water; but as they cannot live long under water, they are obliged to go to fome of those broken places to breathe, and the Indians commonly put in their hands, catch them by the hind leg, haul them on the ice and tomahawk them. Sometimes they shoot them in the head, when they raife it above the water. I asked the Indians if they were not afraid to catch the beavers with their hands? they faid no: they were not much of a biting creature; yet if they would catch them by the fore foot they would bite.

I went out with Tecaughretanego, and fome others a beaver hunting: but we did not fucceed, and on our return we faw where feveral racoons had paffed, while the fnow was foft; tho' there was now a cruft upon it, we all made a halt looking at the racoon tracks. As they faw a tree with a hole in it they told me to go and fee if they had gone in thereat; and if they had to halloo, and they would come and take them out. When I went to that tree I found they had gone paft; but I faw another the way they had went, and proceeded to

examine that, and found they had gone up it. I then began to holloo, but could have no anfwer.

As it began to fnow and blow most violently, I returned and proceeded after my company, and for fome time could fee their tracks; but the old snow being only about three inches deep, and a cruft upon it, the prefent driving fnow foon filled up the tracks. As I had only a bow, arrows, and tomahawk, with me, and no way to ftrike fire, I appeared to be in a difmal fituation-and as the air was dark with fnow, I had little more prospect of steering my course, than I would in the night. At length I came to a hollow tree, with a hole at one fide that I could go in at. I went in, and found that it was a dry place, and the hollow about three feet diameter, and high enough for me to stand in. I found that there was also a confiderable quantity of foft, dry rotten wood, around this hollow: I therefore concluded that I would lodge here; and that I would go to work, and ftop up the door of my house. I ftripped off my blanket, (which was all the clothes that I had, excepting a breech-clout, leggins, and mockafons,) and with my tomahawk, fell to chopping at the top of a fallen tree that lay near and carried wood and fet it up on end against the door, until I had it three or four feet thick, all round, excepting a hole I had left to creep in at. I had a block prepared that I could haul after me, to ftop this hole: and before I went in I put in a number of fmall flicks, that I might more

effectually ftop it on the infide. When I went in, I took my tomahawk and cut down all the dry, rotten wood I could get, and beat it fmall. With it I made a bed like a goofe-neft or hog-bed, and with the fmall fticks ftopped every hole, until my houfe was almost dark. I ftripped off my mockafons, and danced in the centre of my bed for about half an hour, in order to warm myfelf. In this time my feet and whole body were agreeably warmed. The fnow, in the mean while, had ftopped all the holes, fo that my houfe was as dark as a dungeon; though I knew it could not yet be dark out of doors. I then coiled myfelf up in my blanket, lay down in my little round bed, and had a tolerable nights lodging. When I awoke, all was dark-not the leaft glimmering of light was to be feen. Immediately I recollected that I was not to expect light in this new habitation, as there was neither door nor window in it. As I could hear the ftorm raging, and did not fuffer much cold, as I was then fituated, I concluded I would ftay in my neft until I was certain it was day. When I had reafon to conclude that it furely was day, I arofe and put on my mockafons, which I had laid under my head to keep from Freezing. I then endeavored to find the door, and had to do all by the fenfe of feeling, which took me fome time. At length I found the block, but it being heavy, and a large quantity of fnow having fallen on it, at the first attempt I did not move it. I then felt terrified-among all the hardships I had

fustained, I never knew before, what it was to be thus deprived of light. This, with the other circumstances attending it, appeared grievous. I went straightway to bed again, wrapped my blanket round me, and lay and mufed awhile, and then prayed to Almighty God to direct and protect me, as he had done heretofore. I once again attempted to move away the block, which proved fuccessful: it moved about nine inches. With this a confiderable quantity of fnow fell in from above, and I immediately received light; fo that I found a very great fnow had fallen, above what I had ever feen in one night. I then knew why I could not eafily move the block, and I was fo rejoiced at obtaining the light, that all my other difficulties feemed to vanish. Τ then turned into my cell, and returned God thanks for having once more received the light of Heaven. At length I belted my blanket about me, got my tomahawk, bow and arrows, and went out of my den.

I was now in tolerable high fpirits, tho' the fnow had fallen above three feet deep, in addition to what was on the ground before; and the only imperfect guide I had, in order to fleer my courfe to camp, was the trees; as the mofs generally grows on the north-weft fide of them, if they are flraight. I proceeded on, wading through the fnow, and about twelve o'clock (as it appeared afterwards, from that time to night, for it was yet cloudy,) I came upon the creek that our camp was on, about half a mile below the camp; and when I

65

came in fight of the camp, I found that there was great joy, by the fhouts and yelling of the boys, &c.

When I arrived, they all came round me, and received me gladly; but at this time no queftions were asked, and I was taken into a tent, where they gave me plenty of fat beaver meat, and then asked me to fmoke. When I had done, Tecaughretanego defired me to walk out to a fire they had made. I went out, and they all collected round me, both men, women, and boys. Tecaughretanego asked me to give them a particular account of what had happened from the time they left me yesterday, until now. I told them the whole of the ftory, and they never interrupted me; but when I made a ftop, the intervals were filled with loud acclamations of joy. As I could not, at this time, talk Ottawa or Jibewa well, (which is nearly the fame) I delivered my ftory in Caughnewaga. As my fifter Molly's husband was a Jibewa and could understand Caughnewaga, he acted as interpreter, and delivered my ftory to the Jibewas and Ottawas, which they received with pleafure. When all this was done, Tecaughretanego made a fpeech to me in the following manner:

"Brother,

"You fee we have prepared fnow-fhoes to go after you, and were almost ready to go, when you appeared; yet, as you had not been accustomed to hardships in your country, to the east, we never expected to see you alive. Now, we are glad to see you, in various respects; we are glad to fee you on your own account; and we are glad to fee the profpect of your filling the place of a great man, in whofe room you were adopted. We do not blame you for what has happened, we blame ourfelves; becaufe, we did not think of this driving fnow filling up the tracks, until after we came to camp.

# "Brother,

"Your conduct on this occasion hath pleafed us much: You have given us an evidence of your fortitude, skill and resolution: and we hope you will always go on to do great actions, as it is only great actions that can make a great man."

I told my brother Tecaughretanego, that I thanked them for their care of me, and for the kindnefs I always received. I told him that I always wifhed to do great actions, and hoped I never would do any thing to dishonor any of thofe with whom I was connected. I likewife told my Jibewa brother-in-law to tell his people that I alfo thanked them for their care and kindnefs.

The next morning fome of the hunters went out on fnow-fhoes, killed feveral deer, and hauled fome of them into camp upon the fnow. They fixed their carrying ftrings, (which are broad in the middle, and fmall at each end,) in the fore feet and nofe of the deer, and laid the broad part of it on their heads or about their fhoulders, and pulled it along; and when it is moving,

will not fink in the fnow much deeper than a fnow-fhoe; and when taken with the grain of the hair, flips along very eafy.

The fnow-fhoes are made like a hoop-net, and wrought with buck-fkin thongs. Each fhoe is about two feet and an half long, and about eighteen inches broad, before, and fmall behind, with crofs-bars, in order to fix or tie them to their feet. After the fnow had lay a few days, the Indians tomahawked the deer, by purfuing them in this manner.

About two weeks after this, there came a warm rain, and took away the chief part of the fnow, and broke up the ice; then we engaged in making wooden traps to catch beavers, as we had but few fteel traps. Thefe traps are made nearly in the fame manner as the racoon traps already defcribed.

One day as I was looking after my traps, I got benighted, by beaver ponds intercepting my way to camp; and as I had neglected to take fire-works with me, and the weather very cold, I could find no fuitable lodgingplace, therefore the only expedient I could think of to keep myfelf from freezing, was exercife. I danced and halloo'd the whole night with all my might, and the next day came to camp. Though I fuffered much more this time than the other night I lay out, yet the Indians were not fo much concerned, as they thought I had fireworks with me; but when they knew how it was, they did not blame me. They faid that old hunters were

frequently involved in this place, as the beaver dams were one above another on every creek and run, fo that it is hard to find a fording place. They applauded me for my fortitude, and faid as they had now plenty of beaver-fkins, they would purchafe me a new gun at Detroit, as we were to go there the next fpring; and then if I fhould chance to be loft in dark weather, I could make fire, kill provision, and return to camp when the fun fhined. By being bewildered on the waters of Muskingum, I loft repute, and was reduced to the bow and arrow; and by lying out two nights here, I regained my credit.

After fome time, the waters all froze again, and then, as formerly, we hunted beavers on the ice. Though beaver meat, without falt or bread, was the chief of our food this winter, yet we had always plenty, and I was well contented with my diet, as it appeared delicious fare, after the way we had lived the winter before.

Some time in February, we fcaffolded up our fur and fkins, and moved about ten miles in queft of a fugar camp or a fuitable place to make fugar, and encamped in a large bottom, on the head waters of Big Beaver creek. We had fome difficulty in moving, as we had a blind Caughnewaga boy about 15 years of age, to lead; and as this country is very brufhy, we frequently had him to carry;—We had alfo my Jibewa brother-inlaw's father with us, who was thought by the Indians to be a great conjurer—his name was Manetohcoa—this

69

old man was fo decrepit, that we had to carry him this route upon a bier,—and all our baggage to pack on our backs.

Shortly after we came to this place the fquaws began to make fugar. We had no large kettles with us this year, and they made the froft, in fome meafure, fupply the place of fire, in making fugar. Their large bark veffels, for holding the ftock-water, they made broad and shallow; and as the weather is very cold here, it frequently freezes at night in fugar time; and the ice they break and caft out of the veffels. I asked them if they were not throwing away the fugar? they faid no; it was water they were cafting away, fugar did not freeze, and there was fcarcely any in that ice. They faid I might try the experiment, and boil fome of it, and fee what I would get. I never did try it; but I observed that after feveral times freezing, the water that remained in the veffel, changed its colour and became brown and very fweet.

About the time we were done making fugar the fnow went off the ground; and one night a fquaw raifed an alarm. She faid fhe faw two men with guns in their hands, upon the bank on the other fide of the creek, fpying our tents—they were fuppofed to be Johnfton's Mohawks. On this the fquaws were ordered to flip quietly out, fome diffance into the bufhes; and all who had either guns or bows were to fquat in the bufhes near the tents; and if the enemy rufhed up, we were to give them the first fire, and let the fquaws have an opportunity of efcaping. I got down befide Tecaughretanego, and he whispered to me not to be afraid, for he would speak to the Mohawks, and as they spake the fame tongue that we did, they would not hurt the Caughnewagas, or me: but they would kill all the Jibewas and Ottawas that they could, and take us along with them. This news pleafed me well, and I heartily wished for the approach of the Mohawks.

Before we withdrew from the tents they had carried Manetohcoa to the fire, and gave him his conjuring tools; which were dyed feathers, the bone of the fhoulder blade of the wild cat, tobacco, &c., and while we were in the bushes, Manetohcoa was in a tent at the fire, conjuring away to the utmost of his ability. At length he called aloud for us all to come in, which was quickly obeyed. When we came in, he told us that after he had gone through the whole of his ceremony, and expected to fee a number of Mohawks on the flat bone when it was warmed at the fire, the pictures of two wolves only appeared. He faid though there were no Mohawks about, we must not be angry with the fquaw for giving a falfe alarm; as fhe had occafion to go out and happened to fee the wolves, though it was moon light; yet fhe got afraid, and fhe conceited it was Indians, with guns in their hands, fo he faid we might all go to fleep, for there was no danger-and accordingly we did.

The next morning we went to the place, and found wolf tracks, and where they had fcratched with their feet like dogs; but there was no fign of mockafon tracks. If there is any fuch thing as a wizzard, I think Manetohcoa was as likely to be one as any man, as he was a profeffed worshipper of the devil.-But let him be a conjuror or not, I am perfuaded that the Indians believed what he told them upon this occasion, as well as if it had come from an infallible oracle; or they would not, after fuch an alarm as this, go all to fleep in an unconcerned manner. This appeared to me the moft like witchcraft, of any thing I beheld while I was with them. Though I fcrutinized their proceedings in bufinefs of this kind, yet I generally found that their pretended witchcraft, was either art or mistaken notions, whereby they deceived themfelves.-Before a battle they fpy the enemy's motions carefully, and when they find that they can have confiderable advantage, and the greateft profpect of fuccefs, then the old men pretend to conjure, or to tell what the event will be,-and this they do in a figurative manner, which will bear fomething of a different interpretation, which generally comes to pafs nearly as they foretold; therefore the young warriors generally believed thefe old conjurors, which had a tendency to animate, and excite them to push on with vigor.

Some time in March 1757 we began to move back to the forks of Cayahaga, which was about forty or fifty

7 I

miles; and as we had no horfes, we had all our baggage and feveral hundred weight of beaver fkins, and fome deer and bear fkins—all to pack on our backs. The method we took to accomplifh this was by making fhort days' journies. In the morning we would move on with as much as we were able to carry, about five miles, and encamp; and then run back for more. We commonly made three fuch trips in the day. When we came to the great pond we ftaid there one day to reft ourfelves and to kill ducks and geefe.

While we remained here I went in company with a young Caughnewaga, who was about fifteen or feventeen years of age, Chinnohete by name, in order to gather crannberries. As he was gathering berries at fome distance from me, three Jibewa fquaws crept up undifcovered and made at him fpeedily, but he nimbly efcaped, and came to me apparently terrified. I asked him what he was afraid of? he replied did you not fee those fquaws? I told him I did, and they appeared to be in a very good humor. I asked him wherefore then he was afraid of them? He faid the Jibewa fquaws were very bad women, and had a very ugly cuftom among them. I asked him what that custom was? he faid that when two or three of them could catch a young lad, that was betwixt a man and a boy, out by himfelf, if they could overpower him, they would ftrip him by force in order to fee whether he was coming on to be a man or not. He faid that was what they intended when they crawled

up, and ran fo violently at him, but faid he, I am very glad that I fo narrowly efcaped. I then agreed with Chinnohete in condemning this as a bad cuftom, and an exceeding immodeft action for young women to be guilty of.

From our fugar camp on the head waters of Big Beaver creek, to this place is not hilly, and fome places the woods are tolerably clear: but in moft places exceeding brufhy. The land here is chiefly fecond and third rate. The timber on the upland is white-oak, blackoak, hickory and chefnut: there is alfo in fome places walnut up land, and plenty of good water. The bottoms here are generally large and good.

We again proceeded on from the pond to the forks of Cayahaga, at the rate of about five miles per day.

The land on this route is not very hilly, it is well watered, and in many places ill timbered, generally brufhy, and chiefly fecond and third rate land, intermixed with good bottoms.

When we came to the forks, we found that the fkins we had fcaffolded were all fafe. Though this was a public place, and Indians frequently paffing, and our fkins hanging up in view, yet there was none ftolen; and it is feldom that Indians do fteal anything from one another; and they fay they never did, until the white people came among them, and learned fome of them to lie, cheat and fteal,—but be that as it may, they never did curfe or fwear, until the whites learned them; fome

think their language will not admit of it, but I am not of that opinion; if I was fo difpofed, I could find language to curfe or fwear, in the Indian tongue.

I remember that Tecaughretanego, when fomething difpleafed him, faid, God damn it .- I asked him if he knew what he then faid? he faid he did; and mentioned one of their degrading expressions, which he supposed to be the meaning or fomething like the meaning of what he had faid. I told him that it did not bear the leaft refemblance to it; that what he faid, was calling upon the great fpirit to punish the object he was displeased with. He ftood for fometime amazed, and then faid, if this be the meaning of thefe words, what fort of people are the whites? when the traders were among us thefe words feemed to be intermixed with all their difcourfe. He told me to reconfider what I had faid, for he thought I must be mistaken in my definition; if I was not mistaken, he said, the traders applied thefe words not only wickedly, but often times very foolifhly and contrary to fense or reason. He said he remembered once of a trader's accidentally breaking his gun lock, and on that occafion calling out aloud God damn it-furely faid he the gun lock was not an object worthy of punishment for Owaneeyo, or the Great Spirit: he alfo obferved the traders often used this expression, when they were in a good humor and not difpleafed with anything .--- I acknowledged that the traders used this expression very often, in a most irrational, inconsistent, and impious man-

ner; yet I ftill afferted that I had given the true meaning of thefe words.—He replied, if fo, the traders are as bad as Oonafahroona, or the under ground inhabitants, which is the name they give the devils; as they entertain a notion that their place of refidence is under the earth.

We took up our birch-bark canoes which we had buried, and found that they were not damaged by the winter; but they not being fufficient to carry all that we now had, we made a large chefnut bark canoe; as elm bark was not to be found at this place.

We all embarked, and had a very agreeable paffage down the Cayahaga, and along the fouth fide of Lake Erie, until we paffed the mouth of Sanduſky; then the wind aroſe, and we put in at the mouth of the Miami of the Lake, at Cedar Point, where we remained feveral days, and killed a number of Turkeys, geeſe, ducks and ſwans. The wind being fair, and the lake not extremely rough, we again embarked, hoiſted up ſails, and arrived ſafe at the Wiandot town, nearly oppoſite to Fort Detroit, on the north ſide of the river. Here we found a number of French traders, every one very willing to deal with us for our beaver.

We bought ourfelves fine clothes, amunition, paint, tobacco, &c. and according to promife, they purchafed me a new gun: yet we had parted with only about onethird of our beaver. At length a trader came to town with French Brandy: We purchafed a keg of it, and

held a council about who was to get drunk, and who was to keep fober. I was invited to get drunk, but I refused the propofal-then they told me that I must be one of those who were to take care of the drunken people. I did not like this; but of two evils I chofe that which I thought was the least-and fell in with those who were to conceal the arms, and keep every dangerous weapon we could, out of their way, and endeavor, if poffible to keep the drinking club from killing each other, which was a very hard tafk. Several times we hazarded our own lives, and got ourfelves hurt, in preventing them from flaying each other. Before they had finished this keg, near one-third of the town was introduced to this drinking club; they could not pay their part, as they had already difpofed of all their fkins; but that made no odds, all were welcome to drink.

When they were done with this keg, they applied to the traders, and procured a kettle full of brandy at a time, which they divided out with a large wooden fpoon,—and fo they went on and never quit while they had a fingle beaver fkin.

When the trader had got all our beaver, he moved off to the Ottawa town, about a mile above the Wiandot town.

When the brandy was gone, and the drinking club fober, they appeared much dejected. Some of them were crippled, others badly wounded, a number of their fine new fhirts tore, and feveral blankets were burned :---

77

a number of fquaws were alfo in this club, and neglected their corn planting.

We could now hear the effects of the brandy in the Ottawa town. They were finging and yelling in the most hideous manner, both night and day; but their frolic ended worfe than ours; five Ottawas were killed and a great many wounded.

After this a number of young Indians were getting their ears cut, and they urged me to have mine cut likewife; but they did not attempt to compel me, though they endeavored to perfuade me. The principal arguments they ufed were its being a very great ornament, and alfo the common fafhion—The former I did not believe, and the latter I could not deny. The way they performed this operation was by cutting the flefhy part of the circle of the ear clofe to the griftle quite through. When this was done they wrapt rags round this flefhy part until it was entirely healed; then they hung lead to it and flretched it to a wonderful length: when it was sufficiently flretched, they wrapt the flefhy part round with brafs wire, which formed it into a femicircle about four inches diameter.

Many of the young men were now exercifing themfelves in a game refembling foot ball; though they commonly ftruck the ball with a crooked flick, made for that purpofe; alfo a game fomething like this, wherein they ufed a wooden ball, about three inches diameter, and the inftrument they moved it with was a ftrong flaff

about five feet long, with a hoop net on the end of it, large enough to contain the ball. Before they begin the play, they lay off about half a mile diftance in a clear plain, and the oppofite parties all attend at the centre, where a difinterested perfon casts up the ball then the opofite parties all contend for it. If any one gets it into his net, he runs with it the way he wifhes it to go, and they all purfue him. If one of the opposite party overtakes the perfon with the ball, he gives the ftaff a ftroke which caufes the ball to fly out of the net; then they have another debate for it; and if the one that gets it can outrun all the oppofite party, and can carry it quite out, or over the line at the end, the game is won; but this feldom happens. When any one is running away with the ball, and is like to be overtaken, he commonly throws it, and with this inftrument can caft it fifty or fixty yards. Sometimes when the ball is almost at the one end, matters will take a fudden turn, and the opposite party may quickly carry it out at the other end. Oftentimes they will work a long while back and forward before they can get the ball over the line, or win the game.

About the first of June, 1757, the warriors were preparing to go to war, in the Wiandot, Pottowatomy, and Ottawa towns; alfo a great many Jibewas came down from the upper lakes; and after finging their war fongs and going through their common ceremonies, they marched off against the frontiers of Virginia, Maryland

and Pennfylvania, in their ufual manner, finging the travelling fong, flow firing, &c.

On the north fide of the river St. Laurence, oppofite to Fort Detroit, there is an ifland, which the Indians call the Long Ifland, and which they fay is above one thoufand miles long, and in fome places above one hundred miles broad. They further fay that the great river that comes down by Canefatauga and that empties into the main branch of St. Laurence, above Montreal, originates from one fource, with the St. Lawrence, and forms this ifland.

Opposite to Detroit, and below it, was originally a prairie, and laid off in lots about fixty rods broad, and a great length: each lot is divided into two fields, which they cultivate year about. The principal grain that the French raifed in these fields was spring wheat and peas.

They built all their houfes on the front of thefe lots on the river fide; and as the banks of the river are very low, fome of the houfes are not above three or four feet above the furface of the water; yet they are in no danger of being diffurbed by frefhes, as the river feldom rifes above eighteen inches; becaufe it is the communication, of the river St. Laurence, from one lake to another.

As dwelling-houfes, barns, and ftables are all built on the front of thefe lots; at a diffance it appears like a continued row of houfes in a town, on each fide of the river for a long way. Thefe villages, the town, the river and the plains, being all in view at once, affords a moft delightful profpect.

The inhabitants here chiefly drink the river water; and as it comes from the northward it is very wholefome.

The land here is principally fecond rate, and comparatively fpeaking, a fmall part is first or third rate; tho about four or five miles fouth of Detroit, there is a fmall portion that is worfe than what I would call third rate, which produces abundance of hurtle berries.

There is plenty of good meadow ground here, and a great many marfhes that are overfpread with water.— The timber is elm, fugar-tree, black-afh, white-afh, abundance of water-afh, oak, hickory, and fome walnut.

About the middle of June the Indians were almost all gone to war, from fixteen to fixty; yet Tecaughretanego remained in town with me. Tho he had formerly, when they were at war with the fouthern nations been a great warrior, and an eminent counfellor; and I think as clear and as able a reafoner upon any fubject that he had an opportunity of being acquainted with, as I ever knew; yet he had all along been against this war, and had strenuously opposed it in council. He faid if the English and French had a quarrel let them fight their own battles themselves; it is not our business to intermeddle therewith.

Before the warriors returned we were very fcarce of provifion: and tho we did not commonly fteal from one

another; yet we ftole during this time any thing that we could eat from the French, under the notion that it was just for us to do fo; because they supported their foldiers; and our squaws, old men and children were fuffering on the account of the war, as our hunters were all gone.

Some time in August the warriors returned, and brought in with them a great many scalps, prisoners, horses and plunder; and the common report among the young warriors, was, that they would intirely subdue Tulhafaga, that is the Engliss, or it might be literally rendered the Morning Light inhabitants.

About the first of November a number of families were preparing to go on their winter hunt, and all agreed to crofs the lake together. We encamped at the mouth of the river the first night, and a council was held, whether we would crofs thro' by the three islands, or coast it round the lake. These islands lie in a line acrofs the lake, and are just in fight of each other. Some of the Wiandots or Ottawas frequently make their winter hunt on these islands. The excepting wild fowl and fish, there is fearcely any game here but racoons which are amazingly plenty, and exceeding large and fat; as they feed upon the wild rice, which grows in abundance in wet places round these islands. It is faid that each hunter in one winter will catch one thousand racoons.

It is a received opinion among the Indians that the

fnakes and racoons are tranfmutable; and that a great many of the fnakes turn racoons every fall, and racoons fnakes every fpring. This notion is founded on obfervations made on the fnakes and racoons in this ifland.

As the racoons here lodge in rocks, the trappers make their wooden traps at the mouth of the holes; and as they go daily to look at their traps, in the winter feafon, they commonly find them filled with racoons; but in the fpring or when the froft is out of the ground they fay, they then find their traps filled with large rattle fnakes. And therefore conclude that the racoons are transformed. They alfo fay that the reafon why they are fo remarkably plenty in the winter, is, every fall the fnakes turn racoons again.

I told them that the I had never landed on any of thefe iflands, yet from the unanimous accounts I had received, I believed that both fnakes and racoons were plenty there; but no doubt they all remained there both fummer and winter, only the fnakes were not to be feen in the latter; yet I did not believe they were tranfmutable.

Thefe iflands are but feldom vifited; becaufe early in the fpring and late in the fall it is dangerous failing in their bark canoes; and in the fummer they are fo infefted with various kinds of ferpents, (but chiefly rattle fnakes,) that it is dangerous landing.

I fhall now quit this digreffion, and return to the refult of the council at the mouth of the river. We

concluded to coaft it round the lake, and in two days we came to the mouth of the Miami of the Lake, and landed on cedar point, where we remained feveral days. Here we held a council, and concluded we would take a driving hunt in concert, and in partnerfhip.

The river in this place is about a mile broad, and as it and the lake forms a kind of neck, which terminates in a point, all the hunters (which were fifty-three) went up the river, and we fcattered ourfelves from the river to the lake. When we first began to move we were not in fight of each other, but as we all raifed the yell, we could move regularly together by the noife. At length we came in fight of each other and appeared to be marching in good order; before we came to the point, both the fquaws and boys in the canoes were fcattered up the river, and along the lake, to prevent the deer from making their efcape by water. As we advanced near the point the guns began to crack flowly; and after fome time the firing was like a little engagement. The fquaws and boys were bufy tomahawking the deer in the water, and we fhooting them down on the land:-We killed in all about thirty deer: tho a great many made their efcape by water.

We had now great feafting and rejoicing, as we had plenty of homony, venifon, and wild fowl. The geefe at this time appeared to be preparing to move fouthward— It might be afked what is meant by the geefe preparing to move? The Indians reprefent them as holding a great

council at this time concerning the weather in order to conclude upon a day, that they may all at or near one time leave the Northern Lakes, and wing their way to the fouthern bays. When matters are brought to a conclusion and the time appointed that they are to take wing, then they fay, a great number of expresses are fent off, in order to let the different tribes know the refult of this council, that they may be all in readiness to move at the time appointed. As there is a great commotion among the geese at this time, it would appear by their actions, that fuch a council had been held. Certain it is, that they are led by inftinct to act in concert and to move off regularly after their leaders.

Here our company feparated. The chief part of them went up the Miami river, that empties into Lake Erie, at cedar point, whilft we proceeded on our journey in company with Tecaughretanego, Tontileaugo, and two families of the Wiandots.

As cold weather was now approaching, we began to feel the doleful effects of extravagantly and foolifhly fpending the large quantity of beaver we had taken in our laft winter's hunt. We were all nearly in the fame circumftances—fcarcely one had a fhirt to his back; but each of us had an old blanket which we belted round us in the day, and flept in at night, with a deer or bear fkin under us for our bed.

When we came to the falls of Sandufky, we buried our birch bark canoes as ufual, at a large burying place

for that purpofe, a little below the falls. At this place the river falls about eight feet over a rock, but not perpendicular. With much difficulty we pufhed up our wooden canoes, fome of us went up the river, and the reft by land with the horfes, until we came to the great meadows or prairies that lie between Sandufky and Sciota.

When we came to this place we met with fome Ottawa hunters, and agreed with them to take, what they call a ring hunt, in partnership. We waited until we expected rain was near falling to extinguish the fire, and then we kindled a large circle in the prairie. At this time, or before the bucks began to run a great number of deer lay concealed in the grafs, in the day, and moved about in the night; but as the fire burned in towards the centre of the circle, the deer fled before the fire: the Indians were scattered also at some distance before the fire, and fhot them down every opportunity, which was very frequent, efpecially as the circle became fmall. When we came to divide the deer, there were above ten to each hunter, which were all killed in a few hours. The rain did not come on that night to put out the out-fide circle of the fire, and as the wind arofe, it extended thro the whole prairie, which was about fifty miles in length, and in fome places near twenty in breadth. This put an end to our ring hunting this feason, and was in other refpects an injury to us in the hunting bufinefs; fo that upon the whole we received more harm than benefit by

our rapid hunting frolic. We then moved from the north end of the glades, and encamped at the carrying place.

This place is in the plains betwixt a creek that empties into Sandufky, and one that runs into Sciota: and at the time of high water, or in the fpring feafon, there is but about one half mile of portage, and that very level, and clear of rocks, timber or ftones; fo that with a little digging there may be water carriage the whole way from Sciota to Lake Erie.

From the mouth of Sandufky to the falls is chiefly firft rate land, lying flat or level, intermixed with large bodies of clear meadows, where the grafs is exceeding rank, and in many places three or four feet high. The timber is oak, hickory, walnut, cherry, black-afh, elm, fugar-tree, buckeye, locuft and beech. In fome places there is wet timber land—the timber in thefe places is chiefly water-afh, fycamore, or button-wood.

From the falls to the prairies, the land lies well to the fun, it is neither too flat nor too hilly—and chiefly firft rate. The timber nearly the fame as below the falls, excepting the water-afh.—There is alfo here, fome plats of beech land, that appears to be fecond rate, as it frequently produces fpice-wood. The prairie appears to be a tolerable fertile foil, tho in many places too wet for cultivation; yet I apprehend it would produce timber, were it only kept from fire.

The Indians are of the opinion that the fquirrels

plant all the timber; as they bury a number of nuts for food, and only one at a place. When a fquirrel is killed the various kinds of nuts thus buried will grow.

I have obferved that when thefe prairies have only efcaped fire for one year, near where a fingle tree flood, there was a young growth of timber fuppofed to be planted by the fquirrels; but when the prairies were again burned, all this young growth was immediately confumed; as the fire rages in the grafs, to fuch a pitch, that numbers of racoons are thereby burned to death.

On the weft fide of the prairie, or betwixt that and Sciota, there is a large body of first rate land—the timber, walnut, locust, sugar-tree, buckeye, cherry, ash, elm, mulberry, plumb trees, spicewood, black-haw, red-haw, oak and hickory.

About the time the bucks quit running, Tontileaugo his wife and children, Tecaughretanego, his fon Nungany and myfelf left the Wiandot camps at the carrying place, and croffed the Sciota river at the fouth end of the glades, and proceeded on about a fouth-weft courfe to a large creek called Ollentangy, which I believe interlocks with the waters of the Miami, and empties into Sciota on the weft fide thereof. From the fouth end of the prairie to Ollentangy, there is a large quantity of beech land, intermixed with firft rate land. Here we made our winter hut, and had confiderable fuccefs in hunting.

After some time one of Tontileaugo's step-sons, (a

lad about eight years of age) offended him, and he gave the boy a moderate whipping, which much difpleafed his Wiandot wife. She acknowledged that the boy was guilty of a fault, but thought that he ought to have been ducked, which is their ufual mode of chaftifement. She faid fhe could not bear to have her fon whipped like a fervant or flave—and fhe was fo difpleafed that when Tontileaugo went out to hunt, fhe got her two horfes, and all her effects, (as in this country the hufband and wife have feparate interefts) and moved back to the Wiandot camps that we had left.

When Tontileaugo returned, he was much diffurbed on hearing of his wife's elopement, and faid that he would never go after her were it not that he was afraid that fhe would get bewildered, and that his children that fhe had taken with her, might fuffer. Tontileaugo went after his wife, and when they met they made up the quarrel, and he never returned; but left Tecaughretanego and his fon, (a boy about ten years of age) and myfelf, who remained here in our hut all winter.

Tecaughretanego who had been a first rate warior, states frates and hunter; and though he was now near fixty years of age, he was yet equal to the common run of hunters, but subject to the rheumatism, which deprived him of the use of his legs.

Shortly after Tontileaugo left us, Tecaughretanego became lame, and could fcarcely walk out of our hut for two months. I had confiderable fuccefs in hunting and

trapping. Though Tecaughretanego endured much pain and mifery, yet he bore it all with wonderful patience, and would often endeavor to entertain me with chearful converfation. Sometimes he would applaud me for my diligence, fkill and activity—and at other times he would take great care in giving me inftructions concerning the hunting and trapping bufinefs. He would alfo tell me that if I failed of fuccefs, we would fuffer very much, as we were about forty miles from any one living, that we knew of; yet he would not intimate that he apprehended we were in any danger, but ftill fuppofed that I was fully adequate to the tafk.

Tontileaugo left us a little before Chriftmas, and from that until fome time in February, we had always plenty of bear meat, venifon, &c. During this time I killed much more than we could ufe, but having no horfes to carry in what I killed, I left part of it in the woods. In February there came a fnow, with a cruft, which made a great noife when walking on it, and frightened away the deer; and as bear and beaver were fcarce here, we got entirely out of provision. After I had hunted two days without eating any thing, and had very fhort allowance for fome days before, I returned late in the evening faint and weary. When I came into our hut, Tecaughretanego afked what fuccefs? I told him not any. He afked me if I was not very hungry? I replied that the keen appetite feemed to be in fome

I 2

measure removed, but I was both faint and weary. He commanded Nunganey his little fon, to bring me fomething to eat, and he brought me a kettle with fome bones and broth,-after eating a few mouthfuls my appetite violently returned, and I thought the victuals had a most agreeable realish, though it was only fox and wildcat bones, which lay about the camp, which the ravens and turkey-buzzards had picked-thefe Nunganey had collected and boiled, until the finews that remained on the bones would ftrip off. I fpeedily finished my allowance, fuch as it was, and when I had ended my fweet repaft, Tecaughretanego afked me how I felt? I told him that I was much refreshed. He then handed me his pipe and pouch, and told me to take a fmoke. I did fo. He then faid he had fomething of importance to tell me, if I was now composed and ready to hear it. I told him that I was ready to hear him. He faid the reafon why he deferred his fpeech till now, was becaufe few men are in a right humor to hear good talk, when they are extremely hungry, as they are then generally fretful and difcompofed; but as you appear now to enjoy calmnefs and ferenity of mind, I will now communicate to you the thoughts of my heart, and those things that I know to be true.

" Brother,

"As you have lived with the white people, you have not had the fame advantage of knowing that the great being above feeds his people, and gives them their meat

in due feafon, as we Indians have, who are frequently out of provifions, and yet are wonderfully fupplied, and that fo frequently that it is evidently the hand of the great Owaneeyo\* that doth this: whereas the white people have commonly large flocks of tame cattle, that they can kill when they pleafe, and alfo their barns and cribs filled with grain, and therefore have not the fame opportunity of feeing and knowing that they are fupported by the ruler of Heaven and Earth.

### "Brother,

"I know that you are now afraid that we will all perifh with hunger, but you have no just reason to fear this.

### " Brother,

"I have been young, but am now old—I have been frequently under the like circumftance that we now are, and that fome time or other in almost every year of my life; yet, I have hitherto been fupported, and my wants fupplied in time of need.

### "Brother,

"Owaneeyo fome times fuffers us to be in want, in order to teach us our dependance upon him, and to let us know that we are to love and ferve him: and likewife to know the worth of the favors that we receive, and to make us more thankful.

<sup>\*</sup> This is the name of God, in their tongue, and fignifies the owner and ruler of all things.

### " Brother,

"Be affured that you will be fupplied with food, and that just in the right time; but you must continue diligent in the use of means—go to sleep, and rise early in the morning and go a hunting—be strong and exert yourfelf like a man, and the great spirit will direct your way."

The next morning I went out, and fteered about an eaft courfe. I proceeded on flowly for about five miles, and faw deer frequently, but as the cruft on the fnow made a great noife, they were always running before I fpied them, fo that I could not get a fhoot. A violent appetite returned, and I became intolerably hungry; it was now that I concluded I would run off to Pennfylvania, my native country. As the fnow was on the ground, and Indian hunters almost the whole of the way before me, I had but a poor prospect of making my efcape; but my cafe appeared desperate. If I staid here I thought I would perish with hunger, and if I met with Indians, they could but kill me.

I then proceeded on as faft as I could walk, and when I got about ten or twelve miles from our hut, I came upon frefh buffaloe tracks,—I purfued after, and in a fhort time came in fight of them, as they were paffing through a fmall glade—I ran with all my might, and headed them, where I lay in ambufh, and killed a very large cow. I immediately kindled a fire and began to roaft meat, but could not wait till it was done—I ate it

almost raw. When hunger was abated I began to be tenderly concerned for my old Indian brother, and the little boy I had left in a perishing condition. I made haste and packed up what meat I could carry, secured what I left from the wolves, and returned homewards.

I fcarcely thought on the old man's fpeech while I was almost distracted with hunger, but on my return was much affected with it, reflected on myfelf for my hard-heartedness and ingratitude, in attempting to run off and leave the venerable old man and little boy to perish with hunger. I also confidered how remarkably the old man's speech had been verified in our providentially obtaining a supply. I thought also of that part of his speech which treated of the fractious dispositions of hungry people, which was the only excuse I had for my base inhumanity, in attempting to leave them in the most deplorable statement.

As it was moon-light, I got home to our hut, and found the old man in his ufual good humor. He thanked me for my exertion, and bid me fit down, as I muft certainly be fatigued, and he commanded Nunganey to make hafte and cook. I told him I would cook for him, and let the boy lay fome meat on the coals, for himfelf—which he did, but ate it almost raw, as I had done. I immediately hung on the kettle with fome water, and cut the beef in thin flices, and put them in: —when it had boiled awhile, I proposed taking it off the fire, but the old man replied, "let it be done

enough." This he faid in as patient and unconcerned a manner, as if he had not wanted one fingle meal. He commanded Nunganey to eat no more beef at that time, leaft he might hurt himfelf; but told him to fit down, and after fome time he might fup fome broth—this command he reluctantly obeyed.

When we were all refreshed, Tecaughretanego delivered a fpeech upon the neceffity and pleafure of receiving the neceffary fupports of life with thankfulnefs, knowing that Owaneeyo is the great giver. Such fpeeches from an Indian, may be tho't by those who are unacquainted with them, altogether incredible; but when we reflect on the Indian war, we may readily conclude that they are not an ignorant or flupid fort of people, or they would not have been fuch fatal enemies. When they came into our country they outwitted us-and when we fent armies into their country, they outgeneralled, and beat us with inferior force. Let us alfo take into confideration that Tecaughretanego was no common perfon, but was among the Indians, as Socrates in the ancient Heathen world; and it may be, equal to him-if not in wifdom and learning, yet, perhaps in patience and fortitude. Notwithstanding Tecaughretanego's uncommon natural abilities, yet in the fequel of this hiftory you will fee the deficiency of the light of nature, unaided by revelation, in this truly great man.

The next morning Tecaughretanego defired me to go back and bring another load of buffaloe beef: As I

proceeded to do fo, about five miles from our hut I found a bear tree. As a fapling, grew near the tree, and reached near the hole that the bear went in at, I got dry dozed or rotten wood, that would catch and hold fire almost as well as fpunk. This wood I tied up in bunches, fixed them on my back, and then climbed up the fapling, and with a pole, I put them touched with fire, into the hole, and then came down and took my gun in my hand. After fome time the bear came out, and I killed and fkinned it, packed up a load of the meat, (after fecuring the remainder from the wolves) and returned home before night. On my return my old brother and his fon were much rejoiced at my fuccefs. After this we had plenty of provision.

We remained here until fome time in April 1758. At this time Tecaughretanego had recovered fo, that he could walk about. We made a bark canoe, embarked, and went down Ollentangy fome diffance, but the water being low, we were in danger of fplitting our canoe upon the rocks: therefore Tecaughretanego concluded we would encamp on fhore, and pray for rain.

When we encamped, Tecaughretanego made himfelf a fweat-houfe; which he did by flicking a number of hoops in the ground, each hoop forming a femi-circle this he covered all round with blankets and fkins; he then prepared hot flones, which he rolled into this hut, and then went into it himfelf, with a little kettle of water in his hand, mixed with a variety of herbs, which

he had formerly cured, and had now with him in his pack-they afforded an odoriferous perfume. When he was in, he told me to pull down the blankets behind him, and cover all up clofe, which I did, and then he began to pour water upon the hot ftones, and to fing aloud. He continued in this vehement hot place about fifteen minutes :--- all this he did in order to purify himfelf before he would addrefs the Supreme Being. When he came out of his fweat-houfe, he began to burn tobacco and to pray. He began each petition with oh, ho, ho, ho, which is a kind of afpiration, and fignifies an ardent wifh. I obferved that all his petitions were only for immediate, or prefent temporal bleffings. He began his addrefs by thankfgiving, in the following manner:

"O great being! I thank thee that I have obtained the ufe of my legs again—that I am now able to walk about and kill turkeys, &c. without feeling exquifite pain and mifery: I know that thou art a hearer and a helper, and therefore I will call upon thee.

"Oh, ho, ho, ho,

"Grant that my knees and ancles may be right well, and that I may be able, not only to walk, but to run, and to jump logs, as I did laft fall.

"Oh, ho, ho, ho,

"Grant that on this voyage we may frequently kill bears, as they may be croffing the Sciota and Sandufky.

"Oh, ho, ho, ho,

"Grant that we may kill plenty of Turkeys along the banks, to flew with our fat bear meat.

"Oh, ho, ho, ho,

"Grant that rain may come to raife the Ollentangy about two or three feet, that we may crofs in fafety down to Sciota, without danger of our canoe being wrecked on the rocks;—and now, O great being! thou knoweft how matters fland—thou knoweft that I am a great lover of tobacco, and though I know not when I may get any more, I now make a prefent of the laft I have unto thee, as a free burnt offering; therefore I expect thou wilt hear and grant thefe requefts, and I thy fervant will return thee thanks, and love thee for thy gifts."

During the whole of this fcene I fat by Tecaughretanego, and as he went through it with the greateft folemnity, I was ferioufly affected with his prayers. I remained duly composed until he came to the burning of the tobacco, and as I knew that he was a great lover of it, and faw him caft the last of it into the fire, it excited in me a kind of meriment, and I infensibly fmiled. Tecaughretanego obferved me laughing, which difpleafed him, and occasioned him to address me in the following manner.

"Brother,

"I have fomewhat to fay to you, and I hope you will not be offended when I tell you of your faults. You know that when you were reading your books in

town, I would not let the boys or any one difturb you; but now when I was praying, I faw you laughing. I do not think that you look upon praying as a foolifh thing;—I believe you pray yourfelf. But perhaps you may think my mode, or manner of prayer foolifh; if fo, you ought in a friendly manner to inftruct me, and not make fport of facred things."

I acknowledged my error, and on this he handed me his pipe to fmoke, in token of friendship and reconciliation; though at that time he had nothing to fmoke, but red-willow bark. I told him fomething of the method of reconciliation with an offended God, as revealed in my Bible, which I had then in poffession. He faid that he liked my ftory better than that of the French priefts, but he thought that he was now too old to begin to learn a new religion, therefore he should continue to worship God in the way that he had been taught, and that if falvation or future happiness was to be had in his way of worfhip, he expected he would obtain it, and if it was inconfiftent with the honor of the great fpirit to accept of him in his own way of worship, he hoped that Owaneeyo would accept of him in the way I had mentioned, or in fome other way, though he might now be ignorant of the channel through which favor or mercy might be conveyed. He faid that he believed that Owaneeyo would hear and help every one that fincerely waited upon him.

Here we may fee how far the light of nature could

go; perhaps we fee it here almost in its highest extent. Notwithstanding the just views that this great man entertained of Providence, yet we now fee him (though he acknowledged his guilt) expecting to appeale the Deity, and procure his favor, by burning a little tobacco. We may observe that all Heathen nations, as far as we can find out either by tradition or the light of Nature, agree with Revelation in this, that facrifice is necessfary, or that fome kind of atonement is to be made, in order to remove guilt, and reconcile them to God. This, accompanied with numberless other witness, is fufficient evidence of the rationality the truth of the Scriptures.

A few days after Tecaughretanego had gone through his ceremonies, and finished his prayers, the rain came and raifed the creek a fufficient height, so that we passed in fafety down to Sciota, and proceeded up to the carrying place. Let us now defcribe the land on this route, from our winter hut, and down Ollentangy to the Sciota, and up it to the carrying place.

About our winter cabbin is chiefly first and fecond rate land. A confiderable way up Ollentangy on the fouthwest fide thereof, or betwixt it and the Miami, there is a very large prairie, and from this prairie down Ollentangy to Sciota, is generally first rate land. The timber is walnut, fugar-tree, ash, buckeye, locust, wild-cherry, and spice-wood, intermixed with some oak and beech. From the mouth of Ollentangy on the east fide of Sciota,

up to the carrying place, there is a large body of firft and fecond rate land, and tolerably well watered. The timber is afh, fugar-tree, walnut, locuft, oak, and beech. Up near the carrying place, the land is a little hilly, but the foil good.

We proceeded from this place down Sandufky, and in our paffage we killed four bears, and a number of turkeys. Tecaughretanego appeared now fully perfuaded that all this came in anfwer to his prayers—and who can fay with any degree of certainty that it was not fo?

When we came to the little lake at the mouth of Sanduſky we called at a Wiandot town that was then there, called Sunyendeand. Here we diverted ourfelves feveral days, by catching rock-fiſh in a ſmall creek, the name of which is alſo Sunyendeand, which ſigniſies Rock-Fiſh. They fiſhed in the night, with lights, and ſtruck the fiſh with giggs or ſpears. The rock-fiſh here, when they begin firſt to run up the creek to ſpawn, are exceeding fat, and ſuſficient to ſry themſelves. The firſt night we ſcarcely caught fiſh enough ſor preſent uſe, ſor all that was in the town.

The next morning I met with a prifoner at this place, by the name of Thompfon, who had been taken from Virginia: he told me if the Indians would only omit diffurbing the fifh for one night, he could catch more fifh than the whole town could make ufe of. I told Mr. Thompfon that if he was certain that he could do

this, that I would use my influence with the Indians, to let the fifh alone for one night. I applied to the chiefs, who agreed to my propofal, and faid they were anxious to fee what the Great Knife (as they called the Virginian) could do. Mr. Thompfon, with the affiftance of fome other prifoners, fet to work, and made a hoop net of Elm bark: they then cut down a tree across the creek, and fluck in flakes at the lower fide of it, to prevent the fifh from paffing up, leaving only a gap at the one fide of the creek :- here he fat with his net, and when he felt the fish touch the net he drew it up, and frequently would hawl out two or three rock-fifh that would weigh about five or fix pounds each. He continued at this until he had hawled out about a waggon load, and then left the gap open, in order to let them pafs up, for they could not go far, on account of the shallow water. Before day Mr. Thompson shut it up, to prevent them from paffing down, in order to let the Indians have fome diversion in killing them in daylight. When the news of the fish came to town, the Indians

all collected, and with furprize beheld the large heap of fifh, and applauded the ingenuity of the Virginian. When they faw the number of them that were confined in the water above the tree, the young Indians ran back to the town, and in a fhort time returned with their fpears, giggs, bows and arrows, &c. and were the chief of that day engaged in killing rock-fifh, infomuch that we had more than we could ufe or preferve. As we had

IOI

no falt, or any way to keep them, they lay upon the banks, and after fome time great numbers of turkeybuzzards and eagles collected together and devoured them.

Shortly after this we left Sunyendeand, and in three days arrived at Detroit, where we remained this fummer.

Some time in May we heard that General Forbes, with feven thousand men was preparing to carry on a campaign against Fort DuQuesne, which then stood near where Fort Pitt was afterwards erected. Upon receiving this news a number of runners were sent off by the French commander at Detroit, to urge the different tribes of Indian warriors to repair to Fort DuQuesne.

Some time in July 1758, the Ottowas, Jibewas, Potowatomies and Wiandots rendezvoufed at Detroit, and marched off to Fort DuQuefne, to prepare for the encounter of General Forbes. The common report was, that they would ferve him as they did General Braddock, and obtain much plunder. From this time, until fall, we had frequent accounts of Forbes's army, by Indian runners that were fent out to watch their motion. They fpied them frequently from the mountains ever after they left Fort Loudon. Notwithftanding their vigilence, colonel Grant with his Highlanders ftole a march upon them, and in the night took poffefion of a hill about eighty rod from Fort DuQuefne:—this hill is on that account called Grant's hill to this day. The

French and Indians knew not that Grant and his men were there until they beat the drum and played upon the bag-pipes, juft at day-light. They then flew to arms, and the Indians ran up under covert of the banks of Allegheny and Monongahela, for fome diftance, and then fallied out from the banks of the rivers, and took poffeffion of the hill above Grant; and as he was on the point of it in fight of the fort, they immediately furrounded him, and as he had his Highlanders in ranks, and very clofe order, and the Indians fcattered, and concealed behind trees, they defeated him with the lofs only of a few warriors:—moft of the Highlanders were killed or taken prifoners.

After this defeat the Indians held a council, but were divided in their opinions. Some faid that general Forbes would now turn back, and go home the way that he came, as Dunbar had done when General Braddock was defeated: others fuppofed he would come on. The French urged the Indians to ftay and fee the event: —but as it was hard for the Indians to be abfent from their fquaws and children, at this feafon of the year, a great many of them returned home to their hunting. After this, the remainder of the Indians, fome French regulars, and a number of Canadians, marched off in queft of General Forbes. They met his army near Fort Ligoneer, and attacked them, but were fruftrated in their defign. They faid that Forbes's men were beginning to learn the art of war, and that there were a

## Col. James Smith.

great number of American riflemen along with the redcoats, who fcattered out, took trees, and were good marks-men; therefore they found they could not accomplish their defign, and were obliged to retreat. When they returned from the battle to Fort DuQuesne, the Indians concluded that they would go to their hunting. The French endeavored to perfuade them to flay and try another battle. The Indians faid if it was only the red-coats they had to do with, they could foon fubdue them, but they could not withstand Ashalecoa, or the Great Knife, which was the name they gave the Virginians. They then returned home to their hunting, and the French evacuated the fort, which General Forbes came and took poffeffion of without further oppofition, late in the year 1758, and at this time began to build Fort Pitt.

When Tecaughretanego had heard the particulars of Grant's defeat, he faid that he could not well account for his contradictory and inconfiftent conduct. He faid as the art of war confifts in ambufhing and furprizing our enemies, and in preventing them from ambufhing and furprizing us; Grant, in the first place, acted like a wife and experienced officer, in artfully approaching in the night without being difcovered; but when he came to the place, and the Indians were lying asleep outfide of the fort, between him and the Allegheny river, in place of flipping up quietly, and falling upon them with their broad fwords, they beat the drums and played

upon the bag-pipes. He faid he could account for this inconfiftent conduct no other way than by fuppofing that he had made too free with fpirituous liquors during the night, and became intoxicated about day-light. But to return :

This year we hunted up Sandufky, and down Sciota, took nearly the fame route that we had done the laft hunting feafon. We had confiderable fuccefs, and returned to Detroit fome time in April 1759.

Shortly after this, Tecaughretanego, his fon Nungany and myfelf, went from Detroit, (in an elm bark canoe) to Caughnewaga, a very ancient Indian town, about nine miles above Montreal, where I remained until about the firft of July. I then heard of a French fhip at Montreal that had Englifh prifoners on board, in order to carry them over fea, and exchange them. I went privately off from the Indians, and got alfo on board; but as general Wolfe had ftopped the River St. Laurence, we were all fent to prifon at Montreal, where I remained four months. Some time in November we were all fent off from this place to Crown Point, and exchanged.

Early in the year 1760, I came home to Conococheague, and found that my people could never afcertain whether I was killed or taken, until my return. They received me with great joy, but were furprifed to fee me fo much like an Indian, both in my gait and gefture. Upon enquiry, I found that my fweet-heart was married a few days before I arrived. My feelings I muft leave on this occafion, for those of my readers to judge, who have felt the pangs of disappointed love, as it is impossible now for me to describe the emotion of foul I felt at that time.

Now there was peace with the Indians which lafted until the year 1763. Sometime in May, this year, I married, and about that time the Indians again commenced hoftilities, and were bufily engaged in killing and fcalping the frontier inhabitants in various parts of Pennfylvania. The whole Conococheague Valley, from the North to the South Mountain, had been almost entirely evacuated during Braddock's war. This ftate was then a Quaker government, and at the first of this war the frontiers received no affiftance from the flate. As the people were now beginning to live at home again, they thought hard to be drove away a fecond time, and were determined if poffible, to make a ftand: therefore they raifed as much money by collections and fubfcriptions, as would pay a company of rifle-men for feveral months. The fubfcribers met and elected a committee to manage the bufinefs. The committee appointed me captain of this company of rangers, and gave me the appointment of my fubalterns. I chofe two of the moft active young men that I could find, who had alfo been long in captivity with the Indians. As we enlifted our men, we dreffed them uniformly in the Indian manner,

with breech-clouts, leggins, mockefons and green fhrouds, which we wore in the fame manner that the Indians do, and nearly as the Highlanders wear their plaids. In place of hats we wore red handkerchiefs, and painted our faces red and black, like Indian warriors. I taught them the Indian discipline, as I knew of no other at that time, which would answer the purpose much better than Britifh. We fucceeded beyond expectation in defending the frontiers, and were extolled by our employers. Near the conclusion of this expedition, I accepted of an enfign's commission in the regular fervice, under King George, in what was then called the Pennfylvania line. Upon my refignation, my lieutenant fucceeded me in command, the reft of the time they were to ferve. In the fall (the fame year) I went on the Sufquehannah campaign, against the Indians, under the command of General Armstrong. In this route we burnt the Delaware and Monfey towns, on the West Branch of the Sufquehannah, and deftroyed all their corn.

In the year 1764, I received a lieutenant's commission, and went out on General Bouquet's campaign against the Indians on the Muskingum. Here we brought them to terms, and promised to be at peace with them, upon condition that they would give up all our people that they had then in captivity among them. They then delivered unto us three hundred of the prisoners, and faid that they could not collect them all at this time, as it was now late in the year, and they were far fcat-

tered; but they promifed that they would bring them all into Fort Pitt early next fpring, and as fecurity that they would do this, they delivered to us fix of their chiefs, as hoftages. Upon this we fettled a ceffation of arms for fix months, and promifed upon their fulfilling the aforefaid condition, to make with them a permanent peace.

A little below Fort Pitt the hoftages all made their efcape. Shortly after this the Indians ftole horfes, and killed fome people on the frontiers. The king's proclamation was then circulating and fet up in various public places, prohibiting any perfon from trading with the Indians, until further orders.

Notwithftanding all this, about the firft of March 1765, a number of waggons loaded with Indian goods, and warlike ftores, were fent from Philadelphia to Henry Pollen's, Conococheague, and from thence feventy pack-horfes were loaded with thefe goods, in order to carry them to Fort Pitt. This alarmed the country, and Mr. William Duffield raifed about fifty armed men, and met the pack-horfes at the place where Mercerfburg now ftands. Mr. Duffield defired the employers to ftore up their goods, and not proceed until further orders. They made light of this, and went over the North Mountain, where they lodged in a fmall valley called the Great Cove. Mr. Duffield and his party followed after, and came to their lodging, and again urged them to ftore up their goods:—He reafoned with them on the impro-

priety of their proceedings, and the great danger the frontier inhabitants would be exposed to, if the Indians should now get a fupply:—He faid as it was well known that they had fcarcely any amunition, and were almost naked, to fupply them now, would be a kind of murder, and would be illegally trading at the expence of the blood and treasfure of the frontiers. Notwithstanding his powerful reasoning, these traders made game of what he faid, and would only answer him by ludicrous burlefque.

When I beheld this, and found that Mr. Duffield would not compel them to ftore up their goods, I collected ten of my old warriors, that I had formerly disciplined in the Indian way, went off privately, after night, and encamped in the woods. The next day, as ufual, we blacked and painted, and waylayed them near Sidelong Hill. I fcattered my men about forty rod along the fide of the road, and ordered every two to take a tree, and about eight or ten rod between each couple, with orders to keep a referve fire, one not to fire until his comrade had loaded his gun-by this means we kept up a conftant, flow fire, upon them from front to rear:-We then heard nothing of thefe trader's merriment or burlefque. When they faw their packhorfes falling clofe by them, they called out pray gentlemen, what would you have us to do? The reply was, colleEt all your loads to the front, and unload them in one place; take your private property, and immediately retire.

IIO

When they were gone, we burnt what they left, which confifted of blankets, fhirts, vermillion, lead, beads, wampum, tomahawks, fcalping knives, &c.

The traders went back to Fort Loudon, and applied to the commanding officer there, and got a party of Highland foldiers, and went with them in quest of the robbers, as they called us, and without applying to a magistrate, or obtaining any civil authority, but barely upon fuspicion, they took a number of creditable perfons prifoners, (who were chiefly not in any way concerned in this action) and confined them in the guard-house in Fort Loudon. I then raifed three hundred riflemen, marched to Fort Loudon, and encamped on a hill in fight of the fort. We were not long there, until we had more than double as many of the British troops prisoners in our camp, as they had of our people in the guard-houfe. Captain Grant, a Highland officer, who commanded Fort Loudon, then fent a flag of truce to our camp, where we fettled a cartel, and gave them above two for one, which enabled us to redeem all our men from the guard-house, without further difficulty.

After this Captain Grant kept a number of rifle guns, which the Highlanders had taken from the country people, and refufed to give them up. As he was riding out one day, we took him prifoner, and detained him until he delivered up the arms; we alfo deftroyed a large quantity of gun-powder that the traders had ftored up, left it might be conveyed privately to the Indians. The

king's troops, and our party, had now got entirely out of the channel of the civil law, and many unjuftifiable things were done by both parties. This convinced me more than ever I had been before, of the abfolute necesfity of the civil law, in order to govern mankind.

About this time the following fong was composed by Mr. George Campbell (an Irish gentleman, who had been educated in Dublin) and was frequently fung to the tune of the Black Joke:

- Ye patriot fouls who love to fing, What ferves your country and your king, In wealth, peace and royal eftate; Attention give whilft I rehearfe, A modern fact, in jingling verfe, How party intereft ftrove what it cou'd, To profit itfelf by public blood, But juftly met its merited fate.
- 2. Let all those Indian traders claim, Their just reward, inglorious fame,

For vile bafe and treacherous ends. To Pollins, in the fpring they fent, Much warlike flores, with an intent, To carry them to our barbarous foes, Expecting that no-body dare oppofe, A prefent to their Indian friends.

 Aftonifh'd at the wild defign, Frontier inhabitants combin'd, With brave fouls, to ftop their career,

#### Col. James Smith.

Although fome men apoftatiz'd,Who firft the grand attempt advis'd,The bold frontiers they bravely ftood,To act for their king and their country's good,In joint league, and ftrangers to fear.

4. On March the fifth, in fixty-five, Their Indian prefents did arrive, In long pomp and cavalcade, Near Sidelong Hill, where in difguife, Some patriots did their train furprize, And quick as lightning tumbled their loads, And kindled them bonfires in the woods, And moftly burnt their whole brigade.

5. At Loudon, when they heard the news, They fcarcely knew which way to choofe, For blind rage and difcontent; At length fome foldiers they fent out, With guides for to conduct the route, And feized fome men that were trav'ling there, And hurried them into Loudon where They laid them faft with one confent.

6. But men of refolution thought, Too much to fee their neighbors caught, For no crime but falfe furmife;
Forthwith they join'd a warlike band, And march'd to Loudon out of hand, And kept the jailors prif'ners there, Until our friends enlarged were, Without fraud or any difguife. 7. Let mankind cenfure or commend, This rafh performance in the end, Then both fides will find their account.
'Tis true no law can juftify, To burn our neighbors property, But when this property is defign'd, To ferve the enemies of mankind, It's high treafon in the amount.

After this we kept up a guard of men on the frontiers, for feveral months, to prevent fupplies being fent to the Indians, until it was proclaimed that Sir William Johnfon had made peace with them, and then we let the traders pafs unmolefted.

In the year 1766, I heard that Sir William Johnfon, the king's agent for fettling affairs with the Indians, had purchafed from them all the land weft of the Appalachian Mountains, that lay between the Ohio and the Cherokee River; and as I knew by converfing with the Indians in their own tongue, that there was a large body of rich land there, I concluded I would take a tour weftward, and explore that country.

I fet out about the last of June, 1766, and went in the first place to Holstein River, and from thence I travelled westward in company with Joshua Horton, Uriah Stone, William Baker, and James Smith, who came from near Carlisse. There was only four white men of us, and a mulatto flave about eighteen years of

age, that Mr. Horton had with him. We explored the country fouth of Kentucky, and there was no more fign of white men there then, than there is now weft of the head waters of the Miffouri. We alfo explored Cumberland and Tenneffee Rivers, from Stone's\* River down to the Ohio.

When we came to the mouth of Tenneffee my fellow travellers concluded that they would proceed on to the Illinois, and fee fome more of the land to the weft:—this I would not agree to. As I had already been longer from home than what I expected, I thought my wife would be diftreffed, and think I was killed by the Indians; therefore I concluded that I would return home. I fent my horfe with my fellow travellers to the Illinois, as it was difficult to take a horfe through the mountains. My comrades gave me the greateft part of the amunition they then had, which amounted only to half a pound of powder, and lead equivalent. Mr. Horton alfo lent me his mulatto boy, and I then fet off through the wildernefs, for Carolina.

About eight days after I left my company at the mouth of Tennessee, on my journey eastward, I got a cane stab in my foot, which occasioned my leg to swell, and I suffered much pain. I was now in a doleful situ-

<sup>\*</sup> Stone's River is a fouth branch of Cumberland, and empties into it above Nafhville. We first gave it this name in our journal in May 1767, after one of my fellow travellers, Mr. Uriah Stone, and I am told that it retains the fame name unto this day.

ation-far from any of the human fpecies, excepting black Jamie, or the favages, and I knew not when I might meet with them-my cafe appeared desperate, and I thought fomething must be done. All the furgical instruments I had, was a knife, a mockason awl, and a pair of bullit moulds-with thefe I determined to draw the fnag from my foot, if poffible. I fluck the awl in the skin, and with the knife I cut the flesh away from around the cane, and then I commanded the mulatto fellow to catch it with the bullit moulds, and pull it out, which he did. When I faw it, it feemed a shocking thing to be in any perfon's foot; it will therefore be fuppofed that I was very glad to have it out. The black fellow attended upon me, and obeyed my directions faithfully. I ordered him to fearch for Indian medicine, and told him to get me a quantity of bark from the root of a lynn tree, which I made him beat on a ftone, with a tomahawk, and boil it in a kettle, and with the ooze I bathed my foot and leg:-what remained when I had finished bathing, I boiled to a jelly, and made poultices thereof. As I had no rags, I made ufe of the green mofs that grows upon logs, and wrapped it round with elm bark: by this means (fimple as it may feem) the fwelling and inflamation in a great measure abated. As ftormy weather appeared, I ordered Jamie to make us a shelter, which he did by erecting forks and poles, and covering them over with cane tops, like a fodder-houfe. It was but about one hundred yards from a large buffaloe road. As we were almost out of provision, I commanded Jamie to take my gun, and I went along as well as I could, concealed myself near the road, and killed a buffaloe. When this was done, we jirked\* the lean, and fryed the tallow out of the fat meat, which we kept to flew with our jirk as we needed it.

While I lay at this place, all the books I had to read, was a Pfalm Book, and Watts upon Prayer. Whilft in this fituation I composed the following verses, which I then frequently fung.

- Six weeks I've in this defart been, With one mulatto lad, Excepting this poor flupid flave, No company I had.
- In folitude I here remain, A cripple very fore, No friend or neighbor to be found, My cafe for to deplore.

 3. I'm far from home, far from the wife, Which in my bofom lay, Far from my children dear, which ufed Around me for to play.

<sup>\*</sup> Jirk is a name well known by the hunters, and frontier inhabitants, for meat cut in fmall pieces and laid on a fcaffold, over a flow fire, whereby it is roafted till it is thoroughly dry.

 4. This doleful circumftance cannot My happinefs prevent, While peace of confcience I enjoy, Great comfort and content.

I continued in this place until I could walk flowly, without crutches. As I now lay near a great buffaloe road, I was afraid that the Indians might be paffing that way, and difcover my fire-place, therefore I moved off fome diftance, where I remained until I killed an elk. As my foot was yet fore, I concluded that I would flay here until it was healed, left by travelling too foon it might again be inflamed.

In a few weeks after, I proceeded on, and in October I arrived in Carolina. I had now been eleven months in the wildernefs, and during this time I neither faw bread, money, women, or fpirituous liquors; and three months of which I faw none of the human fpecies, except Jamie.

When I came into the fettlement my clothes were almost worn out, and the boy had nothing on him that ever was fpun. He had buck-skin leggins, mockasons, and breech-clout—a bear-skin dressed with the hair on, which he belted about him, and a racoon-skin cap. I had not travelled far after I came in before I was strictly examined by the inhabitants. I told them the truth, and where I came from, &c. but my story appeared fo strange to them, that they did not believe me. They faid they had never heard of any one coming through the mountains from the mouth of Tenneffee; and if any one would undertake fuch a journey, furely no man would lend him his flave. They faid that they thought that all I had told them were lies, and on fuspicion they took me into cuftody, and fet a guard over me.

While I was confined here, I met with a reputable old acquaintance, who voluntarily became my voucher; and alfo told me of a number of my acquaintances that now lived near this place, who had moved from Pennfylvania-On this being made public, I was liberated. I went to a magistrate, and obtained a pass, and one of my old acquaintances made me a prefent of a fhirt. I then caft away my old rags, and all the clothes I now had was an old beaver hat, buck-fkin leggins, mockafons, and a new fhirt; alfo an old blanket, which I commonly carried on my back in good weather. Being thus equipped, I marched on, with my white fhirt loofe, and Jamie with his bear-fkin about him :---myfelf appearing white, and Jamie very black, alarmed the dogs where-ever we came, fo that they barked violently. The people frequently came out and afked me where we came from, &c. I told them the truth, but they, for the most part fuspected my ftory, and I generally had to shew them my país. In this way I came on to Fort Chiffel, where I left Jamie at Mr. Horton's negro-quarter, according to promife. I went from thence to Mr. George Adams's,

on Reed Creek, where I had lodged, and where I had left my clothes, as I was going out from home. When I dreffed myfelf in good clothes, and mounted on horfeback, no man ever afked me for a pafs; therefore I concluded that a horfe-thief, or even a robber, might pafs without interruption, provided he was only well-dreffed, whereas the fhabby villain would be immediately detected.

I returned home to Conococheague, in the fall 1767. When I arrived, I found that my wife and friends had defpaired of ever feeing me again, as they had heard that I was killed by the Indians, and my horfe brought into one of the Cherokee towns.

In the year 1769, the Indians again made incurfions on the frontiers; yet, the traders continued carrying goods and warlike flores to them. The frontiers took the alarm, and a number of perfons collected, deftroyed and plundered a quantity of their powder, lead, &c. in Bedford county. Shortly after this, fome of thefe perfons, with others, were apprehended and laid in irons in the guard-houfe in Fort Bedford, on fufpicion of being the perpetrators of this crime.

Though I did not altogether approve of the conduct of this new club of black-boys, yet I concluded that they fhould not lie in irons in the guard-houfe, or remain in confinement, by arbitrary or military power. I refolved therefore, if poffible, to releafe them, if they even fhould be tried by the civil law afterwards. I collected eighteen of my old black-boys, that I had feen

#### Col. James Smith.

tried in the Indian war, &c. I did not defire a large party, left they fhould be too much alarmed at Bedford, and accordingly prepare for us. We marched along the public road in day-light, and made no fecret of our defign :--- We told those whom we met, that we were going to take Fort Bedford, which appeared to them a very unlikely ftory. Before this I made it known to one William Thompfon, a man whom I could truft, and who lived there: him I employed as a fpy, and fent him along on horfe-back, before, with orders to meet me at a certain place near Bedford, one hour before day. The next day a little before fun-fet we encamped near the croffings of Juniata, about fourteen miles from Bedford, and erected tents, as though we intended flaying all night, and not a man in my company knew to the contrary, fave myfelf. Knowing that they would hear this in Bedford, and wishing it to be the cafe, I thought to furprize them, by ftealing a march.

As the moon rofe about eleven o'clock, I ordered my boys to march, and we went on at the rate of five miles an hour, until we met Thompfon at the place appointed. He told us that the commanding officer had frequently heard of us by travellers, and had ordered thirty men upon guard. He faid they knew our number, and only made game of the notion of eighteen men coming to refcue the prifoners, but they did not expect us until towards the middle of the day. I afked him if the gate was open? He faid it was then fhut, but he

121

expected they would open it as usual, at day-light, as they apprehended no danger. I then moved my men privately up under the banks of Juniata, where we lay concealed about one hundred yards from the fort gate. I had ordered the men to keep a profound filence, until we got into it. I then fent off Thompson again to fpy. At day-light he returned, and told us that the gate was open, and three centinels were ftanding on the wallthat the guards were taking a morning dram, and the arms standing together in one place. I then concluded to rush into the fort, and told Thompson to run before me to the arms, we ran with all our might, and as it was a mifty morning, the centinels fcarcely faw us until we were within the gate, and took poffession of the arms. Just as we were entering, two of them discharged their guns, though I do not believe they aimed at us. We then raifed a shout, which furprized the town, though fome of them were well pleafed with the news. We compelled a black-fmith to take the irons off the prisoners, and then we left the place. This, I believe, was the first British fort in America, that was taken by what they called American rebels.

Some time after this I took a journey weftward, in order to furvey fome located land I had on and near the Youhogany. As I paffed near Bedford, while I was walking and leading my horfe, I was overtaken by fome men on horfe-back, like travellers. One of them afked my name, and on telling it, they immediately pulled out

#### Col. James Smith.

their piftols, and prefented them at me, calling upon me to deliver myfelf, or I was a dead man. I ftepped back, presented my rifle, and told them to stand off. One of them fnapped a piftol at me, and another was preparing to shoot, when I fired my piece :--- one of them also fired near the fame time, and one of my fellow travellers fell. The affailants then rushed up, and as my gun was empty, they took and tied me. I charged them with killing my fellow traveller, and told them he was a man that I had accidentally met with on the road, that had nothing to do with the public quarrel. They asferted that I had killed him. I told them that my gun blowed, or made a flow fire-that I had her from my face before she went off, or I would not have miffed my mark; and from the polition my piece was in when it went off, it was not likely that my gun killed this man, yet I acknowledged I was not certain that it was not fo. They then carried me to Bedford, laid me in irons in the guard-houfe, fummoned a jury of the opposite party, and held an inquest. The jury brought me in guilty of wilful murder. As they were afraid to keep me long in Bedford, for fear of a refcue, they fent me privately through the wildernefs to Carlifle, where I was laid in heavy irons.

Shortly after I came here, we heard that a number of my old black-boys were coming to tear down the jail. I told the fheriff that I would not be refcued, as I knew that the indictment was wrong; therefore I wifhed to fland

my trial. As I had found the black boys to be always under good command, I expected I could prevail on them to return, and therefore wilhed to write to themto this the sheriff readily agreed. I wrote a letter to them, with irons on my hands, which was immediately fent; but as they had heard that I was in irons, they would come on. When we heard they were near the town, I told the fheriff I would fpeak to them out of the window, and if the irons were off, I made no doubt but I could prevail on them to defift. The sheriff ordered them to be taken off, and just as they were taken off my hands, the black boys came running up to the jail. I went to the window and called to them, and they gave attention. I told them as my indictment was for wilful murder, to admit of being refcued, would appear difhonorable. I thanked them for their kind intentions, and told them the greatest favor they could confer upon me, would be to grant me this one request, to withdraw from the jail, and return in peace; to this they complied, and withdrew. While I was fpeaking, the irons were taken off my feet, and never again put on.

Before this party arrived at Conococheague, they met about three hundred more, on the way, coming to their affiftance, and were refolved to take me out; they then turned, and all came together, to Carlifle. The reafon they gave for coming again, was, becaufe they thought that government was fo enraged at me that I would not get a fair trial; but my friends and

123

\$

myfelf together again prevailed on them to return in peace.

At this time the public papers were partly filled with these occurrences. The following is an extract from the Pennfylvania Gazette, number 2132, November 2d, 1769.

" Conococheague, OEtober 16th, 1769.

"Mess. Hall & Sellers,

"Pleafe to give the following narrative a place in your Gazette, and you will much oblige

"Your humble fervant,

"WILLIAM SMITH."

"Whereas, in this Gazette of September 28th, 1769, there appeared an extract of a letter from Bedford, September 12th, 1769, relative to James Smith, as being apprehended on fufpicion of being a black boy, then killing his companion, &c. I look upon myfelf as bound by all the obligations of truth, juffice to character and to the world, to fet that matter in a true light; by which, I hope the impartial world will be enabled to obtain a more juft opinion of the prefent fcheme of acting in this end of the country, as alfo to form a true idea of the truth, candor, and ingenuity of the author of the faid extract, in flating that matter in fo partial a light. The flate of the cafe (which can be made appear by undeniable evidence,) was this: "James Smith, (who is ftiled the principal ring leader of the black boys,

by the said author) together with his younger brother, and brother-in-law, were going out in order to furvey and improve their land on the waters of Youghoghany, and as the time of their return was long, they took with them their arms, and horfes loaded with the neceffaries of life: and as one of Smith's brothers-in-law was an artift in furveying, he had alfo with him the inftruments for that bufinefs. Travelling on the way, within about nine miles of Bedford, they overtook, and joined company with one Johnfon and Moorhead, who likewife had horfes loaded, part of which loading was liquor, and part feed wheat, their intentions being to make improvements on their lands. When they arrived at the parting of the road on this fide of Bedford, the company feparated, one part going through the town, in order to get a horfe shod, were apprehended, and put under confinement, but for what crime they knew not, and treated in a manner utterly inconfistent with the laws of their other part, viz. James Smith, Johnfon and Moorhead, taking along the other road, were met by John Holmes efq. to whom James Smith fpoke in a friendly manner, but received no answer. Mr. Holmes hasted, and gave an alarm in Bedford, from whence a party of men were fent in pursuit of them; but Smith and his companions not having the leaft thought of any fuch meafures being taken, (why fhould they ?) travelled flowly on. After they had gained the place where the roads joined, they

delayed until the other part of their company should come up. At this time a number of men came riding, like men travelling; they afked Smith his name, which he told them-on which they immediately affaulted him as highway-men, and with prefented piftols, commanded him to furrender, or he was a dead man; upon which Smith ftepped back, asked them if they were highwaymen, charging them at the fame time to fland off, when immediately, Robert George (one of the affailants) fnapped a piftol at Smith's head, and that before Smith offered to fhoot, (which faid George himfelf acknowledged upon oath;) whereupon Smith prefented his gun at another of the affailants, who was preparing to fhoot him with his piftol. The faid affailant having a hold of Johnfon by the arm, two fhots were fired, one by Smith's gun, the other from a piftol fo quick as just to be diftinguishable, and Johnson fell. After which Smith was taken and carried into Bedford, where John Holmes, efq. the informer, held an inqueft on the corpfe, one of the affailants being as an evidence, (nor was there any other trouble about the matter) Smith was brought in guilty of wilful murder, and fo committed to prifon. But a jealoufy arifing in the breafts of many that the inquest, either through inadvertency, ignorance or some other default, was not fo fair as it ought to be; William Deny, coroner of the county, upon requifition made, thought proper to re-examine the matter, and fummoning a jury of unexceptionable men, out of three

townships-men whose candor, probity and honesty, is unquestionable with all who are acquainted with them, and having raifed the corpfe, held an inqueft in a folemn manner, during three days. In the courfe of their fcrutiny they found Johnson's shirt blacked about the bullit-hole, by the powder of the charge by which he was killed, whereupon they examined into the diftance Smith flood from Johnfon when he fhot, and one of the affailants being admitted to oath, fwore to the refpective fpots of ground they both ftood on at that time, which the jury measured, and found to be twenty-three feet, nearly; then trying the experiment of fhooting at the fame fhirt, both with and against the wind, and at the fame distance, found no effects, not the least stain from the powder, on the shirt :--- And let any person that pleases, make the experiment, and I will venture to affirm he fhall find that powder will not ftain at half the distance above mentioned, if shot out of a rifle gun, which Smith's was. Upon the whole, the jury, after the most accurate examination, and mature deliberation, brought in their verdict that fome one of the affailants themfelves must necessarily have been the perpetrators of the murder.

"I have now reprefented the matter in its true and genuine colors, and which I will abide by. I only beg liberty to make a few remarks and reflections on the above mentioned extract. The author fays "James Smith, with two others in company, paffed round the town,

#### Col. James Smith.

without touching," by which it is plain he would infinuate, and make the public believe that Smith, and that part of the company, had taken fome bye road, which is utterly falfe, for it was the king's high-way, and the straightest, that through Bedford, being fomething to the one fide, nor would the other part of the company have gone through the town, but for the reafon already given. Again, the author fays that "four men were fent in purfuit of Smith and his companions, who overtook them about five miles from Bedford, and commanded them to furrender, on which Smith prefented his gun at one of the men, who was ftruggling with his companion, fired it at him, and shot his companion through the back." Here I would just remark again, the unfair and partial account given of this matter, by the author; not a word mentioned of George's fnapping his piftol before Smith offered to fhoot, or of another of the affailants actually firing his piftol, though he confeffed himfelf afterwards, he had done fo; not the leaft mention of the company's baggage, which, to men in the least open to a fair inquiry, would have been fufficient proof of the innocence of their intentions. Muft not an effusive blush overspread the face of the partial representer of facts, when he finds the veil he had thrown over truth thus pulled afide, and fhe exposed to naked Suppose it should be granted that Smith shot view. the man, (which is not, and I prefume never can be proven to be the cafe) I would only ask, was he not on

129

his own defence? Was he not publicly affaulted? Was he not charged at the peril of his life, to furrender, without knowing for what? No warrant being fhown him, or any declaration made of their authority. And feeing thefe things are fo, would any judicious man, any perfon in the leaft acquainted with the laws of the land, or morality, judge him guilty of wilful murder? But I humbly prefume every one who has an opportunity of feeing this, will by this time be convinced that the proceedings againft Smith were truly unlawful and tyranical, perhaps unparalleled by any inftance in a civilized nation; for to endeavor to kill a man in the apprehending him, in order to bring him to trial for a fact, and that too on a fuppofed one, is undoubtedly beyond all bounds of law or government.

"If the author of the extract thinks I have treated him unfair, or that I have advanced any thing he can controvert, let him come forward as a fair antagonift, and make his defence, and I will, if called upon, vindicate all that I have advanced againft him or his abettors. "WILLIAM SMITH."

I remained in prifon four months, and during this time I often thought of those that were confined in the time of the perfecution, who declared their prifon was converted into a palace. I now learned what this meant, as I never fince, or before, experienced four months of equal happines.

#### Col. James Smith.

130

When the fupreme court fat, I was feverely profecuted. At the commencement of my trial, the judges in a very unjust and arbitrary manner, rejected feveral of my evidences; yet, as Robert George (one of those who were in the fray when I was taken) fwore in court that he fnapped a piftol at me before I fhot, and a concurrence of corroborating circumstances, amounted to ftrong prefumptive evident that it could not poffibly be my gun that killed Johnfon, the jury, without hefitation, brought in their verdict, NOT GUILTY. One of the judges then declared that not one of this jury fhould ever hold any office above a constable. Notwithstanding this proud, ill-natured declaration, fome of these jurymen afterwards filled honorable places, and I myfelf was elected the next year, and fat on the board\* in Bedford county, and afterwards I ferved in the board three years in Westmoreland county.

In the year 1774, another Indian war commenced, though at this time the white people were the aggreffors. The profpect of this terrified the frontier inhabitants, infomuch that the greater part on the Ohio waters, either fled over the mountains, eaftward, or collected into forts. As the flate of Pennfylvania apprehended great danger, they at this time appointed me captain over what was then called the Pennfylvania line. As

<sup>\*</sup> A board of commiffioners was annually elected in Pennfylvania, to regulate taxes, and lay the county levy.

they knew I could raife men that would anfwer their purpofe, they feemed to lay afide their former inveteracy.

In the year 1776, I was appointed a major in the Pennfylvania affociation. When American independence was declared, I was elected a member of the convention in Weftmoreland county, flate of Pennfylvania, and of the affembly as long as I propofed to ferve.

While I attended the affembly in Philadelphia, in the year 1777, I faw in the ftreet, fome of my old boys, on their way to the Jerseys, against the British, and they defired me to go with them-I petitioned the house for leave of absence, in order to head a scouting party, which was granted me. We marched into the Jerfeys, and went before General Washington's army, way-laid the road at Rocky Hill, attacked about two hundred of the British, and with thirty-fix men drove them out of the woods into a large open field. After this we attacked a party that were guarding the officers baggage, and took the waggon and twenty-two Heffians; and also re-took fome of our continental foldiers which they had with them. In a few days we killed and took more of the British, than was of our party. At this time I took the camp fever, and was carried in a stage waggon to Burlington, where I lay until I recovered. When I took fick, my companion, Major James M'Common, took the command of the party, and had

Col. James Smith.

greater 'fuccefs than I had. If every officer and his party that lifted arms against the English, had fought with the same success that Major M'Common did, we would have made short work of the British war.

When I returned to Philadelphia, I applied to the affembly for leave to raife a battallion of riflemen, which they appeared very willing to grant, but faid they could not do it, as the power of raifing men and commiffioning officers was at that time committed to General Wafhington, therefore they advifed me to apply to his excellency. The following is a true copy of a letter of recommendation which I received at this time, from the council of fafety :

## "IN COUNCIL OF SAFETY,

"Philadelphia, February 10th, 1777.

"SIR,

"Application has been made to us by James Smith efq. of Weftmoreland, a gentleman well acquainted with the Indian cuftoms, and their manners of carrying on war, for leave to raife a battallion of marks-men, expert in the ufe of rifles, and fuch as are acquainted with the Indian method of fighting, to be dreffed entirely in their fashion, for the purpose of annoying and harraffing the enemy in their marches and encampments. We think two or three hundred men in that way, might be

very ufeful. Should your excellency be of the fame opinion, and direct fuch a corps to be formed, we will take proper measures for raising the men on the frontiers of this state, and follow fuch other directions as your excellency shall give in this matter.

" To his excellency General Washington."

"The foregoing is a copy of a letter to his excellency General Washington, from the council of fafety.

"JACOB S. HOWELL,

"Secretary."

After this I received another letter of recommendation, which is as follows:

"We, whofe names are under written, do certify that James Smith (now of the county of Weftmoreland) was taken prifoner by the Indians, in an expedition before General Braddock's defeat, in the year 1755, and remained with them until the year 1760: and alfo that he ferved as enfign, in the year 1763, under the pay of the province of Pennfylvania, and as lieutenant, in the year 1764, and as captain, in the year 1774; and as a military officer he has fuftained a good character. And we do recommend him as a perfon well acquainted with the Indian's method of fighting, and, in our humble opinion, exceedingly fit for the command of a ranging or fcouting party, which we are alfo humbly of opinion, he could (if legally authorized) foon raife. Given under our hands at Philadelphia, this 13th day of March, 1777.

Thomas Paxton, capt.	John Procter, col.
William Duffield, esq.	Jonathan Hoge, esq.
David Robb, esq.	William Parker, capt.
John Piper, col.	Robert Elliot,
William M'Comb.	Joseph Armstrong, col.
William Pepper, lieut. col.	Robert Peebles, lieut. col.
James M'Clane, esq.	Samuel Patton, capt.
	William Lyon, esq."

With thefe, and fome other letters of recommendation, which I have not now in my poffeffion, I went to his excellency, who lay at Morriftown. Though General Wafhington did not fall in with the fcheme of white men turning Indians, yet he propofed giving me a major's place in a battallion of riflemen already raifed. I thanked the general for his propofal; but as I entertained no high opinion of the colonel that I was to ferve under, and with him I had no profpect of getting my old boys again, I thought I would be of more ufe in the caufe we were then ftruggling to fupport, to remain with them as a militia officer, therefore I did not accept this offer.

In the year 1778, I received a colonel's commission, and after my return to Westmoreland, the Indians made an attack upon our frontiers. I then raised men and

**I**34

purfued them, and the fecond day we overtook and defeated them. We likewife took four fcalps, and recovered the horfes and plunder which they were carrying off. At the time of this attack, Captain John Hinkfton purfued an Indian, both their guns being empty, and after the fray was over he was miffing:—While we were enquiring about him, he came walking up, feemingly unconcerned, with a bloody fcalp in his hand—he had purfued the Indian about a quarter of a mile, and tomahawked him.

Not long after this I was called upon to command four hundred riflemen, on an expedition against the Indian town on French Creek. It was fome time in November before I received orders from General M'Intofh, to march, and then we were poorly equipped, and scarce of provisions. We marched in three columns, forty rod from each other. There were also flankers on the outfide of each column, that marched a-breaft in the rear, in fcattered order-and even in the columns, the men were one rod apart-and in the front, the volunteers marched a-breaft, in the fame manner of the flankers, fcouring the woods. In cafe of an attack, the officers were immediately to order the men to face out and take trees-in this position the Indians could not avail themfelves by furrounding us, or have an opportunity of fhooting a man from either fide of the tree. If attacked, the center column was to reinforce whatever part appeared to require it the most. When we

encamped, our encampment formed a hollow fquare, including about thirty or forty acres—on the outfide of the fquare there were centinels placed, whofe bufinefs it was to watch for the enemy, and fee that neither horfes or bullocks went out:—And when encamped, if any attacks were made by an enemy, each officer was immediately to order the men to face out and take trees, as before mentioned; and in this form they could not take the advantage by furrounding us, as they commonly had done when they fought the whites.

The following is a copy of general orders, given at this time, which I have found among my journals:

# "AT CAMP—OPPOSITE FORT PITT, "November 29th, 1778.

# "GENERAL ORDERS:

"A copy thereof is to be given to each captain and subaltern, and to be read to each company.

"You are to march in three columns, with flankers on the front and rear, and to keep a profound filence, and not to fire a gun, except at the enemy, without particular orders for that purpofe; and in cafe of an attack, let it be fo ordered that every other man only, is to fhoot at once, excepting on extraordinary occafions. The one half of the men to keep a referve fire, until their comrades load; and let every one be particularly careful not to fire at any time without a view of the enemy, and that not at too great a diffance. I earneftly urge the above cau-

tion, as I have known very remarkable and grevious errors of this kind. You are to encamp on the hollow fquare, except the volunteers, who, according to their own requeft, are to encamp on the front of the fquare, a fufficient number of centinels are to be kept round the fquare at a proper diftance. Every man is to be under arms at the break of day, and to parade opposite to their fire places, facing out, and when the officers examine their arms and find them in good order, and give neceffary directions, they are to be difmiffed, with orders to have their arms near them, and be always in readinefs.

"Given by

# "JAMES SMITH, Colonel."

In this manner we proceeded on, to French Creek, where we found the Indian town evacuated. I then went on further than my orders called for, in queft of Indians; but our provisions being nearly exhausted, we were obliged to return. On our way back we met with confiderable difficulties on account of high waters and fcarcity of provision; yet we never lost one horfe, excepting fome that gave out.

After peace was made with the Indians, I met with fome of them in Pittfburg, and enquired of them in their own tongue, concerning this expedition,—not letting them know I was there. They told me that they watched the movements of this army ever after they had left Fort-Pitt, and as they paffed thro the glades or bar-

rens they had a full view of them from the adjacent hills, and computed their number to be about one thoufand. They faid they alfo examined their camps, both before and after they were gone, and found, they could not make an advantageous attack, and therefore moved off from their town and hunting ground before we arrived.

In the year 1788 I fettled in Bourbon county, Kentucky, feven miles above Paris; and in the fame year was elected a member of the convention that fat at Danville, to confer about a feparation from the flate of Virginia;—and from that year until the year 1799, I reprefented Bourbon county, either in convention or as a member of the general affembly, except two years that I was left a few votes behind.

# ON THE MANNERS AND CUSTOMS OF THE INDIANS.

The Indians are a flovenly people in their drefs.-They feldom ever wash their shirts, and in regard to cookery they are exceeding filthy. When they kill a buffaloe they will fometimes lash the paunch of it round a fapling, and caft it into the kettle, boil it and fup the broth; tho they commonly shake it about in cold water, then boil and eat it .- Notwithstanding all this, they are very polite in their own way, and they retain among them, the effentials of good manners; tho they have few compliments, yet they are complaifant to one another, and when accompanied with good humor and difcretion, they entertain strangers in the best manner their circumstances will admit. They use but few titles of honor. In the military line, the titles of great men are only captains or leaders of parties-In the civil line, the titles are only councilors, chiefs or the old wifemen. These titles are never made use of in addressing any of their great men. The language commonly made use of in addreffing them, is, Grandfather, Father, or Uncle. They have no fuch thing in use among them, as Sir, Mr. Madam or Miftress-The common mode of

addrefs, is, my Friend, Brother, Coufin, or Mother, Sister, &c. They pay great refpect to age; or to the aged Fathers and Mothers among them of every rank. No one can arrive at any place of honor, among them, but by merit. Either fome exploit in war, muft be performed, before any one can be advanced in the military line, or become eminent for wifdom before they can obtain a feat in council. It would appear to the Indians a moft ridiculous thing to fee a man lead off a company of warriors, as an officer, who had himfelf never been in a battle in his life: even in cafe of merit, they are flow in advancing any one, until they arrive at or near middle-age.

They invite every one that comes to their houfe, or camp to eat, while they have any thing to give; and it is accounted bad manners to refufe eating, when invited. They are very tenacious of their old mode of dreffing and painting, and do not change their fashions as we do. They are very fond of tobacco, and the men almost all smoke it mixed with sumach leaves or red willow bark, pulverized; tho they feldom use it any other way. They make use of the pipe also as a token of love and friendship.

In courtfhip they alfo differ from us. It is a common thing among them for a young woman, if in love, to make fuit to a young man; tho the first address may be by the man; yet the other is the most common. The fquaws are generally very immodest in their words

and actions, and will often put the young men to the blufh. The men commonly appear to be poffeffed of much more modefly than the women; yet I have been acquainted with fome young fquaws that appeared really modeft: genuine it muft be, as they were under very little reftraint in the channel of education or cuftom.

When the Indians meet one another, inftead of faying, how do you do, they commonly falute in the following manner-you are my friend-the reply is, truly friend, I am your friend,-or, coufin, you yet exist-the reply is certainly I do.-They have their children under tolerable command : feldom ever whip them, and their common mode of chaftifing, is by ducking them in cold water : therefore their children are more obedient in the winter feafon, than they are in the fummer; tho they are then not fo often ducked. They are a peaceable people, and fcarcely ever wrangle or fcold, when fober; but they are very much addicted to drinking, and men and women will become bafely intoxicated, if they can, by any means, procure or obtain fpirituous liquor; and then they are commonly either extremely merry and kind, or very turbulent, ill-humoured and diforderly.

I4I

# ON THEIR TRADITIONS AND RELIGIOUS SENTIMENTS.

As the family that I was adopted into was intermarried with the Wiandots and Ottawas, three tongues were commonly fpoke, viz. Caughnewaga, or what the French call Iroque, alfo the Wiandot and Ottawa; by this means I had an opportunity of learning thefe three tongues; and I found that these nations varied in their traditions and opinions concerning religion ;---and even numbers of the fame nations differed widely in their religious fentiments. Their traditions are vague, whimfical, romantic and many of them fcarce worth relating; and not any of them reach back to the creation of the world. The Wiandots comes the nearest to this. They tell of a fquaw that was found when an infant, in the water in a canoe made of bull-rushes: this squaw became a great prophetefs and did many wonderful things; fhe turned water into dry land, and at length made this continent, which was, at that time, only a very fmall island, and but a few Indians in it. Tho they were then but few they had not fufficient room to hunt; therefore this fquaw went to the water fide, and prayed that this little island might be enlarged. The great being then heard her prayer, and fent great numbers of

Water Tortoifes, and Muſkrats, which brought with them mud and other materials, for enlarging this ifland, and by this means, they fay, it was encreafed to the fize that it now remains; therefore they fay, that the white people ought not to encroach upon them, or take their land from them, becaufe their great grand mother made it.—They fay, that about this time the angels or heavenly inhabitants, as they call them, frequently vifited them and talked with their forefathers; and gave directions how to pray, and how to appeafe the great being when he was offended. They told them that they were to offer facrifice, burn tobacco, buffaloe and deer bones; but that they were not to burn bears or racoons bones in facrifice.

The Ottawas fay, that there are two great beings that rule and govern the univerfe, who are at war with each other; the one they call *Maneto*, and the other *Matchemaneto*. They fay that Maneto is all kindnefs and love, and that Matchemaneto is an evil fpirit, that delights in doing mifchief; and fome of them think, that they are equal in power, and therefore worfhip the evil fpirit out of a principle of fear. Others doubt which of the two may be the most powerful, and therefore endeavor to keep in favor with both, by giving each of them fome kind of worfhip. Others fay that Maneto is the first great caufe and therefore must be all-powerful and fupreme, and ought to be adored and worfhipped; whereas Matchemaneto ought to be rejected and difpifed.

Those of the Ottawas that worship the evil spirit, pretend to be great conjurors. I think if there is any fuch thing now in the world as witchcraft, it is among these people. I have been told wonderful stories concerning their proceedings; but never was eye witness to any thing that appeared evidently supernatural.

Some of the Wiandots and Caughnewagas profess to be Roman-catholics; but even these retain many of the notions of their ancestors. Those of them who reject the Roman-catholic religion, hold that there is one great first cause, whom they call Owaneeyo, that rules and governs the universe, and takes care of all his creatures, rational and irrational, and gives them their food in due feafon, and hears the prayers of all those that call upon him; therefore it is but just and reasonable to pray, and offer facrifice to this great being, and to do those things that are pleasing in his fight;-but they differ widely in what is pleafing or difpleafing to this great being. Some hold that following nature or their own propenfities is the way to happinefs, and cannot be difpleafing to the deity, becaufe he delights in the happinefs of his creatures, and does nothing in vain; but gave thefe difpofitions with a defign to lead to happinefs, and therefore they ought to be followed. Others reject this opinion altogether, and fay that following their own propenfities in this manner, is neither the means of happiness nor the way to please the deity.

Tecaughretanego was of opinion that following nature

**I**44

145

in a limited fense was reasonable and right. He faid that most of the irrational animals by following their natural propenfities, were led to the greatest pitch of happiness that their natures and the world they lived in would admit of. He faid that mankind and the rattle fnakes had evil difpofitions, that led them to injure themfelves and others. He gave inftances of this. He faid he had a puppy that he did not intend to raife, and in order to try an experiment, he tyed this puppy on a pole and held it to a rattle fnake, which bit it feveral times; that he obferved the fnake fhortly after, rolling about apparently in great mifery, fo that it appeared to have poifoned itfelf as well as the puppy. The other instance he gave was concerning himfelf. He faid that when he was a young man, he was very fond of the women, and at length got the venereal difeafe, fo that by following this propenfity, he was led to injure himfelf and others. He faid our happiness depends on our using our reason, in order to fuppress these evil dispositions; but when our propenfities neither lead us to injure ourfelves nor others, we might with fafety indulge them, or even purfue them as the means of happinefs.

The Indians generally are of opinion that there are J great numbers of inferior Deities, which they call *Carreyagaroona*, which fignifies the Heavenly Inhabitants. These beings they suppose are employed as affistants, in managing the affairs of the universe, and in inspecting the actions of men: and that even the irrational animals

are engaged in viewing their actions, and bearing intelligence to the Gods. The eagle, for this purpofe, with her keen eye, is foaring about in the day, and the owl, with her nightly eye, perched on the trees around their camp in the night; therefore, when they observe the eagle or the owl near, they immediately offer facrifice, or burn tobacco, that they may have a good report to carry to the Gods. They fay that there are alfo great numbers of evil fpirits, which they call Onasahroona, which fignifies the Inhabitants of the Lower Region. Thefe they fay are employed in diffurbing the world, and the good fpirits are always going after them, and fetting things right, fo that they are conftantly working in opposition to each other. Some talk of a future state, but not with any certainty: at best their notions are vague and unfettled. Others deny a future state altogether, and fay that after death they neither think or live.

As the Caughnewagas and the fix nations fpeak nearly the fame language, their theology is alfo nearly alike. When I met with the Shawanees or Delawares, as I could not fpeak their tongue, I fpoke Ottawa to them, and as it bore fome refemblance to their language, we underftood each other in fome common affairs, but as I could only converfe with them very imperfectly, I can not from my own knowledge, with certainty, give any account of their theological opinions.

# ON THEIR POLICE OR CIVIL GOVERN-MENT.

I have often heard of Indian Kings, but never faw any.-How any term ufed by the Indians in their own tongue, for the chief man of a nation, could be rendered King, I know not. The chief of a nation is neither a supreme ruler, monarch or potentate-He can neither make war or peace, leagues or treaties-He cannot impress foldiers, or dispose of magazines-He cannot adjourn, prorogue or diffolve a general affembly, nor can he refuse his affent to their conclusions, or in any manner controul them—With them there is no fuch thing as heriditary fucceffion, title of nobility or royal blood, even talked of-The chief of a nation, even with the confent of his affembly, or council, cannot raife one fhilling of tax off the citizens, but only receive what they pleafe to give as free and voluntary donations.-The chief, of a nation has to hunt for his living, as any other citizen-How then can they with any propriety, be called kings? I apprehend that the white people were formerly fo fond of the name of kings, and fo ignorant of their power, that they concluded the chief man of a nation must be a king.

As they are illiterate, they confequently have no written code of laws. What they execute as laws, are either old customs, or the immediate refult of new Some of their ancient laws or cuftoms are councils. very pernicious, and difturb the public weal. Their vague law of marriage is a glaring inftance of this, as the man and his wife are under no legal obligation to live together, if they are both willing to part. They have little form, or ceremony among them, in matrimony, but do like the Ifraelites of old-the man goes in unto the woman, and fhe becomes his wife. The years of puberty and the age of confent, is about fourteen for the women, and eighteen for the men. Before I was taken by the Indians, I had often heard that in the ceremony of marriage, the man gave the woman a deer's leg, and fhe gave him a red ear of corn, fignifying that fhe was to keep him in bread, and he was to keep her in meat. I enquired of them concerning the truth of this, and they faid they knew nothing of it, further than that they had heard that it was the ancient cuftom among fome nations. Their frequent changing of partners prevents propagation, creates diffurbances, and often occafions murder and bloodfhed; though this is commonly committed under pretenfe of being drunk. Their impunity to crimes committed when intoxicated with fpirituous liquors, or their admitting one crime as an excufe for another, is a very unjust law or custom.

The extremes they run into in dividing the neceffa-

ries of life, are hurtful to the public weal; though their dividing meat when hunting, may anfwer a valuable purpofe, as one family may have fuccefs one day, and the other the next; but their carrying this cuftom to the town, or to agriculture, is ftriking at the root of induftry, as induftrious perfons ought to be rewarded, and the lazy fuffer for their indolence.

They have fcarcely any penal laws: the principal punifhment is degrading: even murder is not punifhed by any formal law, only the friends of the murdered are at liberty to flay the murderer, if fome atonement is not made. Their not annexing penalties to their laws, is perhaps not as great a crime, or as unjuft and cruel, as the bloody penal laws of England, which we have fo long fhamefully practifed, and which are in force in this ftate, until our penitentiary houfe is finifhed, which is now building, and then they are to be repealed.

Let us alfo take a view of the advantages attending Indian police:—They are not opprefied or perplexed with expensive litigation—They are not injured by legal robbery—They have no fplendid villains that make themfelves grand and great on other people's labor—They have neither church or flate erected as money-making machines.

# ON THEIR DISCIPLINE, AND METHOD OF WAR.

I have often heard the British officers call the Indians the undifciplined favages, which is a capital miftake -as they have all the effentials of difcipline. They are under good command, and punctual in obeying orders : they can act in concert, and when their officers lay a plan and give orders, they will chearfully unite in putting all their directions into immediate execution; and by each man observing the motion or movement of his right hand companion, they can communicate the motion from right to left, and march abreaft in concert, and in scattered order, though the line may be more than a mile long, and continue, if occasion requires, for a confiderable diftance, without diforder or confusion. They can perform various neceffary manœuvers, either flowly, or as fast as they can run : they can form a circle, or femi-circle: the circle they make use of, in order to furround their enemy, and the femi-circle if the enemy has a river on one fide of them. They can alfo form a large hollow fquare, face out and take trees: this they do, if their enemies are about furrounding them, to prevent from being fhot from either fide of the tree. When they go into battle they are not loaded or encumbered with many clothes, as they commonly fight naked, fave only breech-clout, leggins and mockefons. There is no fuch thing as corporeal punishment ufed, in order to bring them under fuch good difcipline : degrading is the only chaftifement, and they are fo unanimous in this, that it effectually answers the purpose. Their officers plan, order and conduct matters until they they are brought into action, and then each man is to fight as though he was to gain the battle himfelf. General orders are commonly given in time of battle, either to advance or retreat, and is done by a fhout or yell, which is well understood, and then they retreat or advance in concert. They are generally well equipped, and exceeding expert and active in the use of arms. Could it be fuppofed that undifciplined troops could defeat Generals Braddock, Grant, &c? It may be faid by fome that the French were alfo engaged in this war: true, they were; yet I know it was the Indians that laid the plan, and with fmall affiftance, put it into execution. The Indians had no aid from the French, or any other power, when they befieged Fort Pitt in the year 1763, and cut off the communication for a confiderable time, between that post and Fort Loudon, and would have defeated General Bouquet's army, (who were on the way to raife the fiege) had it not been for the affiftance of the Virginia volunteers. They had no British troops with them when they defeated Colonel Crawford, near

the Sandusky, in the time of the American War with Great Britain; or when they defeated Colonel Loughrie, on the Ohio, near the Miami, on his way to meet General Clarke: this was also in the time of the British war. It was the Indians alone that defeated Colonel Todd, in Kentucky, near the Blue licks, in the year 1782; and Colonel Harmer, betwixt the Ohio and Lake Erie, in the year 1790, and General St. Clair, in the year 1791; and it is faid that there was more of our men killed at this defeat, than there were in any one battle during our contest with Great Britain. They had no aid when they fought even the Virginia rifle-men almost a whole day, at the Great Kanhawa, in the year 1774; and when they found they could not prevail against the Virginians, they made a most artful retreat. Notwithstanding they had the Ohio to crofs, fome continued firing, whilft others were croffing the river; in this manner they proceeded until they all got over, before the Virginians knew that they had retreated; and in this retreat they carried off all their wounded. In the most of the foregoing defeats, they fought with an inferior number, though in this, I believe it was not the cafe.

Nothing can be more unjuftly reprefented than the different accounts we have had of their number from time to time, both by their own computations, and that of the British. While I was among them, I faw the account of the number, that they in those parts gave to

153

the French, and kept it by me. When they in their own council-house, were taking an account of their number, with a piece of bark newly ftripped, and a fmall flick, which answered the end of a flate and pencil, I took an account of the different nations and tribes, which I added together, and found there were not half the number which they had given the French; and though they were then their allies, and lived among them, it was not eafy finding out the deception, as they were a wandering fet, and fome of them almost always in the woods hunting. I asked one of the chiefs what was their reason for making such different returns? He faid it was for political reafons, in order to obtain greater prefents from the French, by telling them they could not divide fuch and fuch quantities of goods among fo many.

In year of General Bouquet's laft campaign, 1764, I faw the official return made by the British officers, of the number of Indians that were in arms against us that year, which amounted to thirty thousand. As I was then a lieutenant in the British fervice, I told them I was of opinion that there was not above one thousand in arms against us, as they were divided by Broadstreet's army being then at Lake Erie. The British officers hooted at me, and faid they could not make England fensible of the difficulties they labored under in fighting them, as England expects that their troops could fight the undificiplined favages in America, five to one, as

they did the East-Indians, and therefore my report would not answer their purpose, as they could not give an honorable account of the war, but by augmenting their number. I am of opinion that from Braddock's war, until the prefent time, there never were more than three thousand Indians at any time, in arms against us, west of Fort Pitt, and frequently not half that number. According to the Indians' own accounts during the whole of Braddock's war, or from 1755, till 1758, they killed or took, fifty of our people, for one that they loft. In the war that commenced in the year 1763, they killed, comparatively, few of our people, and loft more of theirs, as the frontiers (efpecially the Virginians) had learned fomething of their method of war: yet, they, in this war, according to their own accounts, (which I believe to be true) killed or took ten of our people, for one they loft.

Let us now take a view of the blood and treafure that was fpent in oppofing comparatively, a few Indian warriors, with only fome affiftance from the French, the firft four years of the war. Additional to the amazing deftruction and flaughter that the frontiers fuftained, from James River to Sufquehanna, and about thirty miles broad; the following campaigns were alfo carried on againft the Indians:—General Braddock's, in the year 1755: Colonel Armftrong's againft the Cattanyan town, on the Alleghany, 1757: General Forbes', in 1758: General Stanwick's, in 1759: General Monkton's, in

I54

1760: Colonel Bouquet's, 1761-and 1763, when he fought the battle of Bushy Run, and lost above one hundred men; but by the affiftance of the Virginia volunteers, drove the Indians; Colonel Armftrong's, up the West Branch of Susquehanna, in 1763: General Broadstreet's, up Lake Erie, in 1764: General Bouquet's, against the Indians at Muskingum, in 1764: Lord Dunmore's, in 1774: General M'Intofh's, in 1778: Colonel Crawford's, fhortly after his, General Clarke's in 1778-1780: Colonel Bowman's, 1779: General Clarke's, in 1782-against the Wabash, in 1786: General Logan's against the Shawanees in 1786: General Wilkinfon's in ----: Colonel Harmer's in 1790: and General St. Clair's, in 1791; which, in all, are twenty-two campaigns, befides smaller expeditions, fuch as the French Creek expedition, Colonels Edward's, Loughrie's, &c. All these were exclusive of the number of men that were internally employed as fcouting parties, and in erecting forts, guarding flations, &c. When we take the foregoing occurrences into confideration, may we not reafonably conclude, that they are the beft difciplined troops in the known world? Is it not the best discipline that has the greatest tendency to annoy the enemy and fave their own men? I apprehend that the Indian difcipline is as well calculated to answer the purpose in the woods of America, as the British discipline in Flanders: and British discipline in the woods, is the way to have men flaughtered, with fcarcely any chance of defending themfelves.

I 5 5

Let us take a view of the benefits we have received, by what little we have learned of their art of war, which coft us dear, and the lofs that we have fuftained for want of it, and then fee if it will not be well worth our while to retain what we have, and alfo to endeavor to improve in this neceffary branch of bufinefs. Though we have made confiderable proficiency in this line, and in fome respects out-do them, viz. as marksmen, and in cutting our rifles, and in keeping them in good order; yet, I apprehend we are far behind in their manœuvres, or in being able to furprize, or prevent a furprize. May we not conclude that the progrefs we had made in their art of war, contributed confiderably towards our fuccefs, in various refpects, when contending with great Britain for liberty? Had the British king, attempted to enflave us . before Braddock's war, in all probability he might readily have done it, because, except the New-Englanders, who had formerly been engaged in war, with the Indians, we were unacquainted with any kind of war: but after fighting fuch a fubtil and barbarous enemy as the Indians, we were not terrified at the approach of British red-coats .- Was not Burgoyne's defeat accomplished in fome meafure by the Indian mode of fighting? and did not Gen. Morgan's rifle-men, and many others, fight with greater fuccefs, in confequence of what they had learned of their art of war? Kentucky would not have been fettled at the time it was, had the Virginians been altogether ignorant of this method of war.

In Braddock's war, the frontiers were laid wafte, for above three hundred miles long, and generally about thirty broad, excepting fome that were living in forts, and many hundreds, or perhaps thoufands, killed or made captives, and horfes, and all kinds of property carried off: but, in the next Indian war, though we had the fame Indians to cope with, the frontiers almost all flood their ground, becaufe they were by this time, in fome meafure acquainted with their manœvres; and the want of this, in the firft war, was the caufe of the lofs of many hundred of our citizens, and much treafure.

Though large volumes have been wrote on morality, yet it may all be fummed up in faying, do as you would wifh to be done by: fo the Indians fum up the art of war in the following manner:

The bufinefs of the private warriors is to be under command, or punctually to obey orders—to learn to march a-breaft in fcattered order, fo as to be in readinefs to furround the enemy, or to prevent being furrounded —to be good markfmen, and active in the ufe of arms to practice running—to learn to endure hunger or hardfhips with patience and fortitude—to tell the truth at all times to their officers, but more efpecially when fent out to fpy the enemy.

Concerning Officers. They fay that it would be abfurd to appoint a man an officer whofe fkill and courage had never been tried—that all officers fhould be advanced only according to merit—that no one man fhould have

the abfolute command of an army-that a council of officers are to determine when, and how an attack is to be made-that it is the bufinefs of the officers to lay plans to take every advantage of the enemy-to ambufh and furprize them, and to prevent being ambufhed and furprized themfelves-it is the duty of officers to prepare and deliver fpeeches to the men, in order to annimate and encourage them; and on the march, to prevent the men, at any time, from getting into a huddle, becaufe if the enemy fhould furround them in this pofition, 'they would be exposed to the enemy's fire. It is likewife their bufiness at all times to endeavor to annoy their enemy, and fave their own men, and therefore ought never to bring on an attack without confiderable advantage, or without what appeared to them the fure profpect of victory, and that with the loss of few men: and if at any time they fhould be miftaken in this, and are like to lofe many men by gaining the victory, it is their duty to retreat, and wait for a better opportunity of defeating their enemy, without the danger of lofing fo many men. Their conduct proves that they act upon thefe principles, therefore it is, that from Braddock's war to the prefent time, they have feldom ever made an unfuccessful attack. The battle at the mouth of the Great Kanhawa, is the greateft inftance of this; and even then, though the Indians killed about three, for one they loft, yet they retreated. The lofs of the Virginians in this action, was feventy killed and the fame

number wounded :- The Indians loft twenty killed on the field, and eight, who died afterwards, of their wounds. This was the greatest loss of men that I ever knew the Indians to fustain in any one battle. They will commonly retreat if their men are falling faft-they will not ftand cutting, like the Highlanders, or other British troops: but this proceeds from a compliance with their rules of war, rather than cowardice. If they are furrounded, they will fight while there is a man of them alive, rather than furrender. When Colonel John Armftrong furrounded the Cattanyan town, on the Allegheny river, Captain Jacobs, a Delaware chief, with fome warriors, took possession of a house, defended themfelves for fome time, and killed a number of our men. As Jacobs could fpeak English, our people called on him to furrender: he faid that he and his men were warriors, and they would all fight while life remained. He was again told that they fhould be well used, if they would only furrender; and if not, the house should be burned down over their heads:-Jacobs replied he could eat fire: and when the houfe was in a flame, he, and they that were with him, came out in a fighting polition, and were all killed. As they are a fharp, active kind of people, and war is their principal fludy, in this they have arrived at confiderable perfection. We may learn of the Indians what is useful and laudable, and at the fame time lay afide their barbarous proceedings. It is much to be lamented that fome of our frontier rifle-men

are prone to imitate them in their inhumanity. During the British war, a confiderable number of men from below Fort Pitt, croffed the Ohio, and marched into a town of Friendly Indians, chiefly Delawares, who profeffed the Moravian religion. As the Indians apprehended no danger, they neither lifted arms or fled. After these rifle-men were fometime in the town, and the Indians altogether in their power, in cool blood, they maffacred the whole town, without diftinction of age or fex. This was an act of barbarity beyond any thing I ever knew to be committed by the favages themfelves.

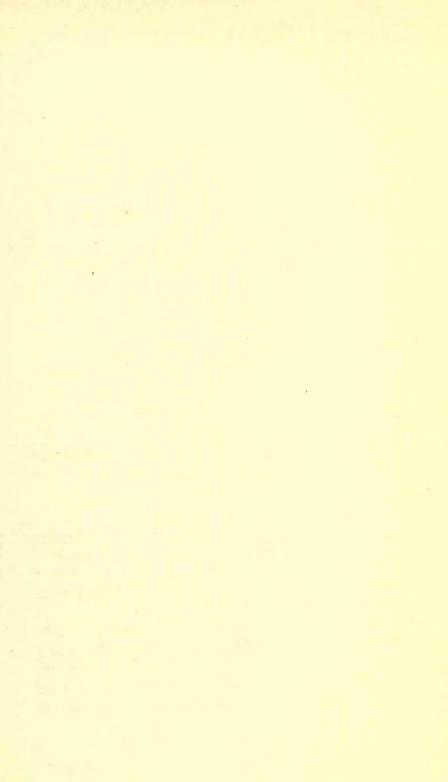

Why have we not made greater proficiency in the Indian art of war? Is it becaufe we are too proud to imitate them, even though it fhould be a means of preferving the lives of many of our citizens? No! We are not above borrowing language from them, fuch as homony, pone, tomahawk, &c. which is little or no ufe to us. I apprehend that the reafons why we have not improved more in this refpect, are as follows: no important acquifition is to be obtained but by attention and diligence; and as it is eafier to learn to move and act in concert, in clofe order, in the open plain, than to act in concert in scattered order, in the woods; fo it is eafier to learn our discipline, than the Indian manœuvres. They train up their boys to the art of war from the time they are twelve or fourteen years of age; whereas the principal chance our people had of learning, was by

obferving their movements when in action againft us. I have been long aftonifhed that no one has wrote upon this important fubject, as their art of war would not only be of ufe to us in cafe of another rupture with them; but were only part of our men taught this art, accompanied with our continental difcipline, I think no European power, after trial, would venture to fhew its head in the American woods.

If what I have wrote fhould meet the approbation of my countrymen, perhaps I may publifh more upon this subject, in a future edition.

END.

# APPENDIX.

# Illustrative Notes.

#### BY WM. M. DARLINGTON.

Fort Loudon—page 5.

Fort Loudon was erected in the year 1756, near the site of the present town of Loudon, in Franklin county, Pennsylvania. It was named in honor of John Campbell, Earl of Loudon, appointed on March 20, 1756, Commander-in-chief of all the forces in North America.—*Penn. Arch., vol. xii, p.* 395; *London Mag. for* 1757, *p.* 504.

#### Early Provincial Roads—page 5.

Braddock's road was opened in May and June, 1755, from Fort Cumberland to the Great Crossings of the Youghiogheny (now Smithfield), by nearly the same line as that of the present National road. Smithfield is about four miles from the Turkeyfoot.

General Braddock and the Quartermaster General, Sir John St. Clair, urgently solicited Governor Morris and the Council of Pennsylvania to order the construction of a road from the inhabited parts of the province westward toward the Ohio, to facilitate supplies of troops and provisions, as there was no

#### Appendix.

wagon road through the mountains west of Carlisle, "only a horse-path used by the Indian traders." Accordingly, the Governor and Council directed a road to be made from Shippensburgh to the Youghiogheny. James Burd, Adam Hoops, George Croghan, William Smith (mentioned as "one of ye Commissioners of ye County" (Cumberland), and others, were appointed Commissioners. They laid out the road; but, owing to the defeat of Braddock on the 9th of July, work on it was suspended; nor was it completed until a few years after the capture of Fort Du Quesne, in November, 1758. It traversed the present counties of Somerset, Bedford, Fulton, and part of For many years it was known by the name of Franklin. "Smith's road," from the circumstance of his capture on it during its construction, as related in his narrative, and in the letter of Colonel James Burd, one of the Commissioners, as follows:

"FROM THE ALLEGHENY MOUNTAINS, (

"5th July, 1755.

"HONORED SIR: We have now got this far with the road, but at present are under a very great dilemma, the cause of which is as follows: We had thought it necessary to make use of an empty house, 47 miles from Anthony Thompson's, for a store-house for our provisions, and we sent a guard of seven men, armed, to said store-house. They immediately fortified the house, and had received some of our provisions. We were like to be short of meat, etc., and hearing that there were wagons, and supposing cattle, upon the road, one Mr. Robert McCay, who had the command of the store and the people there, sent a boy called James Smith, about sixteen years of age, down the road to hurry up the cattle and wagons. Said Smith meeting a man sent up by Mr. Adam Hoops, at Rav's Town, received information that the wagons were just at hand, upon which the boy returned with Mr. Hoops' man hither, the wagons at this time being behind. The wagons arrived at the store the 3d curr't, at noon. Inquiry was made of the wagoners where Mr. Hoops' man and the boy were, and they replied that they had not seen them; upon which they went out

#### Illustrative Notes.

to search for them. They first found the boy's hat, and then Mr. Hoops' man's (named Arnold Vigorous) gun, and about ten perches from thence, Arnold lying dead, being shot through with two bullets and scalped. Mr. McCay immediately dispatched an express to me to the camp, about twelve miles from the store. I went down with a party of twelve men of Captain Hogg's company, and saw the corpse and got it buried, but can find nothing of the boy, only his horse we have got. That night, being the evening of the 3d curr't, we mounted guard at the store. About 9 o'clock we were attacked by Indians; their number we could not know. Two of our sentinels fired at two of the Indians which they saw, and I myself pursued singly the said two Indians, but being dark amongst the trees, could not see them nor overtake them, but heard them plainly about fifteen yards before me. The next day, being the 4th curr't, I returned to our camp, and was under a necessity to call the people together, and made use of all the arguments I could to induce them to continue in the service until we had finished. But, unfortunately, we had an alarm last night. One of the sentinels on the picket guard challenged three times and fired his musket, which has struch a great terror into the laborers; thirty of them are gone home this morning, and the remainder are very much dissatisfied, as they have no arms, and I am really afraid we shall not be able to keep them much longer. However, the Governor may depend upon my utmost endeavors to carry on the work, and that I won't leave my duty while I have ten men to work, or am recalled by your Honor.

"We are obliged to send off this morning a guard of twelve men and a sergeant of Captain Hogg's Company for a covering party for our returning wagons, and to bring up our provisions from the inhabitants, as we can't so much as hunt up our horses but with a guard. Our roads are all waylaid in order to cut off our provisions and any straggling men they can. Mr. William Smith is likewise under a necessity to go home this morning, as the boy that is taken prisoner (as we suppose) is his brother-in-law. We have now about three days' provisions. "Please to excuse unconnections.

" Please to excuse unconnections.

"I am, respectfully, your Honor's most obed't, h'ble, servant,

"JAMES BURD."

"To the Honorable Governor Morris."

-Col. Recs. of Penn., vol. vi., p. 466, and pp. 302, 318, 404, etc.; Shippen Papers, pp. 89 to 45.

#### Ligoneer—page 7.

The town of Ligonier, in Westmoreland county, on the Loyalhanna creek and Philadelphia turnpike road, fifty miles east of Pittsburg. Fort Ligonier was erected here in 1758.

#### Indian Town—page 13.

The Kittanning villages, inhabited chiefly by Delawares. On September 8, 1756, fourteen months after Smith's compulsory visit, they were attacked and destroyed by the Provincial troops, under the command of Col. John Armstrong. Now the site of the flourishing town of Kittanning, the county seat of Armstrong county, Pennsylvania.

#### Tullihas-page 13.

At or near the confluence of the Mohican and Owl creeks (forming the Whitewoman or Walhonding), in the township of Newcastle, Coshocton county, Ohio. On the map of Hutchins there is an Indian village near that point marked Owl's T. Among the Indians allied to the French, on the Upper Ohio, in 1754, a chief or warrior, named "The Owl," is mentioned in the letter of Captain Stobo, from Fort Du Quesne, July 29, 1754.—Penn. Col. Rec., vol. vi, p. 143; Memoirs of Stobo, p. 92.

Gook-bo-sing, or Habitation of Owls. Heckwelder's Narrative, page 280; so called from the quantity of these birds resorting thither.—Loskiei's Missions, page 162. Capt. Hutchins' Map, prefixed to the account of Bouquet's Expedition against the Ohio Indians in 1764. Philadelphia and London, 1765-6. Republished by Robert Clarke & Co., Cincinnati, 1868.

The celebrated Delaware chief, Captain Pipe, had his place of residence in 1776 on the Walhonding, about fifteen miles above

Coshocton, the "Forks of Muskingum."—Heckwelder's Narrative, p. 143.

#### Adoption by the Indians-page 15.

John McCullough, a boy, who was captured by the Indians, near Fort Loudon, in 1756, underwent like *transformation*. He was painted, feathered, and *ducked* in the Allegheny river, near Fort Du Quesne, then clad in a new ruffled shirt and told he had become an Indian.—*Narrative in Border Life*, *Lancaster*, 1841, p. 91.

#### Pluggy—page 17.

A Mohawk chief, styled Captain Pluggy (probably son of Tecanyaterighto) appeared at the council held by Lord Dunmore with the Indians at or near Fort Pitt, in the fall of 1774. — Am. Arch., 4th series, vol. i, p. 486.

He became celebrated, leading many bloody forays into Western Pennsylvania, Virginia, and Kentucky. Patrick Henry, Governor of Virginia in 1777, authorized an expedition to be raised and directed exclusively against the "enemy of Pluggystown." It was abandoned, however, from the apprehension it might cause a general Indian war. Letter of P. Henry to John Neville and Col. Morgan, at Fort Pitt, and reply. Minutes of the council of Virginia.—5 *Penn. Arch., pp.* 258, 260, 286.

Message of Killbuck to Col. Morgan.-Id., p. 44.

Letters of Zeisberger and Gen. Hand.-Id., pp. 443, 447.

Pluggy and his band defeated the whites near McClelland's Station, now Georgetown, Kentucky, on Christmas day, 1776, and again on Jan. 1, 1777.—*McDonald's Sketches*, p. 212.

Indian towns were often known to the whites by the name of

## Appendix.

a prominent chief or warrior. "Pluggystown" was also known as Upper Chillicothe (*Schoolcraft's Ab. Arch.*, vol. iv, p. 632), and as Old Chillicothe, four miles below Circleville, on the west side of the Scioto, where the celebrated Logan resided, and where he delivered his famous speech.—*Ch. Whittlesey's Essays*, pp. 142 to 147; *Howe's Hist. of Ohio*, pp. 402 to 406.

#### Buffalo Lick-page 21.

In Licking and Fairfield counties, now known as the Reservoir or Licking Summit of the Ohio Canal, ten miles south of Newark. The main Indian trail from the forks of the Ohio to the Miami towns led by this swamp, then, no doubt, of vast extent. Christopher Gist, agent of the Ohio Company (of Virginia), sent out to examine the country, with George Croghan and Andrew Montour, messengers, with presents from Governor Hamilton, of Pennsylvania, to the Twightwees (Miamis), reached this point and encamped on January 17th, 1751. On the next day they "set out from the Great Swamp," as it is noticed by Gist in his journal.—5 Col. Rec., p. 485; Evans' Map of 1755, and Evans' and Pownall's Map of 1776; Hutchins' Large Map, 1778; Pioneer Pamphlet No. 3, p. 11, pub. by the Licking Co. Pioneer Society, Newark, O., 1869.

#### Catawbas—page 22.

This warlike tribe inhabited the Carolinas, chiefly in the country adjacent to the Catawba river. They were the ancient and inveterate enemies of the Iroquois or Six Nations, with whom they were continually at war. The other tribes conceded to them the highest character for bravery, daring and subtlety. When South Carolina was first settled by the English, in

#### Illustrative Notes.

1670, the Catawbas could muster fifteen hundred warriors; in 1836, the entire tribe numbered less than one hundred, who occupied the fine tract of land, fifteen miles square, in the counties of York and Lancaster, which was originally reserved for them by the Proprietary Government. The few remaining of this once formidable nation now reside in the western part of North Carolina.

Some writers suppose that the Catawbas were the remnant of the celebrated Eries, who were expelled from their ancient country on the shores of Lake Erie and driven south by the conquering Iroquois, in 1650. There is considerable evidence in support of this view.—*Transac. Am. Antiq. Soc.*, vol. ii, p. 87; *Hist. Coll. of South Carolina, vol. i, pp.* 49, 188; *Am. Abor. Arch., vol. iii, p.* 288; *Bishop Gregg's History of the old Cheraws, pp.* 3, 18, etc.; Mouzon's Map of the Carolinas, 1775.

#### Canesadooharie—page 25.

The Black river, in Lorain county. The route of the Indians with Smith appears to have been from the town of Tullihas up along the lake fork of the Mohican creek to its source in the northern part of Ashland county; thence a few miles north-easterly to the head waters of Black river, in Lorain. On the map published by Lewis Evans, in 1755, the "Guahadahuri" is the only river laid down between the Cuyahoga and the Sandusky, although it is placed too far west—about the locality of the Vermillion. On Captain Thos. Hutchins' large map of 1778, Black river is correctly laid down, and named "Riviere en Grys" (Gray). See, also, Knapp's History of Ashland Co., p. 11; Taylor's Ohio, pp. 88, 521, note. The latter author and others have been misled by the misprint of 22

#### Appendix.

*eight* (in all the editions of the narrative excepting the original and the present) instead of *eighty* miles, stated by Smith to be about the distance between the Sandusky and Black rivers. The correct distance does not exceed fifty-two miles.

The Falls of Black river, at Elyria, in Lorain county, are doubtless the same mentioned in the Narrative (pp. 28 and 42); their descent is forty feet perpendicular. The reader will, of course, make due allowance for the errors in the distances given in the Narrative. Smith was young, and his means of taking and preserving notes, either in the wigwam or the canoe, very scanty.

#### Potatoes-page 29.

Ogh-ne-an-ata. — Mohawk Vocabulary, in Am. Abor. Arch., vol. ii, p. 487.

#### Large Creek-page 29.

Rocky river in Medina, Lorain and Cuyahoga counties. According to the distances given in the narrative their "winter cabin" was probably erected on the east branch of the Rocky river, either in the present township of Hinckley in Medina county or in the adjoining township of Royalton in Cuyahoga. Bear, deer and wolves were very abundant in this region so late as the year 1818.—Northrop's Hist. of Medina Co., p. 110, etc.

#### Sunyendeand-page 44.

Sir William Johnson, on his way home from Detroit in September, 1761, crossed the Portage from the mouth of the river at the site of the present town of Port Clinton. He then went down the Bay to "the encampment" "where the block-house

#### Illustrative Notes. 171

is to be built," about the location of Venice, three miles west of Sandusky City. He mentions a Wyandot town as "almost opposite the Carrying-place," and "another village of Hurons about three miles distant" from the place of encampment.— Diary of Sir Wm. Johnson, Appendix to Stone's Life and Times, vol. ii, p. 466.

Smith's description of the locality of this town "can only apply to Pipe creek, and the big fields lying south-east of and about a mile and a half from the present town of Sandusky." —Address of Hon. J. M. Root, Sept. 1862; Fire Lands Pioneer, vol. iv, p. 22. "Junqueindundeh" is the name given to an Indian village near the mouth of the Sandusky river, on Hutchins' Map in the account of Bouquet's Expedition in 1764; on Evans' Map of 1755 a Wyandot town is placed at the foot of Sandusky bay on the south side; this it is very probable was "Sunyendeand."

#### The Lake-note to p. 44.

The color of the water is also noticed by the German Prince Maximilian of Wied in his book of travels in North America in 1833, p. 490. "Lake Erie. The splendid bluish-green waters of which, like all the great Canadian lakes, are exactly of the same color as those of Switzerland."

#### Arthur Campbell—page 49.

Colonel Arthur Campbell of Washington county in Southwestern Virginia. He escaped from the Indians about three years after meeting with Smith, and returned by way of Fort Pitt to Virginia, where he afterward became distinguished in civil and military life, particularly as commander in a successful expedition

#### Appendix.

against the Cherokees in 1781. He was a delegate from Fincastle county to the Virginia Revolutionary Convention of 1776. The Royal Oak ford of the Holston river is in the present county of Smythe about three miles east of the town of Marion. Colonel Campbell removed to Knox county, Kentucky, where he died in 1816 in the 74th year of his age.—Howe's Virginia, p. 503; Moore's Diary of the Revolution, vol. ii, p. 372; Campbell's History of Virginia, p. 690; Bishop Meade's Virginia, vol. i, p. 153.

#### The Caghnawagas—pages 52 and 105.

An ancient tribe of the Mohawks in the interest of the French, who early in the last century induced them to remove from New York, and settle at the rapids of St. Louis near Montreal. —Doc. Hist. of New York, vol. i, p. 27; Colden's Hist. of the Five Nations, vol. ii, p. 121; New York Col. Hist., vol. vii, p. 15; Hist. Mag., vol. x, p. 321. Called the Praying Indians.—New York Col. Hist., vol. v, pp. 728, 753.

#### Cuyahoga-page 56.

Ka-ih-ogh-ha. River, in the Mohawk tongue.-Vocab. in Am. Abor. Arch., vol. iii.

#### Carrying place—page 56.

The old Indian Portage Path between the Tuscarawas branch of the Muskingum river, and the Cuyahoga, in Portage and Coventry townships in the present county of Summit. It was about eight miles in length. On the Maps of *Evans* and *Hutchins* it is laid down "I mile Portage."

#### Rapids—page 57.

The falls of the Cuyahoga river in Summit county four miles north-east of Akron. The descent is about 200 feet in  $2\frac{1}{2}$  miles.

#### Little Lake—page 57.

One of the numerous Beaver Ponds on the head waters of the Mahoning—no doubt much diminished in extent since the clearing of the forest, and the drainage of the land. It may be found however in the southern part of Mahoning county.

#### Johnson's Mohawks-page 69.

Sir William Johnson, Superintendent of the affairs of the Six Nations, and other Northern Indians. The Mohawks adopted him as a member of their nation, with the rank of war chief, in 1746. He resided near the Mohawk villages at Johnstown, now in Fulton county, New York.—Stone's Life of Sir Wm. Johnson, vol. i, p. 209.

# Great River—page 79.

The Ottawa.

# Falls of Sandusky-page 84.

Rapids at Fremont, Sandusky county, Ohio.

#### Prairies-page 85.

Formerly known as the Sandusky plains; now within the counties of Crawford, Wyandot, Marion, and Hardin.—Kilbourne's Ohio Gazetteer; Hough and Bourne's large Map of Ohio, 1816; Map in the first vol. of the Transactions of the Am. Antiq. Society.

Portage-page 86.

By the Sandusky, Sciota, and Ohio rivers lay the route of the Indians of Detroit and Lake Huron when going to war with the Catawbas and other southern tribes. "They ascend the Sandusquet river two or three days, after which they make a small portage, a fine road of about a quarter of a league. Some make canoes of elm bark, and float down a small river [the Sciota] that empties into the Ohio."-Memoir of Vaudreuil, Governor of Canada, to the Council of Marine, from Quebec, October 30, 1718, Paris Documents, New York Col. Hist., vol. ix, p. 868; Pownall's Top. Disc. of North America, p. 42, and map. "Through these rivers lies the most common pass from Canada to the Ohio and Mississippi."-Morse's Am. Gazetteer of 1798, p. 497; Kilbourne's Ohio Gazetteer for 1817, p. 60; Carey's Atlas for 1812 This once important portage extended from the site of Garrett's Mill, near the village of Wyandot, on the Sandusky river, in Wyandot county; thence south, about four miles on a ridge, through part of Dallas township in Crawford county, to the north branch of the Little Sciota near Swinnerton, on the Old Fort Ball and Columbus road in Grand Prairie township, Marion county. The length of the portage varied according to the stage of water. It was known as the "Four Mile Cross." In high water the north branch of the Little Sciota could be navigated by canoes to a point about a mile distant from Garrett's Mill, on the Sandusky. A cut has been made through the ridge about half a mile east from the village of Wyandot, by which the waters of both streams are united. [Notes to the writer from S. R. Harris, Esq., of Bucyrus, and Wm. Brown, Esq., of Springfield.] Mr. Brown settled near Wyandot in 1826, and surveyed the Wyandot Indian Reservation for the U.S. Government.

The Ollentangy-pages 87 and 99.

By a law of the Legislature of Ohio, passed in 1833, "to restore the Indian names to certain streams"-this name is incorrectly given to the Whetstone, the eastern affluent of the Sciota, the Delaware Indian name of which was Keenbong-shecon-sepung, or Whetstone creek, in English .- 'John Brickell's Narrative in American Pioneer, vol. i, p. 55. Brickell had been a prisoner with the Delawares, in Ohio, for over four years. He spoke their language as well as his own. He resided in Columbus from 1797 until his death in July, 1844. The narrative is reprinted in Martin's History of Franklin County (Columbus, 1858), omitting the part relative to the Whetstone. Big Darby creek, which rises in Logan county and flowing south-east empties into the west side of the Sciota in Pickaway county, opposite Circleville, is the real Ollentangy; this is clearly evident from Smith's description of his route from the Sandusky portage to that stream, and of the country between it and the waters of the Miami (or Mad river).

The "very large Prairie" is now embraced within the counties of Madison, Clarke, Champaign, Fayette, Pickaway, and Greene, between Darby creek and Mad river.—See Hough and Bourne's large Map of Ohio, published in 1816; also Kilbourne and Bourne's Map, of 1820, in Arch. Amer., vol. i; Kilbourne's Gazetteer of Ohio, for 1819, p. 61.

## Little Lake—pages 50, 100, etc.

Sandusky bay. It is about twenty miles long and from one to four miles wide. It was formerly "termed by the inhabitants the Little Lake."—Brown's Views on Lake Erie, 1814, p. 73. Sa-undustee, water, in the Wyandot tongue.—Gallatin's

Synopsis and Vocab. in vol. ii. of the Trans. of the Am. Antiq. Soc., p. 332; see also vol. i, p. 295. By changing the pronunciation the meaning of this and other words in the Wyandot language, expressing proper names, varied. Sah-un-dus-kee, clear water. Sa-anduste, or water within water pools.—John Johnston, in Trans. Am. Antiq. Soc., vol. i, p. 297; J. M. Roots' Address; Fire Lands Pioneer, vol. iv, for June, 1863, p. 21. The latter signification is peculiarly applicable to Sandusky bay and the extensive marshes on its borders, which are intersected in many directions by pools and channels of open water.

#### Colonel Grant—pages 102-3.

Grant's defeat and capture took place on the 14th day of September, 1758. He was a Major General in the British service during the American Revolution. He was promoted to the rank of Lieutenant General in 1782, and General in 1796, and died "very old," at his seat at Ballendallock, near Elgin in Scotland, about the 13th of May, 1806.—*Biog. Sketch in N. Y. Col. Hist., vol. x, p.* 903. The court house in Pittsburg, fronting on Grant street, stands near the western extremity of the once beautiful eminence called "Grant's Hill," which long since has been graded and covered with buildings.

## Susquehannah Campaign-page 107.

In September and October, 1763, the Indian villages destroyed stood on the Great Island and on the banks of the Susquehannah river, in the present counties of Clinton and Lycoming.—Gordon's Hist. of Penn., p. 399; Sculls' Map, 1770; Howells' Map, 1792.

Gen. Bouquet's Campaign-pages 107-8.

The hostages were fourteen in number; two Mingoes, six Delawares, and six Shawnees. Only the latter escaped on the way to Fort Pitt. The others being unconfined afterward disappeared, excepting three. The prisoners held by the Shawnees were collected during the winter and brought to Fort Pitt (in May, 1765), where five hundred and seventy-one chiefs and warriors (besides women and children,) assembled and held a friendly conference with Major Murray and the officers of the garrison. The treaty made with Gen. Bouquet the preceding November at the Muskingum was formally ratified. One hundred and nineteen Shawnee warriors were present.—Journal of George Croghan, in Col. Rec., vol. ix, p. 250 to 264; Hist. Account of Bouquet's Expedition, p. 88; Id. p. 239.

Katepacomen (or Simon Girty), was one of the Delaware hostages.—Col. Rec. vol. ix, p. 228. It appears that upon one occasion, during the campaign, the Shawnees selected James Smith to represent them.—Journal of Gen. Bouquet, Col. Rec., vol. ix, p. 219.

In 1764 Colonel Bouquet erected a brick redoubt as an addition to Fort Pitt. It is yet standing, and used for a dwelling house. The stone tablet in the wall, bearing the inscription, Coll. Bouquet, A. D. 1764, has been removed recently and placed in the wall of the new city hall. This redoubt is the only relic of British dominion in the Ohio valley.

The governor and council of Pennsylvania, uncertain of the consequences of the escape of the Shawnee hostages, deferred proclaiming the Indian trade opened according to the royal proclamation of October 7th, 1763, until notified by Sir William Johnson that a general peace had been concluded with the

Western Indians.—*Proceed. of Council, Jan.* 21, 1765; *Col. Rec., vol. ix, p.* 239. At the conferences at the Muskingum and Fort Pitt the Indians expressed their anxiety for the beginning of trade, and were displeased when it was refused.—*Id. pp.* 261, 250, 251. General Gage was anxious to have the trade commence, fearing the Indians would again resort to the French.— *Letters to Gov. Penn, id. p.* 266, 268. Governor Penn's proclamation declaring the Indian trade opened to licensed traders was issued on June 4, 1765.

The Conococheague settlement, now Franklin county, Pennsylvania, being on the extreme frontier, suffered repeatedly all the horrors of Indian warfare. The settlers were Scots-Irish Presbyterians, who "though neglected by the royal and provincial governments throughout all the Indian wars sustained nearly the whole burden of defending the frontier."-Gordon's Hist. of Penn., p. 624; Rupp's Hist. of Franklin Co., p. 486; Chambers' Tribute to the Scots-Irish, Letters, p. 88; Parkman's Pontiac, chap. xxiv. "Declaration and remonstrance of the distressed and bleeding frontier inhabitants of the province of Pennsylvania."---Pamphlet, Feb. 13, 1764. "Two hundred miles of an extended frontier all so exposed to the incursions of the Indians, that no man can go to sleep within ten or fifteen miles of the border without danger of having his house burned and himself and family scalped or led into captivity before the next morning."---Letter in Gordon's Penn., p. 624.

The policy of the governor and the commander-in-chief, Gage, was not understood or appreciated by the people of the frontier, and they determined on their only preventive course. Their leader was James Smith, who (says *Chambers*, *Tribute*, *p*. 82) was "a man of resolution, of indomitable courage, and

inflexible from any purpose which he deemed necessary for the safety of the inhabitants."

His family were prominent in the county from its earliest settlement. "Smith's," now Mercersburg, "was in early days an important place for trade with the Indians and settlers on the Western frontier."—Rupp's Hist. of Franklin Co., p. 475.

The traders' goods were destroyed, as related in the narrative and in a letter from Colonel Reid commanding the district of Fort Pitt.—Col. Rec., vol. ix, p. 269.

The convoy was in charge of Captain Robert Callender, an old trader. It consisted of eighty-one horse loads, sixty-three of which were destroyed.

The affair caused a great sensation throughout the province. The goods, valued at £3,000, belonged to Baynton, Wharton and Morgan, who alleged they were destined for the Illinois and to be stored at Fort Pitt.—See Letters of Sir. Wm. Johnson to Gov. Penn, Penn. Arch., vol. iv, pp. 216, 226.

He "greatly disapproved" of the course of the traders in forwarding their goods before the trade was opened.

General Gage was likewise "of the opinion" that "the traders had hopes of getting first to market by stealing up their goods before the trade was legally permitted."—*Penn. Arch., vol. iv, p.* 215. During this summer traders' goods were not allowed to go forward without a pass from William or James Smith. The following is a copy of one from *Penn. Arch., vol. iv, p.* 220:

" As the Sidling hill volunteers have already inspected these goods, and as they are all private property, it is expected that none of these brave fellows will molest them upon the road, as there is no Indian supplies amongst them. Given under my hand, May 15, 1765.

" (Signed)

JAS. SMITH."

The governor by the advice of the council, on Jan. 15, 1766, removed William Smith from the magistracy, and directed the chief justice to issue a writ for the apprehension of James, --Letter of Gov. Penn to Gen. Gage, Col. Rec., vol. ix, pp. 293, 297; Rupp's Hist. of Bedford Co., p. 510. It does not appear that any attempt was ever made to execute the writ, although it was issued to the sheriff of Cumberland county.

## Sideling Hill-page 109.

A low ridge of the Allegheny mountains in Fulton county The foot of the hill is about sixteen miles east of the town of Bedford. The road across it, seven miles in length, is well remembered by travellers as tedious, and often dangerous.

# Affairs at Fort Loudon—page 110.

Lieutenant Charles Grant of the 42d Highland regiment commanded at Fort Loudon. The following characteristic letter was sent to him by Smith:

Smith's Run, June 19, 1765. Sir: The arms that are detained in Loudon you may keep them, keep them, keep them! I am, etc.,

JAMES SMITH.

#### -Arch., vol. iv, p. 229.

In November, Lieutenant Grant having taken more arms from the country people, and being ordered to Fort Pitt to compel a surrender of the guns, the riflemen headed by Smith besieged Fort Loudon for two days and nights, so closely, that no one was permitted to go in or out of it. Firing was kept up "upon all corners of the fort, so that the centrys could not stand upright on the bastions." No one was hurt on either side. On the 10th of November the guns

were surrendered to the custody of Wm. McDowell "until the governor's pleasure respecting them should be known." The arms were "five rifles and four smooth bored guns."—Letters and Depos. of Lt. Chas. Grant and others ; Penn. Arch., vol. iv, pp. 220 to 248.

#### Peace with the Indians—page 113.

Sir William Johnston made peace with the Ohio Indians, Mingoes, Shawnees, and Delawares, at Johnston Hall, July 13, 1765.—New York Col. Hist., vol. vii, p. 754.

#### Tennessee-page 114.

This exploration by Colonel Smith and his companions was, with the single exception of that of Henry Scaggins, a hunter, the first ever made of the country west of the Cumberland mountains in Tennessee by any of the Anglo-Saxon race.—*Ramsay's Annals* of Tenn., p. 70; Haywood's Civil Hist. of Tenn., p. 77.

## Fort Chissel-page 118.

Fort Chiswell was built by Colonel Byrd and his regiment from Virginia in 1758; he stationed a garrison in it.—Haywood, p. 28. It stood about nine miles east of the present town of Wytheville in Wythe county.—Howe's Virginia, p. 514, 515; Madison's Map of Virg.; see Table of Distances in Poulson's Am. Almanac for 1789.

## Indians and Traders—page 119.

Letters in the *Pennsylvania Gazette*, from Fort Pitt, dated July 26 and 28, 1769, mention the great probability of another war; "the Indians are so insolent, robbing houses, stealing

horses, and threatening the inhabitants."--Penn. Gaz. for Aug. 17, 1769; Id. Aug. 31, 1769; Id. Oct. 5, 1769.

#### Traders' goods destroyed—page 119.

Captain Robert Callender was the principal sufferer by the destruction of traders' goods at the crossings of the Juniata in Bedford county in August, 1769. He afterward applied to the legislature for relief, stating his losses at near £600.—Petition, March, 6, 1775; Assembly Journals, p. 575.

# Affray near Bedford—pages 121 to 130.

Smith was committed to the jail in Carlisle on the 22d of September, 1769, charged with shooting John Johnston on the 20th of the same month. A large body of armed men assembled to rescue him fearing (they said) he would be taken to Philadelphia for trial. Col. John Armstrong, the Rev. John Steel, and other leading citizens, endeavored to dissuade them from their purpose, while the magistrates assisted the sheriff in raising a guard to defend the jail. Smith sent his intended rescuers "a candid letter declaring his desire to have a trial by the laws of his country, begging them to return home," etc. They did not desist, however, until from the windows of the prison he "begged them in a solemn manner to return, and to shed no innocent blood ;" this, with assurances that the prisoner should be tried in the county and not elsewhere, turned them reluctantly from their design .- Letter from Carlisle, Sept. 24, 1769, in the Penn. Gazette for Oct. 5.

Commissioner of Bedford and Westmoreland Counties—page 130.

Colonel Smith had removed to his land on Jacob's creek, a branch of the Youghiogheny, then in Bedford county, which was erected in 1771, and included all of the Western part of the province. From Bedford, Westmoreland county was formed in 1773; it embraced within its limits all of the province west of the Laurel Hill. This territory was claimed by Virginia, whose jurisdiction over it the governor, Lord Dunmore, attempted by violent measures to enforce. Fort Pitt was seized by a band of armed partizans, headed by Captain John Connolly, and its name changed to Fort Dunmore. New counties were formed from which delegates were sent to the Virginia legislature. Justices and other civil officers were commissioned by the authorities of Virginia. Court-houses were erected and Virginia courts regularly held within the limits of the present counties of Allegheny and Washington in Pennsylvania. The people were divided in their allegiance; arrests, counter-arrests, and other violent acts, frequently occurred during this seven years' contest. The breaking out of the Revolutionary war in 1775 and a recommendation by Congress on the subject abated the civil strife. The controversy ended in 1780 by mutual agreement between the two states, Virginia yielding her claims to the disputed territory. The completion of Mason and Dixon's line in 1784, permanently settled the boundary .- Penn. Arch., vol. iv, pp. 435 to 633; Penn. Col. Rec., vol. x, pp. 140 to 240; Hist. of Mason and Dixon's line, by James Veech, Pittsburg. 1857; Report of the Surveyor General for 1865, Harrisburg, 1866.

For three years of these turbulent times James Smith was

one of the commissioners of Westmoreland county; Governor John Penn doubtless was glad to have an adherent of his ability and energetic character, and quite willingly overlooked past differences. On the 8th of April, 1774, Joseph Beeler and James Smith, commissioners, addressed a communication to the governor stating "their disagreeable situation owing to the present disturbances," and that "the greater part of the people in the back parts of the county absolutely refuse to pay their taxes or serve in the office of collector." They further allude to the "disturbances of the court by a number of armed men," and ask "his honor's advice and assistance," assuring him "that every step shall be taken in their power for the benefit and advantage of the province."—Penn. Arch., vol. iv, p. 487.

In February, 1775, Smith was arrested and "bound over to answer the court of Virginia, before Dorsey Pentecost, one of their justices," who also issued "precepts" for the arrest of the sheriff and other Pennsylvania officers, saying "they were imposters on the government and dominion of Virginia, and he would have them confined."—Deposition of James Smith; Arch., vol. iv, p. 610; Col. Rec., vol. x, p. 235.

# Another Indian War, 1774—page 130.

This was known as Dunmore's war. It ended with the defeat of the Indians at Point Pleasant, October 10, 1774.

# Indians' Attack-pages 134, 135.

The date of the year in the narrative is erroneous, it should be 1777. "I have sent five Indian scalps taken by one of our scouting party, commanded by Colonel Barr, Colonel Perry,

Colonel Smith, and Captain Hinkston, being volunteers in the action. The action happened near Kittaning, they retook six horses the savages had taken from the suffering frontiers."— Extract of Letter from Arch. Lochry to President Wharton, dated at "Westmoreland, ye 6th December," 1777; Penn. Arch., vol. vi, p. 69.

French Creek Expedition-page 135.

MINUTES OF THE SUPREME EXECUTIVE COUNCIL, Philadelphia, March 20, 1786.

Comptroller General's reports upon the following accounts read and approved, viz: Of Captain John Woods for pay of his company of Westmoreland county militia, commanded by Colonel Smith under orders from General McIntosh, and for arms lost on the expedition.

Of Captain John Kyle, for pay of his company employed on the said expedition.

Of Colonel James Smith, for pay of the militia of Westmoreland county, under his command, employed on the French creek expedition in 1778.--Col. Rec., vol. xiv, p. 662.

## General McIntosh—page 135.

Brigadier General Lachlan McIntosh of the Continental army succeeded General Hand in command of the Western district; (head quarters at Fort Pitt) in May, 1778. In October following he built Fort McIntosh, "upon the Indian side of the Ohio river" (where the town of Beaver now stands), and in November and December erected Fort Laurens on the west bank of the Tuscarawas river, half a mile below the present town of Bolivar, Tuscarawas county, Ohio.—Penn. Arch., vol. vi, pp. 467, 564, 646; vol. vii, p. 132; Id. vol. xii, pp. 382, 400; Herring's Nat. Port. Gall, vol. iii; Howe's Obio Hist. Col., p. 488.
